Gamma Heavy Chain Disease: Clinical Aspects and Characterization of a Deleted, Noncovalently Linked γ1 Heavy Chain Dimer (BAZ)
Guy B. Faguet, Betty P. Barton, Linda L. Smith, and Fred A. Garver 495

Brief Communication: Blood Viscosity in Waldenström Macroglobulinemia
Malcolm R. MacKenzie and Thomas K. Lee 507

One Hundred Patients With Acute Leukemia Treated by Chemotherapy, Total Body Irradiation, and Allogeneic Marrow Transplantation
E. Donnall Thomas, C. Dean Buckner, Meera Banaji, Reginald A. Clift, Alexander Fefer, Nancy Flournoy, Brian W. Goodell, Robert O. Hickman, Kenneth G. Lerner, Paul E. Neiman, George E. Sale, Jean E. Sanders, Jack Singer, Mary Stevens, Rainer Storb, and Paul L. Weiden 511

Ultrastructural Cytochemical Analysis of Blastic Transformation of Chronic Myelocytic Leukemia
Pimpa Palakavongs, Saul Teichberg, Vincent Vinciguerra, Thomas J. Degnan, and Pairojana Sinlaratana 535

Ph1-positive Childhood Leukemias: Spectrum of Lymphoid-Myeloid Expressions
Edwin N. Forman, Teresita Padre-Mendoza, Peter S. Smith, Barbara E. Barker, and Patricia Farnes 549

Brief Communication: Treatment of Juvenile Chronic Myeloid Leukemia With Sequential Subcutaneous Cytarabine and Oral Mercaptopurine
J. S. Lilleyman, J. F. Harrison, and J. A. Black 559

Systemic Mastocytosis in a Patient With Polycythemia Vera Treated With Radioactive Phosphorus
James W. Eagan, Jr., Kenneth L. Baughman, Stanley Miller, C. Lockard Conley, and Joseph C. Eggleston 563

Stimulation by Human Placental Conditioned Medium of Hemopoietic Colony Formation by Human Marrow Cells
Antony W. Burgess, Elizabeth M. A. Wilson, and Donald Metcalf 573

cGMP Stimulation of Stem Cell Proliferation
A. K. Oshita, G. Rothstein, and G. Lonngi 585

Colony Formation In Vitro by Mouse Blood Monocytes
Hsiu-san Lin 593

Cell Size and Palmitate-l-14C Turnover of Rabbit Marrow Fat
Sidney Trubowitz and Ambika Bathija 599

Carriers With Excessively Low Factor VIII Procoagulant Activity (VIII AHF): A Study of Two Unrelated Families With Mild Hemophilia A
M. Elaine Eyster, Roger L. Ladda, and Herbert S. Bowman 607
Demonstration and Mode of Action of an Inhibitor for Activated Hageman Factor (Factor XIIa) of the Intrinsic Blood Coagulation Pathway From Schistosoma mansoni

Victor C. W. Tsang and Raymond T. Damian 619

Significance of the Intact Polypeptide Chains of Human Fibrinogen in ADP-induced Platelet Aggregation

S. Niewiarowski, A. Z. Budzynski, and B. Lipinski 635

Effect of Aspirin on Thrombogenesis and on Production of Experimental Aortic Valvular Streptococcus viridans Endocarditis in Rabbits

Matthew E. Levison, Jaime Carrizosa, Deja Tanphaichitra, Paul K. Schick, and Walter Rubin 645

Circulation of Donor Lymphocytes After Blood Transfusion in Man

Geraldine P. Schechter, Jacqueline Whang-Peng, and William McFarland 651

Erythrocyte Membrane Plaques From Rats With Magnesium Deficiency

Ronald J. Elin and Henry K. Tan 657

SPECIAL DEPARTMENTS

Correspondence: “Apheresis” or “Pheresis”; Bone Marrow Transplantation in Congenital Hypoplastic Anemia; Bone Marrow Transplantation in Congenital Hypoplastic Anemia: Reply; Erythrocyte γ-Glutamyl Transpeptidase; Absence of γ-Glutamyl Transpeptidase and the Role of GSSG Transport in the Turnover of GSH in Erythrocytes
