CONTENTS

NOTE: Of the twelve issues of BLOOD published in 1948, six were dedicated to Dr. George Richards Minot as part of an Anniversary Volume in his honor. These issues, composed of papers by his colleagues, co-workers and former associates (together with a concluding issue to appear in February 1949), are to be collected in volume form early in 1949 at the "George R. Minot Symposium on Hematology." The issues dedicated to Dr. Minot are indicated in the following Contents by the notation: (Minot Anniversary Issue).

No. 1
(Minot Anniversary Issue)

Foreword ........................................C. Sidney Burwell 5
Treatment of Pernicious Anemia by a Special Diet (A Reprint)
George R. Minot and William P. Murphy 8
Pernicious Anemia from Addison to Folic Acid ..............Russell L. Haden 22
Twenty Years of Liver Therapy ................................William P. Murphy 32
Pernicious Anemia, Nutritional Macrocytic Anemia, and Tropical Sprue
Lucy Wills 36

The Relation of Therapy in Pernicious Anemia to Changes in the Nervous
System. Early and Late Results in a Series of Cases Observed for Periods
of not Less than Ten Years, and Early Results of Treatment with Folic
Acid ..............................................Frank H. Bethell and Cyrus C. Sturgis 57

The Development and Progression of Subacute Combined Degeneration of the
Spinal Cord in Patients with Pernicious Anemia Treated with Synthetic
Pteroylglutamic (Folic) Acid .......J. F Ross, H. Belding and B. L. Paegel 68

Pernicious Anemia Caused by Diphyllobothrium Latum, in the Light of
Recent Investigations ........................................Bertel von Bonsdorff 91

Study of the Myelogram (Bone Marrow Puncture) in Pernicious Anemia and
the Problem of the Megaloblast ..................Jacques Mallarmé 103

Refractory Megaloblastic Anemia ...............L. S. P. Davidson 107

Further Observations on the Specificity of the Folic Acid Molecule
Tom D. Spies, Guillermo Garcia Lopez, Robert E. Stone, Fernando Milanes,
Robert O. Brandenburg and Tomas Aramburu 121

Case Report: A Case of Pernicious Anemia Requiring Enormous Amounts of
Liver Especially by Mouth over Twenty Years ..............Roger I. Lee 127
CONTENTS

No. 2

The Schoenlein-Henoch Syndrome of Vascular Purpura...........Eli Davis 129
Hyperprothrombinemia Induced by Vitamin K in Human Subjects with
Normal Liver Function...........Paul N. Unger and Shepard Shapiro 137
A Modification of the Waugh-Ruddick Test for Increased Coagulability of
the Blood, and Its Application to the Study of Postoperative Cases
Seymour B. Silverman 147
In Vitro Study of Bone Marrow. III. Erythropoiesis In Vitro of Sternal
Marrow from Cases of Pernicious Anemia and Lymphatic Leukosis under
Therapy.....Johannes Clemmesen, Tage Espersen and Claus Munk Plum 155
Studies on Bone Marrow In Vitro. III. The Effect of Anoxia and Hyperoxia
on Explanted Bone Marrow........A. Rosin and M. Rachmilewitz 165
Electron Microscope Studies of Blood Cells
John W. Re buck and Helen L. Woods 175
Case Report: Aplastic Anemia; Secondary to Gold Therapy
William J. FitzPatrick and Steven O. Schwartz 192
Method: Spineus Process Puncture. A Simple Clinical Approach for Obtaining
Bone Marrow.............................J. Philip Loge 198
Adolfo Ferrata (188o-1946)........................................M. Volterra 205
Editorial: Marrow Biopsy Technics.................................209
Abstracts.................................................................211
News and Views......................................................223
Book Review.........................................................229

No. 3

Congenital Hemolytic Jaundice. The Pathogenesis of the "Hemolytic Crisis"
Paul A. Owren 231
Studies on the Pancytopenia of Kala-Azar
Captain George E. Cartwright, Hui-Lan Chung and An Chang 249
The Effects of Estrogens on the Bone Marrow of Adult Female Dogs
Roger C. Crafts 276
The Frequency of Megakaryocytes in Autopsy Sections
Robert Brill and M. M. Halpern 286
Femoral Bone Marrow Biopsy in the Albino Rat
D. G. Cameron and G. M. Watson 292
The Occurrence and Significance of "Motile" Erythrocytes in Human Blood
and Marrow in Anemic States.........................Paul H. Ralph 295
Case Report: Ulcers of the Leg in Mediterranean Disease
J. Earle Estes, Eugene M. Farber and J. M. Stickney 302
Editorial: The Hemolytic Crisis........................................307
Abstracts.................................................................309
News and Views......................................................324
Book Review.........................................................328
CONTENTS

No. 4

(Minot Anniversary Issue)

Clinical Significance of Cardiac and Respiratory Adjustments in Chronic Anemia. Herrman L. Blumgart and Mark D. Altschule 329

Irreversible Toxic "Inclusion Body" Anemia. A Rarely Recognized Syndrome; Clinical and Experimental Studies

