Review: Towards Tumor Therapy With Interferons, Part II. Interferons: In Vivo Effects ..........Mathilde Krim

IgG+ Platelets in the Marmoset: Their Induction, Maintenance, and Survival .................N. Gengozian and Carla L. McLaughlin

Lysosomal Acid Esterase: Activity and Isoenzymes in Separated Normal Human Blood Cells

Granulocyte Aggregometry: A Sensitive Technique for the Detection of C5a and Complement Activation
Dale E. Hammerschmidt, Timothy K. Bowers, Carol J. Lammi-Keefe, Harry S. Jacob, and Philip R. Craddock

Severe Platelet Dysfunction in Hairy Cell Leukemia With Improvement After Splenectomy
Michael H. Rosove, Faramarz Naeim, Sylvia Harwig, and Jacob Zighelboim

The Influence of Vitamin E Quinone on Platelet Structure, Function, and Biochemistry
A. Chadwick Cox, Gundu H. R. Rao, Jonathan M. Gerrard, and James G. White

The Chronic Idiopathic Neutropenia Syndrome: Correlation of Clinical Features With In Vitro Parameters of Granulocytopoiesis .......................................................... Peter L. Greenberg, Beth Mara, Susan Steed, and Laurence Boxer

Explanation for Apparent Hypoxemia Associated With Extreme Leukocytosis: Leukocytic Oxygen Consumption ................................................................. Ram K. Chillar, Michael J. Belman, Mark Farbstein, with the technical assistance of Kirk McClelland

Hand-Mirror Lymphocytes in Infectious Mononucleosis ................. William J. Thomas, Kazue Yasaka, D. M. Strong, C. M. Woodruff, Sanford A. Stass, and Harold R. Schumacher

The Regulation of Hemopoiesis in Long-Term Bone Marrow Cultures. II. Stimulation and Inhibition of Stem Cell Proliferation .................... D. Toksöz, T. M. Dexter, B. I. Lord, E. G. Wright, and L. G. Lajtha

Effect of Peripheral Blood Mononuclear Cells From Aplastic Anemia Patients on the Granulocyte-Macrophage and Erythroid Colony Formation in Samples From Normal Human Bone Marrow In Vitro—A Cooperative Work ........................................... Fumimaro Takaku, Toshio Suda, Hideaki Mizoguchi, Yasusada Miura, Haruto Uchino, Kiyoyasu Nagai, Shigeo Kariyone, Akira Shibata, Taro Akabane, Takeo Nomura, and Tadashi Maekawa

Histiocytic Lymphoma Fifteen Years Following Remission of Acute Lymphoblastic Leukemia
Harvey Dosik, Robert Anon, Stanley L. Lee, Arthur C. Allen, and M. Krishnamurthy

Crystallloid-Containing Giant Granules in Leukemic Monoblasts .................................. Hanson B. Cowan, Richard T. Parmley, William M. Crist, Celestino J. Alvarez, and Nelwyn Polston

Comparison of the Hemagglutination Inhibition Assay Kit for Erythropoietin (ESF) With the Fetal Mouse Liver Cell Bioassay In Vitro
G. de Klerk, R. J. W. M. Vet, P. C. J. Rosengarten, and R. Goudsmit

A Rationale for Sequential High-Dose Chemotherapy of Leukemia Timed to Coincide With Induced Tumor Proliferation ................................. Philip J. Burke, William P. Vaughan, and Judith E. Karp

(Continued on following page)
Effect of Increased Maternal Hemoglobin Oxygen Affinity on Fetal Growth in the Rat
Robert P. Hebbel, Elaine M. Berger, and John W. Eaton 969

Suppression of Normal Granulopoiesis In Vitro by a Leukemia-Associated Inhibitor (LAI) of Acute and Chronic Leukemia ........................................ Tor Olofsson and Inge Olsson 975

Biochemical Characterization of a Leukemia-Associated Inhibitor (LAI) Suppressing Normal Granulopoiesis In Vitro ........................................ Tor Olofsson and Inge Olsson 983

Isolation of Hybrid Cell Clones That Contain Deletion and Non-Deletion Defects of Alpha-Thalassemia in Man .......................................................... A. Deisseroth, U. Bode, R. Lebo, A. Dozy, and Y. W. Kan 992

