CONTENTS

Linkage and Gene Localization of Hereditary Spherocytosis (HS) 
W. J. Kimberling, R. A. Taylor, R. G. Chapman, and H. A. Lubs 859

Deletion of the Long Arm of Chromosome 20 [del(20)(q11)] in Myeloid Disorders ............Joseph R. Testa, Ann Kinnealey, Janet D. Rowley, David W. Golde, and David Potter 868

Adriamycin and Daunomycin Generate Reactive Oxygen Compounds in Erythrocytes ............Charles A. Henderson, Earl N. Metz, Stanley P. Balcerzak, and Arthur L. Sagone, Jr. 878

Purine Nucleoside Phosphorylase in Chronic Lymphocytic Leukemia (CLL) ...........M. Borgers, H. Verhaegen, M. De Brabander, J. De Cree, W. De Cock, F. Thoné, and G. Geuens 886

Effect of C3b Inactivator on Monocyte-bound C3-coated Human Erythrocytes ..........Alan D. Schreiber and Patricia B. McDermott 896

Correlation of Serum IgD Level With Clinical and Histologic Parameters in Hodgkin Disease .................Giorgio Corte, Anna M. Ferraris, John K. H. Rees, Antonio Bargellesi, and Frank G. J. Hayhoe 905

Expression and Specificity of FcγR Receptor Sites on Neoplastic Lymphocytes ....Christoph Huber, Hans Dieter Flad, Kenneth Nilsson, Hans Wigzell, Gert Michimayr, Heinrich Frischau, and Herbert Braunsteiner 911

Case Report: Leukemic Lymphosarcoma (LLS) With Monoclonal IgM: Idiotypic Specificity on the Cell Surface and in the Cytoplasm of Lymphosarcoma Cells ..............Susumu Sugai, Yuko Hirose, Yoshiteru Konaka, and Susumu Konda 922

Activation of Factor X by Factors IXa and VIII; A Specific Assay for Factor IXa in the Presence of Thrombin-activated Factor VIII 
Mae B. Hultin and Yale Nemerson 928

Autoimmune Cytotoxic Granulocyte Antibodies in Normal Persons and Various Diseases .................S. Ian Drew and Paul I. Terasaki 941

Red Cell Diphosphoglycerate Mutase. Immunochemical Studies in Vertebrate Red Cells, Including a Human Variant Lacking 2,3-DPG 
Larry Len Peterson 953

(Continued on following page)
Marrow Cell Egress: Specificity of the Site of Penetration Into the Sinus  
Jack K. Chamberlain and Marshall A. Lichtman 959

Release of Arachidonic Acid From Human Platelets. A Key Role for the  
Potentiation of Platelet Aggregability in Normal Subjects as Well as  
in Those With Nephrotic Syndrome ..........................Nobuhiko Yoshida  
and Nobuo Aoki 969

Coupled Amidolytic Assay for Factor VII: Its Use With a Clotting  
Assay to Determine the Activity State of Factor VII  
Uri Seligsohn, Bjarne Østerud, and Samuel I. Rapaport 978

Banding Studies on Chromosomes in Diffuse “Histiocytic” Lymphomas:  
Correlation of 14q+ Marker Chromosome With Cytology  
Shirou Fukuhara, Janet D. Rowley, Daina Variakojis,  
and Donald L. Sweet, Jr. 989

Atypical Lymphoid Leukemia in Ataxia Telangiectasia ............Ralph Levitt,  
Robert V. Pierre, William L. White, and Robert G. Siekert 1003

Purification and Some Properties of Colony-stimulating Factor From  
Normal Human Urine ............Kazuo Motoyoshi, Fumimaro Takaku,  
Hideaki Mizoguchi, and Yasusada Miura 1012

Postmitotic Marrow Neutrophils and Neutrophil Mobilization in Man:  
Role of the Spleen .......................K. A. Deubelbeiss and P. Roth 1021

Case Report: Acute Lymphoblastic Leukemia Followed by Chronic  
Myelocytic Leukemia ......Giovanna Tosato, Jacqueline Whang-Peng,  
Arthur S. Levine, and David G. Poplack 1033

Monoclonal IgG Anticoagulants Delaying Fibrin Aggregation in Two  
Patients With Systemic Lupus Erythematosus (SLE)  
Dennis K. Galanakis, Ellen M. Ginzler, and Senih M. Fikrig 1037

Variable Globin Chain Synthesis in Mouse Erythroleukemia Cells  
Blanche P. Alter and Sabra C. Goff 1047

Simple Electrophoretic System for Presumptive Identification of  
Abnormal Hemoglobins  
The International Committee for Standardization in Hematology 1058

Recommendations of a System for Identifying Abnormal Hemoglobins  
The International Committee for Standardization in Hematology 1065

Concise Report: Human T Lymphocyte Cell Line Producing  
Colony-stimulating Activity .........David W. Golde, Shirley G. Quan,  
and Martin J. Cline 1068

Concise Report: Sex Differences in the Antithrombotic Effects of Aspirin  
J. G. Kelton, J. Hirsh, C. J. Carter, and M. R. Buchanan 1073

SPECIAL DEPARTMENTS

Announcements ................................................................. 1077
Erratum .............................................................................. 1077
Information for Contributors ............................................. xxi
Advertisers’ Index ............................................................ xxxvii

Concise Reports of original investigations of scientific importance may now be eligible for rapid editorial review and decision (two weeks). For more information see Information for Contributors.

Please note that a processing fee of $30.00 must accompany each manuscript submitted for consideration for publication in BLOOD.

All manuscripts submitted for consideration for publication in BLOOD should be sent to:
Paul A. Marks, M.D., Editor
BLOOD

701 West 168th Street, New York, N.Y. 10032

Osmotic fragility

In just 3½ minutes, the Fragiligraph records and measures the fragility of erythrocytes. In just 7 minutes, the Fragiligraph records and measures the fragility of leukocytes. Additionally, an adaptor is being made available which determines platelet aggregation—eliminating the need for a separate costly instrument for this procedure alone. All completely automatic, all measured in minutes, all read at a glance. And all in one instrument, the Fragiligraph.

In present use at an impressive array of clinical and research centers, the Fragiligraph is now recognized as a valued adjunct in such broad spectrum areas as: Blood Preservation and Survival, Pediatrics, Oncology; Radiation, Pressurization, Kidney Dialysis; Mechanical Trauma and Toxicological Studies, among others.

For elaborated details on the above, write to us and receive all 35 of the published current literature.

Unless you’re not interested in rapid automated tests for RBC or WBC osmotic fragility. Or platelet aggregation. And haven’t read this ad.
