CONTENTS

A Simplified In Vitro Classification for Prognosis in Adult Acute Leukemia: The Application of In Vitro Results in Remission-predictive Models ....Gary Spitzer, Karel A. Dicke, Edmund A. Gehan, Terry Smith, Kenneth B. McCredie, Barthel Barlogie, and Emil J Freireich 795

Monocyte-mediated Antibody-dependent Cellular Cytotoxicity: A Clinical Test of Monocyte Function ............David G. Poplack, Guy D. Bonnard, B. J. Holiman, and R. Michael Blaese 809

Fetal Erythropoiesis Following Bone Marrow Transplantation Blanche P. Alter, Joel M. Rappeport, Titus H. J. Huisman, Walter A. Schroeder, and David G. Nathan 843

Steroids and Hematopoiesis. III. The Response of Granulocytic and Erythroid Colony-forming Cells to Steroids of Different Classes Jack W. Singer and John W. Adamson 855

Kinetics of Mobilization of Neutrophils and Their Marrow Pool in Protein-Calorie Deficiency .................A. K. Suda, Meera Mathur, Kumudini Deo, and M. G. Deo 865

Phosphorylation in Erythrocyte Membranes From Abnormally Shaped Cells..............Alfred C. Greenquist and Stephen B. Shohet 877

Human Red Cell Protein Kinase in Normal Subjects and Patients With Hereditary Spherocytosis, Sickle Cell Disease, and Autoimmune Hemolytic Anemia .................E. Beutler, E. Guinto, and C. Johnson 887

Stabilization of the Shape of Sickled Cells by Calcium and A23187 Margaret R. Clark, Alfred C. Greenquist, and Stephen B. Shohet 899

Total Folate Binding Capacity of Normal Human Plasma, and Variations in Uremia, Cirrhosis, and Pregnancy .................Neville Colman and Victor Herbert 911

(Continued on following page)
Characterization of Human Anti-Factor VIII Antibodies Purified by Immune Complex Formation........J. M. Lavergne, Dominique Meyer, and H. Reisner 931
Fitzgerald Factor (High Molecular Weight Kininogen) Clotting Activity in Human Plasma in Health and Disease in Various Animal Plasmas ....Hidehiko Saito, George Goldsmith, and Robert Waldmann 941
Brief Communication: Evidence Suggesting the Regulation of Coagulation Factor Levels in Rabbits by a Transferable Plasma Agent ........Ellen W. Friedman, Margaret Karpatkin, and S. Karpatkin 949
In Memoriam: Robert Inslee Weed ............................................ 955

DON'T READ THIS AD
(If you're not interested in RBC or WBC

osmotic fragility

or Platelet Aggregation)
In just 3½ minutes, the Fragiligraph records and measures the fragility of erythrocytes. In just 7 minutes, the Fragiligraph records and measures the fragility of leukocytes. Additionally, an adaptor is being made available which determines platelet aggregation—eliminating the need for a separate costly instrument for this procedure alone. All completely automatic, all measured in minutes, all read at a glance. And all in one instrument, the Fragiligraph.
In present use at an impressive array of clinical and research centers, the Fragiligraph is now recognized as a valued adjunct in such broad spectrum areas as: Blood Preservation and Survival, Pediatrics, Oncology; Radiation, Pressurization, Kidney Dialysis; Mechanical Trauma and Toxicological Studies, among others. For elaborated details on the above, write to us and receive all 35 of the published current literature.