Inhibitory Effect of Glucagon on Erythropoiesis ........................................ J. P. Naets and M. Guns 997

Regulation of Oxygen Metabolism in Human Granulocytes: Relationship Between Stimulus Binding and Oxidative Response Using Plant Lectins as Probes........... Myron S. Cohen, Julia A. Metcalf, and Richard K. Root 1003

A New Improved Clinical Staging System for Multiple Myeloma Based on Analysis of 123 Treated Patients .................................................. Giampaolo Merlini, Jan G. Waldenström, and Suresh D. Jayakar 1011

An Oxygen-Dependent Mechanism of Neutrophil-Mediated Cytotoxicity .............. Stephen J. Weiss and Albert F. LoBuglio 1020

Coexistence of Three Hemoglobins With Different α-Chains in Two Unrelated Children (With Family Studies Indicating Polymorphism in the Number of α-Globin Genes in the Sardinian Population)  
T. Meloni, G. Pilo, L. Camardella, F. Cancedda, A. Lania, G. Pepe, and L. Luzzatto 1025

Treatment of Aplastic Anemia by Bone Marrow Transplantation in Identical Twins  

Complement Sensitivity of Paroxysmal Nocturnal Hemoglobinuria Bone Marrow Cells  
Jon Tumen, Lanning B. Kline, Joseph W. Fay, Daniel C. Scullin, Emily G. Reisner, Wendell F. Rosse, and Andrew T. Huang 1040

Regulation of Erythroid Colony Formation by Bone Marrow Macrophages .............. Leo J. Gordon, Wesley J. Miller, Richard F. Branda, Esmail D. Zanjani, and Harry S. Jacob 1047

CONCISE REPORTS

Cytosol Intermediates in the Transport of Iron ........................................ Marco Tulio Nunez, Edward S. Cole, and Jonathan Glass 1051

Factor VIII-Related Protein Circulates in Normal Human Plasma as High Molecular Weight Multimers  
Leon W. Hoyer and John R. Shainoff 1056

The Detection and Use of Hemoglobin Mutants in the Direct Analysis of Human Globin Genes  
P. F. R. Little, E. Whitelaw, G. Annison, R. Williamson, J. M. Kooter, R. A. Flavell, M. Goossens, G. R. Sergeant, and D. Montgomery 1060

Chronic Myelocytic Leukemia: Eosinophils Involved in the Malignant Clone  
H. Phillip Koeffler, Alexandra M. Levine, Maryellen Sparkes, and Robert S. Sparkes 1063

Unequal Crossing-Over: A Common Basis of Single α-Globin Genes in Asians and American Blacks With Hemoglobin-H Disease  
John A. Phillips III, Terry A. Vik, Alan F. Scott, Keith E. Young, Haig H. Kazazian, Jr., Kirby D. Smith, Virgil F. Fairbanks, and Harold M. Koenig 1066

SPECIAL DEPARTMENTS

Correspondence ........................................................................................................ 1070
Announcements ........................................................................................................ 1071
Annual Indexes .......................................................................................................... 1073
Information to Contributors .................................................................................... xxxiii
Advertisers’ Index .................................................................................................... 3C

Concise Reports of original investigations of scientific importance may now be eligible for rapid editorial review and decision (three weeks). For more information see Information for Contributors.

Please note that a processing fee of $50.00 must accompany each manuscript submitted for consideration for publication in BLOOD.

All manuscripts submitted for consideration for publication in BLOOD should be sent to:

Paul A. Marks, M.D., Editor
BLOOD
Columbia University College of Physicians and Surgeons
701 West 168th Street, New York, N.Y. 10032

HEMOX™—ANALYZER by TCS

AUTOMATIC BLOOD OXYGEN DISSOCIATION ANALYZER

■ Whole Blood or Hb-Solution
■ Sample pH Adjustable
■ Normal, Abnormal, Cord Blood
■ Dissociation & Association Curve
■ Buffer or Serum Suspension
■ Digital Temperature and PO2

AN AUTOMATIC SYSTEM FOR PLOTTING A CONTINUOUS OXYGEN EQUILIBRIUM CURVE OF BLOOD IN JUST 20 MINUTES.
