INDEX

Adhesion, platelet-bacteria, 142
Agglutination of platelets, 156, 182
Albumin, serum, separating leukocytes from whole blood, 81
Anemia, phagocytosis in, 98
in mice, 117
in rats, 108
Anesthesia, ether, effect on phagocytosis, 113
Anticoagulants in platelet isolation, 171
Bacteria, and adhesion of blood platelets, 142
Bacterial endocarditis, adhesion tests in, 151
Basophils
in brucellosis, 24
in normal bone marrow, 56
Berry, Joe, 98, 108, 117
Blood
anticoagulants, in platelet isolation, 171
centration
platelet-bacteria adhesion in, 145
stability of platelets in, 142
coagulation activity of tissue juices, 149
heparinized
platelet-bacteria adhesion in, 145
stability of platelets in, 142
oxalated, platelet-bacteria adhesion in, 145
peripheral leukocytes from, gramicidin and lysolecithin in preparation of, 88
picture in brucellosis, 23
phagocytosis studies, 98
platelets
adhesion of, 142
studies on, 161, 170, 182
saline method of isolating platelets, 172
separation of platelets from, 170
whole, leukocytes separated from, by serum albumin, 81
Bone marrow
eutrophils, 36
in brucellosis, 7
aspiration of material, 8
examination of material, 8
pathology, 9
necrosis of bone marrow, 9
cultivation of large samples, 34
cultivation of microscopic samples, 39
culture methods, 33
ehrlichiosis, studies of, 42
nutrient provision, 33
removal of waste products, 38
respiratory metabolism determination, 36
sterilization, 38
sterile puncture, 54
technic of experiments, 38
in vitro study of, 33, 42
Bovine albumin, separating leukocytes from whole blood, 84
Brockmyre, Frances, 54
Brucellosis
bone marrow lesions in, 7
peripheral blood picture in, 23
Cellular pattern in bone marrow, 25
Citrated platelets, agglutinability of, 189
Citrated blood
platelet-bacteria adhesion in, 145
stability of platelets in, 142
Colchicine, effect on erythrocyte formation, 52
Copley, Alfred, 161, 170, 182
Cytomorphological studies in Hodgkin’s disease, 64
Endicott, K. M., 60
Endocarditis, bacterial, adhesion tests in, 151
Eosinophils
in brucellosis, 24
in normal bone marrow, 56
Epithelioid cells in brucellosis, 24
Erythroblasts, in duck, physiological study of, 75
Erythropoiesis, studies of, 42
calcium, 44
colchicine affecting, 53
liver extract affecting, 47
materials, 43
micro data, 62
plasma affecting, 49
in Ringer’s solution, 46
Ether anesthesia, effect on phagocytosis, 113
Filtration, effect on platelet agglutination, 191
Forteza-Bover, J., 64
Giant cells in brucellosis, 26
Gibson, John, 62
Glaser, Daniel, 161
Gramicidin, in preparation of leukocytes from peripheral blood, 88
Granulomas in brucellosis, 26
Gump, Hazel, 60
Haller, Evelyn, 108, 117
Heating, effect on platelet agglutination, 191
Hemograms of mice of C-57 brown and CFW strains, 60
Heparinized
blood
platelet-bacteria adhesion in, 145
stability of platelets in, 142
plasma, effect of platelets on, 161
Histiocytes in brucellosis, 24
Hodgkin’s disease, cytomorphological studies in, 64
Houlihan, Ralph, 142, 153, 170, 182
Hughes, Walter, 82
Kurloff body in leukocytes, 115
materials studied, 130
methods of study, 130
observations, 131
Leukoblasts in brucellosis, 24
Leukocytes
Kurloff body in, 125
from peripheral blood, preparation by gramicidin and lysolecithin, 88
separated from whole blood, by serum albumin, 82
Leydwecker, Ruth, 98
Liver extract, effect on erythropoiesis, 47
Lymph node punctures in Hodgkin’s disease, 67
Lymphadenogram
after radiotherapy, 66
of normal lymph node, 65

