CONTENTS

Health of the Intensively Treated Hemophiliac, With Special Reference to Abnormal Liver Chemistries and Splenomegaly. Peter H. Levine, Bernard A. McVerry, Brian Attock, and Katharine M. Dormandy

Immunoochemical Characterization of a Polyclonal Human Antibody to Factor IX. Howard M. Reisner, Harold R. Roberts, Steven Krumholz, and William J. Yount

Unique Pattern of Fibrinogen Cleavage by Human Leukocyte Proteases. Sophie B. Bilezikian and Hymie L. Nossel

Intracellular Enzymes of Collagen Biosynthesis in Human Platelets. Henrik Anttinen, Leena Tuderman, Aarne Oikarinen, and Kari I. Kivirikko

Shape and Cytoplasmic Filaments in Control and Lidocaine-treated Human Platelets. V. Nachmias, J. Sullender, and A. Asch

Parallel Tubular Arrays in Severe Combined Immunodeficiency Disease: An Ultrastructural Study of Peripheral Blood Lymphocytes. Claire M. Payne, James F. Jones, Otto F. Sieber, Jr., and Vincent A. Fulginiti

Effect of Immunosuppressive Drugs on T and B Lymphocytes in Guinea Pigs. Alan Winkelstein

Chronic Granulocytic Leukemia: Cytogenetic Conversion of the Bone Marrow With Cycle-specific Chemotherapy. R. V. Smalley, J. Vogel, C. M. Huguley, Jr., and D. Miller

Leukemia-associated Antigens Detected by a Nonhuman Primate Antiserum to a Ph¹⁺ Myelogenous Leukemia Cell Line. Bismarck B. Lozzio, Carmen B. Lozzio, Stephen Krauss, Carl J. Wust, and Anthony Girardi

(Continued on following page)
Endoplasmic Reticulum-associated Structures in Lymphocytes From Patients With Chronic Lymphocytic Leukemia.................S. Stefani, S. Chandra, R. Schrek, H. Tonaki, and W. H. Knospe 125
Humoral Regulation of Monocytopoiesis During the Early Phase of an Inflammatory Reaction Caused by Particulate Substances Dick van Waarde, Elizabeth Hulsing-Hesselink, Lodewijk A. Sandkuyl, and Ralph van Furth 141
Effect of Procaine HCl on ATP: Calcium-dependent Alterations in Red Cell Shape and Deformability....................J. Palek, A. Liu, D. Liu, L. M. Snyder, N. L. Fortier, G. Njoku, F. Kiernam, D. Funk, and T. Crusberg 155
Hemoglobin Synthesis in Siderocytes of Flexed-tailed Mutant (f/f) Fetal Mice..........................David H. K. Chui, George D. Sweeney, Margaret Patterson, and Elizabeth S. Russell 165
SPECIAL DEPARTMENTS
Correspondence: Surface Immunoglobulins in Lymphocytic Leukemias: Comment and Reply; Acute Lymphoblastic Leukemia in Persons Over the Age of 30 yr in the Middle East: Comment and Reply; Early Treatment of Bleeding Episodes With 10 U/kg of Factor VIII ................... 179

osmotic fragility
In just 3½ minutes, the Fragiligraph records and measures the fragility of erythrocytes. In just 7 minutes, the Fragiligraph records and measures the fragility of leukocytes. Additionally, an adaptor is being made available which determines platelet aggregation—eliminating the need for a separate costly instrument for this procedure alone. All completely automatic, all measured in minutes, all read at a glance. And all in one instrument, the Fragiligraph.
In present use at an impressive array of clinical and research centers, the Fragiligraph is now recognized as a valued adjunct in such broad spectrum areas as: Blood Preservation and Survival, Pediatrics, Oncology; Radiation, Pressurization, Kidney Dialysis; Mechanical Trauma and Toxicological Studies, among others.
For elaborated details on the above, write to us and receive all 35 of the published current literature.

Unless you're not interested in rapid automated tests for RBC or WBC osmotic fragility. Or platelet aggregation. And haven't read this ad.
