CONTENTS

Review: Hodgkin’s Disease: Biology, Treatment, Prognosis ................................................................. Henry S. Kaplan 813

A Colony Assay for Blast Cell Progenitors in Non-B Non-T (Common) Acute Lymphoblastic Leukemia
C. A. Izaguirre, J. Curtis, H. Messner, and E. A. McCulloch 823

Increased Sensitivity to Normal Adherent Suppressor Cells in Untreated Advanced Hodgkin’s Disease
Richard I. Fisher, Christian Vanhaelen, and Frieda Bostick 830

Filtration Versus Gravity Leukapheresis in Febrile Granulocytopenic Patients: A Randomized
Prospective Trial.......................... Edward P. Ambinder, Gail R. Button, Tony Cheung, Judith D. Goldberg,
and James F. Holland 836

My-1, A New Myeloid-Specific Antigen Identified by a Mouse Monoclonal Antibody ........... Curt I. Civin,
Joseph Mirro, and M. L. Banquerigo 842

Inhibition of von Willebrand Factor-Dependent Platelet Function by Increased Platelet Cyclic AMP and
Its Prevention by Cytoskeleton-Disrupting Agents ................................................................. Barry S. Coller 846

Effect of Ascorbate on Abnormal Neutrophil, Platelet, and Lymphocyte Function in a Patient With the
Chediak-Higashi Syndrome...................... R. S. Weening, E. P. Schoorl, D. Roos, M. L. J. van Schaik,
A. A. Voetman, A. A. M. Bot, A. M. Batenburg-Plenter, Ch. Willems, W. P. Zeijlemaker,
and A. Astaldi 856

Enhancement of Iron Chelation by Desferrioxamine Entrapped in Red Blood Cell Ghosts.... Ralph Green,
Judy Miller, and William Crosby 866

Cultured Erythroid Cells as a Model for Hb Regulation: Ability of Cultured Cells to Synthesize Hb
Lepore and HbA2, and to Maintain Balanced Globin Synthesis................................ R. M. Baine and J. M. Benson 873

Relationship of a Leukemia-Associated Antigen to the Presence of Lymphoblasts in the Peripheral Blood
in Children with Acute Lymphocytic Leukemia ...................... Elaine Morgan and Clement C. S. Hsu 879

Transient Leukemoid Proliferation of the Cytogenetically Unbalanced +21 Cell Line of a Constitutional
Mosaic Boy.................................. David C. Heaton, Peter H. Fitzgerald, G. Jan Fraser, and George D. Abbott 883

Hereditary Myeloperoxidase Deficiency .................. Mitsuo Kitahara, Harmon J. Eyre, Yasmen Simonian,
Curtis L. Atkin, and Sandra J. Hasstedt 888

The Measurement of Lymphocyte Volume: Importance of Reference Particle Deformability and
Counting Solution Tonicity ..................... George B. Segel, Giles R. Cokelet, and Marshall A. Lichtman 894

Functional Study of Lipids of PNH Red Cell Membranes: Susceptibility of Liposomes to Reactive Lysis
F. Tedesco, I. Kahane, A. M. Giovanetti, and G. Sirchia 900

Regeneration of Hemopoietic Precursor Cells in Spleen Organ Cultures From Irradiated Mice: Influence of Genotype of Cells Injected and of the Spleen Microenvironment.................. Harald von Melchner and Graham J. Lieschke 906

Neutrophil Iodination Reaction Induced by Fluoride: Implications for Degranulation and Metabolic
Activation ................................................................. Robert A. Clark 913

(Continued on following page)
Purification of Erythroblastic Nests

Alberto J. L. Macario, Charles Dugan, Ines L. Perez-Lloret, and Everly Conway de Macario

Sources of Variability in Antihemophilic Factor (Factor VIII) Procoagulant Titers and Precipitating Antigen Levels Among Obligate Carriers of Classic Hemophilia

Paul K. Jones and Oscar D. Ratnoff

Clinical and Laboratory Evaluation of Infants and Children With Epstein-Barr Virus-Induced Infectious Mononucleosis: Report of 32 Patients (Aged 10–48 Months)

Charles A. Horwitz, Werner Henle, Gertrude Henle, Mace Goldfarb, Paul Kubic, Richard C. Gehrz, Henry H. Balfour, Jr., Gary R. Fleisher, and William Krivit

Lactoferrin: A Promoter of Polymorphonuclear Leukocyte Adhesiveness

Ronald Oseas, Hsin-Hsin Yang, Robert L. Baehner, and Laurence A. Boxer

Evidence for the Inhibitory Role of Guanosine 3’, 5’-Monophosphate in ADP-Induced Human Platelet Aggregation in the Presence of Nitric Oxide and Related Vasodilators

Interrelationships Among Platelet Responses: Studies on the Burst in Proton Liberation, Lactate Production, and Oxygen Uptake During Platelet Aggregation and Ca2+ Secretion

Jan Willem N. Akkerman and Holm Holmsen

Rapid Destruction of Newly Synthesized Excess β-Globin Chains in HbH Disease

Gwendolyn B. Sancar, Marisol M. Cedeno, and Ronald F. Rieder

CONCISE REPORTS

Malignant Monoblasts Can Function as Effector Cells in Natural Killer Cell and Antibody-Dependent Cellular Cytotoxicity Assays

Peter Hokland, Marianne Hokland, and Jørgen Ellegaard

Adenylate Cyclase and Guanylate Cyclase Activity in Normal and Leukemic Human Lymphocytes

Ugo Carpentieri, Jose J. Minguell, and Frank H. Gardner
