CONEFRANTS
Factor XI Activity and Factor XI Antigen in Homozygous and Heterozygous Factor XI Deficiency .................. Abraham Rimon, Sandra Schiffman, Donald I. Feinstein, and Samuel I. Rapaport 165
Decreased Nucleotide and Serotonin Storage Associated With Defective Function in Chediak–Higashi Syndrome Cattle and Human Platelets Thomas G. Bell, Kenneth M. Meyers, David J. Prieur, Anthony S. Fauci, Sheldon M. Wolff, and George A. Padgett 175
Phospholipid Transfer Between Plasma and Platelets In Vitro J. Heinz Joist, Georgina Dolezel, John V. Lloyd, and J. Fraser Mustard 199
Heterogeneity of Immunologic Markers and Surface Morphology in Childhood Lymphoblastic Lymphoma ............ Elaine S. Jaffe, Raul C. Braylan, Michael M. Frank, Ira Green, and Costan W. Berard 213
Further Characterization of the Circulating Cell in Chronic Lymphocytic Leukemia ............ Edward F. Schultz, Stephen Davis, and Arnold D. Rubin 223
Spinal Cord Disease in Hereditary Spherocytosis: Report of Two Cases With a Hypothesized Common Mechanism for Neurologic and Red Cell Abnormalities ............ Shaun R. McCann and Harry S. Jacob 259
The Conformational Requirements for the Mechanical Precipitation of Hemoglobin S and Other Mutants ............. Eugene F. Roth, Jr., Danek Elbaum, Robert M. Bookchin, and Ronald L. Nagel 265
Molecular and Cellular Effects of Antisickling Concentrations of Alkylureas ....... Danek Elbaum, Eugene F. Roth, Jr., Gertrude Neumann, Ernst R. Jaffé, Robert M. Bookchin, and Ronald L. Nagel 273
(Continued on following page)
Fetal Hemopoiesis in Diffusion Chamber Cultures. III. The Effect of Neutropenia. Michel Symann, Peter Quesenberry, Anna Fontebuoni, Donald Howard, Marie Ryan, and Frederick Stohlman, Jr. 283

A Diffusible Stimulator of Eosinophilopoiesis Produced by Lymphoid Cells as Demonstrated With Diffusion Chambers. Alan M. Miller and Michael P. McGarry 293

Evidence for Early Recruitment of Granulocyte Precursors During High-Dose Methotrexate Infusions in Mice. Herbert M. Pinedo, Bruce A. Chabner, Daniel S. Zaharko, and Joan M. Bull 301

The Biochemical Basis of Nitroblue Tetrazolium Reduction in Normal Human and Chronic Granulomatous Disease Polymorphonuclear Leukocytes. Robert L. Baehner, Laurence A. Boxer, and Jacqueline Davis 309

osmotic fragility

In just 3½ minutes, the Fragiligraph records and measures the fragility of erythrocytes. In just 7 minutes, the Fragiligraph records and measures the fragility of leukocytes. Additionally, an adaptor is being made available which determines platelet aggregation—eliminating the need for a separate costly instrument for this procedure alone. All completely automatic, all measured in minutes, all read at a glance. And all in one instrument, the Fragiligraph. In present use at an impressive array of clinical and research centers, the Fragiligraph is now recognized as a valued adjunct in such broad spectrum areas as: Blood Preservation and Survival, Pediatrics, Oncology; Radiation, Pressurization, Kidney Dialysis; Mechanical Trauma and Toxicological Studies, among others. For elaborated details on the above, write to us and receive all 35 of the published current literature. Unless you’re not interested in rapid automated tests for RBC or WBC osmotic fragility. Or platelet aggregation. And haven’t read this ad.
