CONTENTS

Letter From the Editor .................................................. 1

Central Nervous System Complications in Patients With Diffuse
Histiocytic and Undifferentiated Lymphoma: Leukemia Revisited
Paul A. Bunn, Jr., Philip S. Schein, Peter M. Banks,
and Vincent T. DeVita, Jr. ............................................ 3

Terminal Deoxynucleotidyl Transferase Activities in Human Blood
Leukocytes and Lymphoblast Cell Lines: High Levels in Lympho-
blast Cell Lines and in Blast Cells of Some Patients With Chronic
Myelogenous Leukemia in Acute Phase . . . . . . . . . . . . . . . . P. S. Sarin, P. N. Anderson,
and R. C. Gallo .................................................. 11

The Fate of Thymic Radioactivity After Local Labeling With
123Iododeoxyuridine .......... J. A. Laissue, A. D. Chanana, H. Cottier,
E. P. Cronkite, and D. D. Joel ....................................... 21

Matching of Histocompatibility (HL-A) Antigens for Platelet Transfusion
Kamal K. Mittal, E. Alannah Ruder, and David Green ............................................ 31

The Binding of Human and Bovine Thrombin to Human Platelets
Marc A. Shuman, Douglas M. Tollefsen, and Philip W. Majerus ........... 43

Platelet Retention in Glass Bead Columns: Adhesion to Glass and
Subsequent Platelet–Platelet Interactions ................. Jean McPherson
and Marjorie B. Zucker ............................................... 55

G-Banding Analysis of Complex Aneuploidy in Multiple Myeloma Bone
Marrow Cells .......................................................... Preben Philip and Aage Drivsholm
.......................................................... 69

Deficiency of κ- or λ-type Immunoglobulins ................. Silvio Barandun,
Andreas Morell, Frantisek Skvaril, and Alfred Oberdorfer ........... 79

The Specificity of Heterophile Antibodies in Patients and Healthy Donors
With No or Minimal Signs of Infectious Mononucleosis
Charles A. Horwitz, Werner Henle, Gertrude Henle, Herbert Polesky,
Harold Wexler, and Patrick Ward .................................. 91

Hb Leslie, an Unstable Hemoglobin Due to Deletion of Glutaminyl
Residue β 131 (H9) Occurring in Association With βα-Thalassemia,
HbC, and HbS .......... C. L. Lutcher, J. B. Wilson, Marsha E. Gravely,
Paula D. Stevens, Clara J. Chen, J. G. Lindeman, S. C. Wong,
A. Miller, M. Gottleib, and T. H. J. Huisman (Continued on following page) 99
(Contents continued)

Globin Chain Synthesis in HbD (Punjab)-β-Thalassemia

Ronald F. Rieder 113

Hybrid Erythrocytes for Membrane Studies in Sickle Cell Disease

Margaret R. Clark and Stephen B. Shohet 121

Micropinocytosis of Transferrin by Developing Red Cells: An Electron-microscopic Study Utilizing Ferritin-conjugated Transferrin and Ferritin-conjugated Antibodies to Transferrin

Albert L. Sullivan, Joseph A. Grasso, and Lewis R. Weintraub 133

Hemin Reversal of Benzene-induced Inhibition of Reticulocyte Protein Synthesis …Frank J. Forte, Howard S. Cohen, Judith Rosman, and Michael L. Freedman 145

Erythropoiesis-inhibiting Factor(s) (EIF): Methodologic Studies

Rolf Lindemann 155
