CONTENTS

Antony W. Burgess and Donald Metcalf 947

“Aspirinated” Platelets are Hemostatic in Thrombocytopenic Rats With “Nonaspirinated” Vessel
Walls—Evidence From an Exchange Transfusion Model
Elisabetta Dejana, Brunella Barbieri, and Giovanni de Gaetano 959

Human Red Cell Membrane Adenylate Cyclase in Normal Subjects and Patients With Hereditary
Spherocytosis, Sickle Cell Disease and Unidentified Hemolytic Anemias
J. P. Piau, J. Delaunay, S. Fischer, M. Tortolero, and G. Schapira 963

Quantitative Immunoferritin Microscopy of Fya, Fyb, Jk*, U, and Di* Antigen Site Numbers on Human
Red Cells ............................................................. S. P. Masouredis, E. Sudora, L. Mahan, and E. J. Victoria 969

Anti-Inhibitor Coagulant Complex (Autoplex) for Treatment of Factor VIII Inhibitors in Hemophilia
Charles F. Abildgaard, John A. Penner, and Edward J. Watson-Williams 978

Evidence for Both Oxygen and Non-Oxygen Dependent Mechanisms of Antibody Sensitized Target Cell
Lysis by Human Monocytes ....................................... David K. Klassen and Arthur L. Sagone, Jr. 985

The Demonstration of Antibody Binding to Platelet-Associated Antigens in Patients With Immune
Thrombocytopenic Purpura ..................................... Robert McMillan, Patricia Tani, and Donna Mason 993

The Mechanism of Platelet Release .............................. J. M. Radley and G. Scurfield 996

A Statistical Analysis of Murine Stem Cell Suicide Techniques
Peter J. Quesenberry and Kenneth Stanley 1000

Some Properties of Marrow Derived Adherent Cells in Tissue Culture
Stuart A. Bentley and Jean-Michel Foidart 1006

Crotalocytin: Recognition and Purification of a Timber Rattlesnake Platelet Aggregating Protein
Alvin H. Schmaier, William Claypool, and Robert W. Colman 1013

Crotalocytin: Characterization of the Timber Rattlesnake Platelet Activating Protein
Alvin H. Schmaier and Robert W. Colman 1020

Mucosal Iron Transport by Rat Intestine.............................. Michael A. Savin and James D. Cook 1029

Clinical Implications of Glucocorticoid Receptor Studies in Childhood Acute Lymphoblastic Leukemia
R. Mastrangelo, R. Malandrino, R. Riccardi, P. Longo, F. O. Ranelletti, and S. Iacobelli 1036

In Vivo Survival Studies of 31Cr-Labeled Methyl Acetimidate Treated Erythrocytes in Patients With
Sickle Cell Disease .... Thomas G. Gabuzda, Tessa L. Chao, Marion R. Berenfeld, and Terri Gelbart 1041

Wiscott-Aldrich Syndrome: Cellular Impairments and Their Implication for Carrier Detection
Josef T. Prchal, Andrew J. Carroll, Jaroslav F. Prchal, William M. Crist, Harold W. Skalka,
W. James Gealy, John Harley, and Ahmad Malluh 1048

Partial Plasma Exchange Using Albumin Replacement: Removal and Recovery of Normal Constituents
J. B. Orlin and E. M. Berkman 1055

(Continued on following page)
Vascular Endothelium as a Regulator of Granulopoiesis: Production of Colony-Stimulating Activity by Cultured Human Endothelial Cells ..........................Peter J. Quesenberry and Michael A. Gimbrone, Jr. 1060

Cord Blood Screening for Hemoglobin Abnormalities by Thin Layer Isoelectric Focusing Frederic Galacteros, Klara Kleman, Josiane Caburi-Martin, Yves Beuzard, Jean Rosa and Bertram Lubin 1068

Significance of Ph1–Negative Marrow Cells in Ph1–Positive Chronic Granulocytic Leukemia Joseph E. Sokal 1072

