CONTENTS

Chronic Myeloid Leukemia With Permanent Disappearance of the Ph1 Chromosome and Development of New Clonal Subpopulations
A. Hagemeijer, E. M. E. Smit, B. Löwenberg, and J. Abels 1

Parallel Decrease of Erythrocyte Membrane Deformability and Spectrin Solubility at Low pH .........................Brian D. Smith and Paul L. La Celle 15

Fetal Hemoglobin (HbF) Synthesis in Baboons, Papio cynocephalus. Analysis of Fetal and Adult Hemoglobin Synthesis During Fetal Development.........................Joseph De Simone and Anne L. Mueller 19

Fibrinogen Bethesda III: A Hypodysfibrinogenemia ..Harvey R. Graalnick, Barry S. Coller, Joseph C. Fratantoni, and Jose Martinez 28

Antiheparin Proteins Secreted by Human Platelets. Purification, Characterization, and Radioimmunoassay ........Boguslaw Rucinski, Stefan Niewiarowski, Pranee James, Daniel A. Walz, and Andrei Z. Budzynski 47

Effects of Local Anesthetics on Human Platelets: Filopodial Suppression and Endogenous Proteolysis..............V. T. Nachmias, J. S. Sullender, and J. R. Fallon 63

The Direct Assay for Platelet-Associated IgG (PAIgG): Lack of Association Between Antibody Level and Platelet Size ...J. G. Kelton, P. B. Neame, J. Bishop, M. Ali, J. Gauldie, and J. Hirsh 73

Acquired Coagulation Inhibitor Delaying Fibrinopeptide Release Ewa Marciniak and Martha F. Greenwood 81

Circulating Factor IX Antigen-Inhibitor Complexes in Hemophilia B Following Infusion of a Factor IX Concentrate Scott H. Goodnight, Jr., Catherine W. Britell, Kirk D. Wuepper, and Bjarne Østerud 93

Growth In Vitro of Donor Marrow Cultured With Recipient Lymphocytes Predicts the Fate of Marrow Grafts in Transfused DLA-Identical Dogs ...............Beverly J. Torok-Storb, Rainer Storb, H. Joachim Deeg, Theodore C. Graham, Cathy Wise, Paul L. Wieden, and John W. Adamson 104

(Continued on following page)
Hemoglobin E Trait Reexamined: A Cause of Microcytosis and Erythrocytosis..............Virgil F. Fairbanks, Gerald S. Gilchrist, Bernadine Brimhall, John A. Jereb, and Edgar C. Goldston 109

Identification of Dihydropteridine Reductase in Human Platelets
Herbert T. Abezon, Carolyn Gorka, and G. Peter Beardsley 116

Ultrastructural Autoradiographic Study of the Uptake and Localization of d-Glucose-\(^{3}H\) ..............Dale N. Payne and G. Adolph Ackerman 122

Nuclear RNA Sequences Coding for \(\alpha\) and \(\beta\) Globins in Erythroid Cells: Evidence for Multiple Intermediate Molecules.....M. G. Farace, E. Ullu, A. Fantoni, G. B. Rossi, L. Cioe, and A. Dolei 134

Local Development of Mast Cells From Bone Marrow-Derived Precursors in the Skin of Mice..............K. Hatanaka, Y. Kitamura, and Y. Nishimune 142

Studies of the Terminal Stages of Hemoglobin Synthesis: I. Stimulation of Globin Chain Synthesis by Native Hemoglobin Subunits
Ronald N. Rubin, Samir K. Ballas, René Fischer, Kasper H. Winterhalter, and Edward R. Burka 148

Controlling the Production of Blood Cells..................Martin J. Cline and David W. Golde 157

SPECIAL DEPARTMENTS

Announcement........................................................................................................ 166

Information for Contributors .................................................................................. xxiii–xxiv

Advertisers Index.................................................................................................... xxxii

**Concise Reports** of original investigations of scientific importance may now be eligible for rapid editorial review and decision (two weeks). For more information see Information for Contributors.

Please note that a processing fee of $30.00 must accompany each manuscript submitted for consideration for publication in BLOOD.

All manuscripts submitted for consideration for publication in BLOOD should be sent to:
Paul A. Marks, M.D., Editor
