CONTENTS

Critical Review: The Thalassemia Syndromes ..................Arthur Bank 369

Humoral Factors in Aplastic Anemia: Relationship of Liver Dysfunction to Lack of Serum Stimulation of Bone Marrow Growth In Vitro Judith E. Karp, Lee P. Schacter, and Philip J. Burke 397

Determinants of Fecal and Urinary Iron Excretion in Desferrioxamine-treated Rats ..........................Chaim Hershko 415

Intermittent Combination Chemotherapy With Adriamycin for Childhood Acute Lymphoblastic Leukemia: Clinical Results Stephen E. Sallan, Bruce M. Camitta, J. Robert Cassady, David G. Nathan and Emil Frei III 425

Multimarker Analysis of T-Cell Chronic Lymphocytic Leukemia Stanley M. Marks, Saul Yanovich, David S. Rosenthal, William C. Moloney, and Stuart F. Schlossman 435

Lymphocyte Receptors for Concanavalin A in Hodgkin Disease Alan C. Aisenberg, Sigmund Weitzman, and Barbara Wilkes 439

Human Eosinophilic Peroxidase: Role in Bactericidal Activity Regina Migler, Lawrence R. DeChatelet, and David A. Bass 445

Human Eosinophils: Purification and Cytotoxic Capability of Eosinophils From Patients With the Hypereosinophilic Syndrome Joseph E. Parrillo and Anthony S. Fauci 457

(Continued on following page)

Microscopic Platelet Size and Morphology in Various Hematologic Disorders ..........Zella Zeigler, Scott Murphy, and Frank H. Gardner 479

Endotoxin-induced Changes in Human Platelet Membranes: Morphologic Evidence .................Dianna H. Ausprunk and John Das 487

Effect of Molecular Modification on the Inhibition of Lymphocyte Blastogenesis by Cardiac Glycosides .................Bruce R. Gordon, George B. Segel, James K. Brennan, and Marshall A. Lichtman 497

Human Cell Lines That Elaborate Colony-stimulating Activity for the Marrow Cells of Man and Other Species ..............John F. DiPersio, James K. Brennan, Marshall A. Lichtman, and Burton L. Speiser 507

Concentration Gradient of Blood Stem Cells in Mouse Bone Marrow—An Open Question ..................M. A. Maloney, R. A. Lamela, M. J. Dorie, and H. M. Patt 521

Three Stages of Erythropoietic Progenitor Cell Differentiation Distinguished by a Number of Physical and Biologic Properties Connie J. Gregory and Allen C. Eaves 527

Fetal Erythropoiesis in Steel Mutant Mice. III. Defect in Differentiation from BFU-E to CFU-E During Early Development David H. K. Chui, Shuen-Kuei Liao, and Karen Walker 539

Effect of Protein Deprivation on Extrarenal Erythropoietin Production A. Anagnostou, S. Schade, J. Barone, and W. Fried 549

All manuscripts submitted for consideration for publication in BLOOD should be sent to:
Paul A. Marks, M.D., Editor
BLOOD
Columbia University College of Physicians and Surgeons
701 West 168th Street, New York, N.Y. 10032

Effective March 1, 1978, a processing fee of $30.00 must accompany each manuscript submitted for consideration for publication in BLOOD.

**osmotic fragility**

In just 3½ minutes, the Fragiligraph records and measures the fragility of erythrocytes. In just 7 minutes, the Fragiligraph records and measures the fragility of leukocytes. Additionally, an adaptor is being made available which determines platelet aggregation—eliminating the need for a separate costly instrument for this procedure alone. All completely automatic, all measured in minutes, all read at a glance. And all in one instrument, the Fragiligraph.

In present use at an impressive array of clinical and research centers, the Fragiligraph is now recognized as a valued adjunct in such broad spectrum areas as: Blood Preservation and Survival, Pediatrics, Oncology; Radiation, Pressurization, Kidney Dialysis; Mechanical Trauma and Toxicological Studies, among others.

For elaborated details on the above, write to us and receive all 35 of the published current literature.

Unless you’re not interested in rapid automated tests for RBC or WBC osmotic fragility. Or platelet aggregation. And haven’t read this ad.