M. H. Fertman and Charles A. Doan 349

Blood Response and Nitrogen Balance Following Liver Extract

Randolph West 361

Thomas Hale Ham, Shu Chu Shen, Eleanor M. Fleming and W. B. Castle 373

The Mechanism of Transplacental Isoimmunization. Philip Levine 404

Erythroblastosis Fetalis in Negroid Infants. A. S. Wiener and I. B. Wexler 414

Autohemagglutinins and Hemolysins with Hemoglobinuria and Acute Hemolytic Anemia, in an Illness Resembling Infectious Mononucleosis

Laurence B. Ellis, Oscar J. Wollenman and Richard P. Stetson 419

Primary Nonfamilial Hemolytic Anemia. J. M. Stickney and Frank J. Heck 431

The Genetic Relation and Clinical Differentiation of Cooley’s Anemia and Cooley’s Trait. Geneva A. Daland and Maurice B. Strauss 438

Study of Thalassemia Minor in Three Generations of an Italian Family

Robert W. Heinle and Margaret Ruth Read 449

Prophylaxis of Hookworm Anemia-Deficiency Disease

W. O. Cruz and R. Pimenta de Mello 457

A Study of Sickling of Young Erythrocytes in Sickle Cell Anemia

Janet Watson 465

No. 5

(Minot Anniversary Issue)

The Span of Life of the Red Blood Cell. Winifred Ashby 486

Studies on Free Erythrocyte Protoporphyrin, Plasma Iron and Plasma Copper in Normal and Anemic Subjects

G. E. Cartwright, C. M. Huguley, Jr., Helen Ashenbrucker, Jane Fay and M. M. Wintrobe 501

Studies in Iron Transportation and Metabolism. VI. Absorption of Radioactive Iron in Patients with Fever and with Anemias of Varied Etiology

Reubenia Dubach, Sheila T. E. Callender and Carl V. Moore 526
CONTENTS

Osmometric Behavior of Normal and Abnormal Human Erythrocytes ................................. George M. Guest .......................... 541

A Method for Determining the Form of the Distribution of Red Cell Resistances to Simple Hemolysins ...................... Eric Ponder .................. 556

The Hemoglobin of Healthy College Undergraduates and Comparisons with Various Medical, Social, Physiologic and Other Factors ......................... Clark W. Heath .................. 566

Studies of the Staphylococagulase Reaction: Nature and Properties of a Plasma Activator and Inhibitor ...................... Melvin H. Kaplan and Wesley W. Spink ........ 573

Some Hematologic Effects of Irradiation ...................... William Bloom and Leon O. Jacobson .................. 586

The Effect of Radiation on Hemopoiesis. Is There an Indirect Effect? ...................... John S. Lawrence, William N. Valentine and Andrew H. Dowdy ........ 593

Normal Blood Counts in Different Seasons ................................. J. Engelbreth-Holm and As. Videbaek .......... 612

No. 6

Exogenous Hemochromatosis Resulting from Blood Transfusions ................................. Steven O. Schwartz and Sunoll A. Blumenthal ........ 617

Histochemical Methods Applied to Hematology ................................. Jack J. Rheingold and George B. Wislocki ........ 641

Clotting of Plasma and Silicone Surfaces ................................. Thomas B. Patton, Arnold G. Ware and Walter H. Seegers ........ 656

Determination of the Number of Erythrocytes, Volume of Packed Red Cells, Hemoglobin and Other Hematologic Standards in Mexico City (Altitude: 7,457 Feet). Study Made on Two Hundred Healthy Persons ........ 660

Javier Robles Gil and Diego González Terán ........ 660

The Demonstration and Characterization of the Anti-d Agglutinin and Antigen Predicted by Fisher and Race ................................. Sol Haberman, Joseph M. Hill, Bruce W. Everist and J. W. Davenport, Jr. ........ 682

The Chromosome Frequencies in England ................................. R. R. Race, A. E. Mourant, Sylvia D. Lawler and Ruth Sanger ........ 689

Distribution of the Rh Types in São Paulo (Brazil) ................................. F. Ottensooser, C. S. Lacaz, H. C. Ferreira and O. Mellone ........ 696

Editorial: Folic Acid, Pernicious Anemia and Pendulums ........ 699

Abstracts ................................................................. 703

Convention Notes, International Society of Hematology, 1948 ................................. 720

Book Reviews ................................................................. 728

No. 7

Relation of Adrenal Cortical Hormone to Lymphoid Tissue and Lymphocytes ................................. William N. Valentine, Charles G. Craddock, Jr., and John S. Lawrence ........ 729

Changes in Circulating Leukocytes Induced by the Administration of Pituitary Adrenocorticotropic Hormone (ACTH) in Man ................................. A. Gorman Hills, Peter H. Forsham and Clement A. Finch ........ 755

The Blood Picture in Addison's Disease ................................. José Báez-Villaseñor, Charles E. Rath and Clement A. Finch ........ 769
