NATIONAL BLOOD CLUB

The National Blood Club will meet at the Chalfonte-Haddon Hall in Atlantic City, N. J., at 8:00 P.M. on Sunday, May 3, 1964. The subject under discussion will be "Hematologic Implications of the Shwartzman Phenomenon and Endotoxin Shock." The program:

1. Opening Remarks, Dr. Donald G. McKay, Department of Pathology, Columbia University, New York, N. Y.

2. Influence of Bacterial Endotoxin on the Hemostatic Mechanism—in Vitro and in Vivo, Dr. Herbert L. Horowitz, The Bronx-Lebanon Medical Center, New York, N. Y.

3. The Reticuloendothelial System, Antigen-Antibody Complexes, and the Generalized Shwartzman Reaction, Dr. Leung Lee, Department of Pathology, New York University, New York, N. Y.

4. Thrombosis, Epsilon Amino Caproic Acid, Pregnancy and the Generalized Shwartzmann Reaction, Dr. William Margaretten, Department of Pathology, Columbia University, New York, N. Y.

5. A Partial Synthesis of the Generalized Shwartzmann Reaction, Dr. Donald McKay.

BRAUNSTEINER APPOINTMENT

Dozent Herbert Braunsteiner from the Second University Clinic, Internal Medicine (Professor Dr. Karl Fellinger), Vienna, was appointed Clinical Professor and Chief of the Department of Medicine of the University of Innsbruck, succeeding Professor Anton Hittmair. Professor Braunsteiner was associated for two years with the Institut de Recherche sur le Cancer (Chief, the late Professor Oberling) and spent one year at the Sloan-Kettering Institute in New York as a Research Fellow.
