CONTENTS

Purification and Characterization of Granulocytic Progenitor Cells (CFU-C) From Human Peripheral Blood Using Immunologic Surface Markers.................Carol M. Richman, Leonard Chess, and Ronald A. Yankee 1

Method for Enrichment of Proliferating Myeloid Cells From Normal and Leukemic Human Bone Marrow ..............J. Burghouts, A. M. Plas, J. Wessels, H. Hillen, J. Steenbergen, and C. Haanen 9

Marrow Culture in Diffusion Chambers in Rabbits. I. Effect of Mature Granulocytes on Cell Production...Roel Willemze, Richard I. Walker, John C. Herion, and Jeffress G. Palmer 21

Erythropoietic Insufficiency in Mice With Extramedullary Tumor Richard L. DeGowin, Frank M. Grund, and D. Phillip Gibson 33

Megakaryoblastic Acute Leukemia: Identification by the Ultrastructural Demonstration of Platelet Peroxidase ......J. Breton-Gorius, F. Reyes, G. Duhamel, A. Najman, and N. C. Gorin 45

Blood and Bone Marrow Findings in Angioimmunoblastic Lymphadenopathy ..........Gerassimos A. Pangalis, Edgar M. Moran, and Henry Rappaport 71

An Unusual Case of a Plasma Cell Neoplasm With an IgG3λ Myeloma and a γ3 Heavy Chain Disease Protein ..............Jay B. Adlersberg, Victor Grann, Dorothea Zucker-Franklin, Blas Frangione, and Edward C. Franklin 85

Antibody-dependent Lymphocyte-mediated Granulocyte Cytotoxicity in Man ..................Gerald L. Logue, Roger Kurlander, Peter Pepe, Walter Davis, and Harold Silberman 97

Editorial: Why Has the Autohemolysis Test Not Gone the Way of the Cephalin Flocculation Test?.........................E. Beutler 109

(Continued on following page)
Effect of Folate and Cobalamin Compounds on the Deoxyuridine Suppression Test in Vitamin B12 and Folate Deficiency
Jacqueline Zittoun, Jeanine Marquet, and Robert Zittoun

Antithrombin Pittsburgh: An α1-Antitrypsin Variant Causing Hemorrhagic Disease
Jessica H. Lewis, Richard M. Iannmarino, Joel A. Spero, and Ute Hasiba

Subcellular Localization and Purification of Platelet α1-Antitrypsin
Andranik Bagdasarian and Robert W. Colman

Effects of Porcine Plasmin on the Coagulation and Fibrinolytic Systems in Humans
Ulla Hedner, Lilian Johansson, and Inga Marie Nilsson

Effects of Short-Term Hypoxia on Platelet Counts of Mice
T. P. McDonald, Marilyn Cottrell, and Rose Clift

SPECIAL DEPARTMENTS

Correspondence: Central Nervous System Involvement in Patients With Histiocytic Lymphoma, Diffuse Type: Comment and Reply

osmotic fragility

In just 3½ minutes, the Fragiligraph records and measures the fragility of erythrocytes. In just 7 minutes, the Fragiligraph records and measures the fragility of leukocytes. Additionally, an adaptor is being made available which determines platelet aggregation—eliminating the need for a separate costly instrument for this procedure alone. All completely automatic, all measured in minutes, all read at a glance. And all in one instrument, the Fragiligraph.

In present use at an impressive array of clinical and research centers, the Fragiligraph is now recognized as a valued adjunct in such broad spectrum areas as: Blood Preservation and Survival, Pediatrics, Oncology; Radiation, Pressurization, Kidney Dialysis; Mechanical Trauma and Toxicological Studies, among others.

For elaborated details on the above, write to us and receive all 35 of the published current literature.

Unless you're not interested in rapid automated tests for RBC or WBC osmotic fragility, or platelet aggregation. And haven't read this ad.
