CONTENTS

Activation of the Guinea Pig Granulocyte NAD(P)H-Dependent Superoxide Generating Enzyme: Localization in a Plasma Membrane Enriched Particle and Kinetics of Activation

Harvey J. Cohen, Margaret E. Chovaniec, and Wayne A. Davies 355

Pretreatment Tumor Mass, Cell Kinetics, and Prognosis in Multiple Myeloma .......... Brian G. M. Durie, Sydney E. Salmon, and Thomas E. Moon 364

Ia Antigen Expression by Human Malignant Lymphomas: Correlation With Conventional Lymphoid Markers ........................................................ James P. Hapler, Daniel M. Knowles II, and Chang Yi Wang 373

Urinary Hydroxyproline Excretion in Myelofibrosis.... Jen C. Wang, Maung K. Aung, and Mark S. Tobin 383

Enzyme Histochemistry on Bone Marrow Biopsies: Reactions Useful in the Differential Diagnosis of Leukemia and Lymphoma Applied to 2-Micron Plastic Sections......................... Jay H. Beckstead and Dorothy F. Bainton 386

Cell Surface Antigens: Prognostic Implications in Childhood Acute Lymphoblastic Leukemia

Stephen E. Sallan, Jerome Ritz, John Pesando, Richard Gelber, Carmeline O'Brien, Suzanne Hitchcock, Felice Coral, and Stuart F. Schlossman 395

Cellular DNA Content as a Marker of Human Multiple Myeloma........ Jean Latreille, Barthel Barlogie, Gary Dosik, Dennis A. Johnston, Benjamin Drewinko, and Raymond Alexanian 403

Mitogen Requirements for the In Vitro Propagation of Cutaneous T-Cell Lymphomas

Adi F. Gazdar, Desmond N. Carney, Paul A. Bunn, Edward K. Russell, Elaine S. Jaffe, Geraldine P. Schechtner, and John G. Guccion 409

The Influence of Albumin and Calcium on Human Platelet Arachidonic Acid Metabolism

Marie J. Stuart, Jonathan M. Gerrard, and James G. White 418

Comparison of Two Direct Assays for Platelet-Associated IgG (PAIgG) in Assessment of Immune and Nonimmune Thrombocytopenia ..................... John G. Kelton, Alan R. Giles, Peter B. Neame, Peter Powers, Nina Hageman, and Jack Hirsh 424

The Inhibition of High and Low Molecular Weight Urokinase in Plasma..................... Genesio Murano, David Aronson, Lynne Williams, and Larry Brown 430

The Pharmacologic Effects of PGE, on Murine Lymphocytes .......... Alan Winkelstein and Vicki E. Kelley 437

Response to Endotoxin of Endotoxin-“Resistant” C3H/HeJ Mice: A Model for Study of Hematopoietic Control........................................ Sallie S. Boggs, Dane R. Boggs, and Robert A. Joyce 444

Identification and Separation of Secreted Platelet Proteins by Isoelectric Focusing. Evidence That Low-Affinity Platelet Factor 4 is Converted to β-Thromboglobulin by Limited Proteolysis

Stefan Niewiarowski, Daniel A. Walz, Pranee James, Boguslaw Rucinski, and Friedrich Kueppers 453

(Continued on following page)
(Contents continued)

Functional and Metabolic Studies of Polymorphonuclear Leukocytes in the Congenital Pelger-Huet Anomaly .......................... Christine A. Johnson, David A. Bass, Alberto A. Trillo, Melinda S. Snyder, and Lawrence R. DeChatelet 466

Neoplastic Human T-Cells Capable of Responding to Multiple Human Alloantigens Marian R. Rubenfeld, Richar L. Edelson, Lena M. Löfström, Carole L. Berger, and Dorothy Warburton 470

Pretreatment Flow Cytometry of DNA Content in Adult Acute Leukemia ...................... Gary M. Dosik, Barthel Barlogie, Terry L. Smith, Edmund A. Gahan, Michael J. Keating, Kenneth B. McCredie, and Emil J. Freireich 474

Fibrinolytic States in a Patient With Congenital Deficiency of α1-Plasmin Inhibitor .......... Nobuo Aoki, Yoichi Sakata, Michio Matsuda, and Keiko Tateno 483

Differential Regulation of Spleen Cell-Mediated Eosinophil and Neutrophil-Macrophage Production Stephen H. Bartelmez, William H. Dodge, and David A. Bass 489

Aggregation of Hemoglobin S and Hemoglobin C-Harlem With Nonsickle Hemoglobin in Concentrated Phosphate Buffer ......................... Kazuhiko Adachi, Tosho Asakura, and Elias Schwartz 494

The Effect of Trimethoprim/Sulfamethoxazole on Friend Erythroleukemia Cells S. E. Steinberg, C. L. Campbell, P. S. Rabinovitch, and R. S. Hillman 501

Thymidine as a Chemotherapeutic Agent: Sensitivity of Normal Human Marrow, Peripheral Blood T Cells, and Acute Nonlymphocytic Leukemia .................................................... Stephen B. Howell, Raymond Taetle, and John Mendelsohn 505

Mapping the α-Globin Genes in an Algerian HbH Patient and His Family ....................... E. Whitelaw, J. Pagnier, G. Verdier, T. Henri, J. Godet, and R. Williamson 511

CONCISE REPORTS

Use of Venom Coagglutin and Lyophilized Platelets in Testing for Platelet-Aggregating von Willebrand Factor .............................................. K. M. Brinkhous and M. S. Read 517

Elimination of Acute Myelogeneous Leukemic Cells From Marrow and Tumor Suspensions in the Rat With 4-Hydroperoxycyclophosphamide ...... Saul J. Sharkis, George W. Santos, and Michael Colvin 521

Quantification of Contact System Activation Using a Radiometric Assay for Activated Factor IX Rosalind M. Berkowitz and Yale Nemerson 528

Thymus-Dependent and Thymus-Independent Subpopulations of Intestinal Intraepithelial Lymphocytes: A Granular Subpopulation of Probable Bone Marrow Origin and Relationship to Mucosal Mast Cells ................................................................. Graham Mayrhofer 532