199
Lymphocytes in brucellosis, 24
in normal bone marrow, 56
Lyssolecithin, in preparation of leukocytes from peripheral blood, 88

Macrophages in brucellosis, 24
Megakaryocytes in brucellosis, 24
in normal bone marrow, 56
Metabolism, respiratory, determination of, 36
Metamyelocytes in brucellosis, 24
Miliary tuberculosis, bone marrow findings in, 27
Monocytes in brucellosis, 24
in normal bone marrow, 56
Myeloblasts in brucellosis, 24
in normal bone marrow, 56
Myelocytes in brucellosis, 24
in normal bone marrow, 56
Myelograms of mice of C-57 brown and CFW strains, 60

Neutrophils in brucellosis, 24
Normoblasts in brucellosis, 24
in normal bone marrow, 56
Orthochromatic normoblasts in brucellosis, 24
Oxalated blood, platelet-bacteria adhesion in, 145

Peripheral blood leukocytes from, gramicidin and lyssolecithin in preparation of, 88
picture in brucellosis, 23
Phagocytosis, in normal and anemic blood, 98
in mice, 117
in rats, 208
Placenta juice blood-coagulating activity of, 149
effect on platelet-bacteria adhesion, 145
Plasma cells in brucellosis, 24
in normal bone marrow, 56
effect on erythropoiesis, 49
heparinized, effect of platelets on, 161
purified fractions, effect on platelet-bacteria adhesion, 146
Platelet-bacteria adhesion, 142, 144
action of bacterial metabolic products on, 151
in citrated blood, 145
with clumped platelets, 149
in dogs, 155
blood-coagulating activity of tissue juices, 149
effect of human tissue juices, 148
effect of placenta juice, 145
effect of purified plasma fractions, 146
in heparinized blood, 145
in oxalated blood, 145
Platelets agglutination, 152, 182
citrate platelets, 189
darkfield observations, 192
effect of filtration, 191
effect of heating, 191
factors affecting, 183
pig platelets, 190
preparation of suspension, 182
saline platelets, 189
by serum and plasma from same subject, 187
technic of test, 183
various types, 185
effect on surface tension of saline solutions and heparinized plasma, 161
isolation from human and dog blood, 170
blood anticoagulant method, 171
blood saline method, 172
darkfield observations, 178
effect of storage on, 177
obtaining blood, 161
preparation of suspension, 161
studies on, 161, 170, 171
tensiometer readings, 162
Plum, Claus Munk, 33, 42
Polychromatic normoblasts in brucellosis, 24
Promyelocytes in brucellosis, 24
Pronormoblasts in brucellosis, 24
Radiotherapy, lymphadenogram after, 66
Respiratory metabolism, determination of, 36
Reticulocytes, in normal bone marrow, 56
Reticulo-endothelial cells in brucellosis, 19
in normal bone marrow, 56
Rigdon, R. H., 75
Ringer’s solution, erythropoiesis in, 46
Rostorfer, H. H., 75
Saline platelets, agglutinability of, 189
solutions, effect of platelets on, 161
Sarcoidosis, bone marrow findings in, 27
Schwartz, Samuel, 88
Serum albumin, separating leukocytes from whole blood, 82
Silberbach, Ingelore, 88
Singer, Thomas, 88
Smith, Emily, 125
Spies, Tom, 98
Spink, Wesley, 7
Sternal bone marrow, in brucellosis, 9
puncture, 54
collection of samples, 54
examination of samples, 55
material, 54
Sundberg, Dorothy, 7
Tensiometer readings in blood platelet studies, 161
Thrombopenia, in bacterial infections, 151
Tissue juices blood-coagulating activity of, 149
effect on platelet-bacteria adhesion, 148
Tuberculosis, miliary, bone marrow findings in, 27
Vallee, Bert, 82
Vaughan, Stuart, 54
