CONTENTS

Review: Blood Tests for the Diagnosis of Venous and Arterial Thrombosis ............................................ J. Hirsh 1

Prevention of Graft Rejection Following Bone Marrow Transplantation
UCLA Bone Marrow Transplant Team: Robert Peter Gale, Winston Ho, Stephen Feig, Richard Champlin, Alan Tesler, Edward Arenson, Stephan Ladish, Lowell Young, Drew Winston, Robert Sparkes, John Fitchen, Mary Territo, Gregory Sarna, Livingston Wong, Young Paik, Yvonne Bryson, David Golde, John Fahey, and Martin Cline 9

Purification and Characterization of a Human T-Lymphocyte-Derived Granulocyte-Macrophage Colony-Stimulating Factor ..................................... Aldons J. Lusis, Diane H. Quon, and David W. Golde 13

Cell Elastimetry in the Detection of Antineutrophil Antibodies
Michael E. Miller, Laurence A. Boxer, Eric J. Kawaoka, and Wayne A. Border 22

Application of the Enzyme Linked Immunospecific Assay (ELISA) for the Detection of Platelet Antibodies .............................................................. M. Gudino and W. V. Miller 32

The Mouse Pale Ear Pigment Mutant as a Possible Animal Model for Human Platelet Storage Pool Deficiency ................................................................. Edward K. Novak, Sek-Wen Hui, and Richard T. Swank 38

Clot Retraction Facilitates Clot Lysis .... Roger C. Carroll, Jonathan M. Gerrard, and James M. Gilliam 44

Absence of Platelet-Specific Alloantigens in Glanzmann's Thrombasthenia

Studies on the Inhibition of Ellagic Acid-Activated Hageman Factor (Factor XII) and Hageman Factor Fragments ................................................................. Oscar D. Ratnoff 55

Sucrose Density Gradient Analysis of Erythrocyte Membranes in Hemolytic Anemias
Thomas P. Flynn, Gerhard J. Johnson, and David W. Allen 59

Long-Term Survival and Reversal of Iron Overload After Marrow Transplantation in Dogs With Congenital Hemolytic Anemia ........................................... Paul L. Weiden, Robert C. Hackman, H. Joachim Deeg, Theodore C. Graham, E. Donnall Thomas, and Rainer Storb 66

Adherent Cell Inhibition of Human Leukemic In Vitro Agar Clonal Growth by Short-Term Cell-to-Cell Contact ........ Gary Spitzer, Dharmvir S. Verma, Miloslav Beran, Axel R. Zander, Karel A. Dicke, and Kenneth B. McCredie 71

Quantitation of Three Types of γ Chain of HbF by High Pressure Liquid Chromatography; Application of This Method to the HbF of Patients With Sickle Cell Anemia or the S-HPFH Condition

(Continued on following page)
(Contents continued)

The Kidneys in Paroxysmal Nocturnal Hemoglobinuria
Douglas A. Clark, Stephen A. Butler, Victor Braren, Robert C. Hartmann, and David E. Jenkins, Jr. 83

Concomitant Administration of Granulocyte Transfusions and Amphotericin B in Neutropenic Patients: Absence of Significant Pulmonary Toxicity
Bruce W. Dana, Brian G. M. Darie, Ruby F. White, and Douglas W. Huestis 90

The Progeny of a Single Progenitor Cell can Develop Characteristics of Either a Tissue or an Alveolar Macrophage.................................Menashe Bar-Eli, Mary C. Territo, and Martin J. Cline 95

Platelet Recovery From Aspirin Inhibition In Vivo; Differing Patterns Under Various Assay Conditions
Patricia M. Catalano, J. Bryan Smith, and Scott Murphy 99

Contributions of Human Platelets to the Proteolytic Activation of Blood Coagulation Factors XII and XI
Peter N. Walsh and John H. Griffin 106

Splenic Granulocytopoiesis and Production of Colony-Stimulating Activity in Lymphoma and Leukemia
Peter L. Greenberg and Susan M. Steed 119

Altered Assembly of Spectrin in Red Cell Membranes in Hereditary Pyropoikilocytosis
Jiri Palek, Shin-Chun Liu, Pi-Yiao Liu, Joseph Prchal, and Robert P. Castleberry 130

Isolation and Characterization of Cloned DNA: The β and β′ Globin Genes in Homozygous β-Thalassemia
A. Lee Burns, Sally Spence, Katherine Kosche, Francesco Ramirez, J. Gregory Mears, Helen Schreiner, Carl Miller, Michael Baird, David Leibowitz, Patricia Giardina, Alice Markenson, and Arthur Bank 140

Expression of Blood Group A Antigens in Human Bone Marrow Cells
Kimmo K. Karhi, Leif C. Andersson, Pekka Vuopio, and Carl G. Gahmberg 147

An Anionic Material at the Advancing Front of Blood Cells Entering the Bone Marrow Circulation
Peter P. H. De Bruyn and Sonia Michelson 152

Cell Interactions Influencing Murine Marrow Megakaryocytes: Nature of the Potentiator Cell in Bone Marrow...........................................Neil Williams, Heather Jackson, Peter Ralph, and Ilona Nakoinz 157

Effect of Oxygenated Sterol Compounds on Human Bone Marrow Granulocytic Progenitor Cells
Philip C. Hoffman, Carol M. Richman, Robert S. Hsu, Jiwhye Chung, Angelo M. Scanu, and Stanley Yachnin 164

Production of Erythroid Potentiating Factor(s) by a Human Monocytic Cell Line

Heterogeneity of Membrane Surface Proteins in Glanzmann’s Thrombasthenia
Joseph R. Holahan and Gilbert C. White II 174

5-Azacytidine and Renal Tubular Dysfunction..............................................Bruce A. Peterson, Allan J. Collins, Nicholas J. Vogelzang, and Clara D. Bloomfield 182

The Chemotherapy of Lymphoblastic Lymphoma...........................................Jane B. Voakes, Stephen E. Jones, and Eugene M. Mckelvey 186

CONCISE REPORTS

Chronic Hemolytic Anemia Due to a Monoclonal IgG Cold Agglutinin With Anti-Pr Specificity
Koussay Dellagi, Jean Claude Brouet, Claudine Schenmetzler, and Victor Praloran 189

Isotopic Discordance of Paraproteins and Lymphocyte Surface Immunoglobulins in Myeloma
Maryann Nicholls, Paul C. Vincent, Eva Repka, John Saunders, and Frederick W. Gunz 192

The American Society of Hematology certifies that the continuing medical education offering provided by BLOOD, The Journal of the American Society of Hematology, meets the criteria for up to 22 hours of credit in Category 5(a) for the Physician’s Recognition Award of the American Medical Association.

Please note that a processing fee of $50.00 must accompany each manuscript submitted for consideration for publication in BLOOD.

All manuscripts submitted for consideration for publication in BLOOD should be sent to: Paul A. Marks, M.D., Editor, BLOOD, Memorial Sloan-Kettering Cancer Center, 1275 York Avenue, New York, N.Y. 10021