The In Vitro Sensitivity of Leukemic and Normal Leukocytes to Hydrocortisone Induced Cytolysis Uri Galili, Miron Prokocimer, and Gabriel Izak 1077

Quantitation of Hemoglobins Within Individual Red Cells: Asynchronous Biosynthesis of Fetal and Adult Hemoglobin During Erythroid Maturation in Normal Subjects George J. Dover and Samuel H. Boyer 1082

Prenatal Diagnosis of Hemoglobinopathies: Comparison of the Results Obtained by Isoelectric Focusing of Hemoglobins and by Chromatography of Radioactive Globin Chains A. Dubart, M. Goossens, Y. Beuzard, N. Monplaisir, U. Testa, P. Basset, and J. Rosa 1092

A Murine Model for the Switch From Fetal to Adult Hemoglobin During Ontogeny Blanche P. Alter and Sabra C. Goff 1100

Effect of Burst-Promoting Activity (BPA) and Erythropoietin on Hemoglobin Biosynthesis in Culture Takashi Terasawa, Makio Ogawa, Pamela N. Porter, David W. Golde, and Eugene Goldwasser 1106

Cytochemically Demonstrable B–Glucuronidase Activity in Normal and Neoplastic Human Lymphoid Cells .................................................Genevieve A. Machin, James P. Halper, and Daniel M. Knowles II 1111

Immunologic Classification of Acute Lymphoblastic Leukemia Implications for Normal Lymphoid Differentiation ......................Kenneth A. Foon, Ronald J. Billing, Paul I. Terasaki, and Martin J. Cline 1120

CONCISE REPORTS

Synthesis of Abnormal Heavy Chains in Bence-Jones Plasma Cell Leukemia With Intracellular IgG J. L. Preud’homme, S. Labaume, and V. Praloran 1136

A Monoclonal Antibody Identifying a Cell Surface Antigen Shared by Common Acute Lymphoblastic Leukemias and B Lineage Cells ....................M. F. Greaves, W. Verbi, J. Kemshead, and R. Kenneti 1141

Organization of α–Globin Genes in Hb Hasharon (α 47asp → his) Carriers B. Giglioni, P. Comi, R. Taramelli, S. Ottolenghi, M. A. Ciocca-Vasino, C. Anè Cappellini, and A. M. Gianni 1145

Modulation of Murine Pluripotential Stem Cell Proliferation In Vivo by Lithium Carbonate Vincent S. Gallicchio and Michael G. Chen 1150

SPECIAL DEPARTMENTS

Correspondence ........................................................................... 1153

Announcements ........................................................................... 1153
The American Society of Hematology certifies that the continuing medical education offering provided by BLOOD, The Journal of the American Society of Hematology, meets the criteria for up to 22 hours of credit in Category 5(a) for the Physician’s Recognition Award of the American Medical Association.

Please note that a processing fee of $50.00 must accompany each manuscript submitted for consideration for publication in BLOOD.

All manuscripts submitted for consideration for publication in BLOOD should be sent to: Paul A. Marks, M.D., Editor, BLOOD, Memorial Sloan-Kettering Cancer Center, 1275 York Avenue, New York, N.Y. 10021

**Factor Deficient Human Plasma**

- **Substrate Quality**
- **Stable**
- **Fresh Frozen**
- **Mono-Specific**

*(Partial) Price List (F.O.B. Overland Park, Kansas)*

- All shipments are packed with dry ice in styrofoam boxes. (Handling Charge for orders under $200.00).
- Shipment within the United States are delivered within 24 hours.
- Plasma can be aliquoted to smaller amounts (1, 2, 3, 4 ml) at an additional charge of $.50 per vial.
- Special discount prices upon request for standing orders or large volumes.

Also available — • FACTORS I, II, V, IX, X, XIII • FACTORS VIII or IX with inhibitor

**Fletcher Trait** • **Von Willebrand** • **Passavoy Trait** • **Fitzgerald Trait**

**Normal Reference Human Plasma**
