CONTENTS

Review: Evolution of Mammalian Hemoglobin Function.................................H. Franklin Bunn 189

The Interaction of Platelets with Aortic Subendothelium: Inhibition of Adhesion and Secretion by Prostaglandin I2..........................................................Burt Adelman, Michael B. Stemerman, Deborah Mennell, and Robert I. Handin 198

Megakaryoblastic Leukemia Presenting as Acute Myelofibrosis—A Study of Four Cases With the Platelet-Peroxidase Reaction

Terminal Deoxynucleotidyl Transferase-Containing Cells in Peripheral Blood: Implications for the Surveillance of Patients With Lymphoblastic Leukemia or Lymphoma in Remission
Thomas W. Froehlich, George R. Buchanan, Jo Ann M. Cornet, Peggy A. Sartain, and R. Graham Smith 214

The In Vitro Effects of Newcastle Disease Virus on the Metabolic and Antibacterial Functions of Human Neutrophils..........................Howard Faden, James Humbert, Josephine Lee, Patricia Sutyla, and Pearlay L. Ogra 221

Phagocytosis-Induced Modulation of Human Neutrophil Chemotaxis Receptors
T. A. Lane, G. C. Lamkin, and B. E. Windle 228

Early Changes in Phosphatidylethanolamine Metabolism in Human Acute Promyelocytic Leukemia Cells Stimulated to Differentiate by Phorbol Ester
Peter A. Cassileth, David Suholet, and Richard A. Cooper 237

Isolation of Transplantable Erythroleukemia Cells From Mice Infected With Helper-Independent Friend Murine Leukemia Virus......Allen Oliff, Sandra Ruscetti, Edwin C. Douglass, and Edward Scolnick 244

Biochemical and Biophysical Characterization of Glucocorticoid Receptors in Normal Lymphoid Tissue
Ronald McCaffrey, Anne Lilquist, and Richard Bell 263

The Formation of $Ca^{2+}$-Dependent Complexes of Platelet Membrane Glycoproteins IIb and IIIa in Solution as Determined by Crossed Immunoelectrophoresis
Thomas J. Kunicki, Dominique Pidard, Jean-Philippe Rosa, and Alan T. Nurden 268

Platelet Membrane Studies in the May-Hegglin Anomaly ....Barry S. Coller and Mohammad H. Zarrabi 279

Clonal Analysis of the Response of Human Myeloid Leukemic Cell Lines to Colony-Stimulating Activity
Francis W. Ruscetti, Steven J. Collins, Andrea M. Woods, and Robert C. Gallo 285

Monocyte-Mediated Antibody-Dependent Cell-Mediated Cytotoxicity: The Role of the Metabolic Burst
Charles A. Koller and Albert F. LoBuglio 293

(Continued on following page)
(Contents continued)

Chemical Modification of Human Hemoglobin by Antisickling Concentrations of Nitrogen Mustard
Eugene F. Roth, Jr., Arthur Arnone, Robert M. Bookchin, and Ronald L. Nagel 300

Studies of Human Pluripotential Hemopoietic Stem Cells (CFU-GEMM) In Vitro
Robert C. Ash, Robert A. Detrick, and Esmail D. Zanjani 309

Diminished Osmotic Fragility of Human Erythrocytes Following the Membrane Insertion of Oxygenated Sterol Compounds ........... Rolf A. Streuli, Jeffrey R. Kanofsky, Robert B. Gunn, and Stanley Yachnin 317

Abnormal Platelet Function and Arachidonate Metabolism in Chronic Idiopathic Thrombocytopenic Purpura.......................................................... Marie J. Stuart, John G. Kelton, and Judith B. Allen 326

Lymphoblast Purine Pathway Enzymes in B-Cell Acute Lymphoblastic Leukemia
Gregory H. Reaman, Julie Blatt, and David G. Poplack 330

Absence of Common ALL Antigen on Normal Bipotent Myeloid, Erythroid, and Granulocyte Progenitors................................. Luis A. Clavell, Jeffrey M. Lipton, Robert C. Bast, Jr., Michele Kudisch, John Pesando, Stuart F. Schlossman, and Jerome Ritz 333

Growth Hormone Stimulation of Normal and Leukemic Human T-Lymphocyte Proliferation In Vitro
Karen E. Mercola, Martin J. Cline, and David W. Golde 337

Isolation and Characterization of an Age-Related Antigen Present on Senescent Human Red Blood Cells
Edward M. Alderman, H. Hugh Fudenberg, and Robert E. Lovins 341

Loss of \(^{111}\)Indium as Indicator of Platelet Injury............................................ J. H. Joist and R. K. Baker 350

Effects of Platelet Inhibitors on the Platelet Aggregation Induced by Plasma From Patients With Thrombotic Thrombocytopenic Purpura ........................................... Eric C-Y Lian and N. Savaraj 354

Culture of Bone Marrow Reveals More Cells With Chromosomal Abnormalities Than the Direct Method in Patients With Hematologic Disorders ............... Sakari Knuutila, Pekka Vuopio, Erkki Elonen, Martti Siimes, Riitta Kovanen, Georg H. Borgström, and Albert de la Chapelle 369

Isolation of Murine Fetal Hemopoietic Progenitor Cells and Selective Fractionation of Various Erythroid Precursors .................... Nicos A. Nicola, Donald Metcalf Harald von Melchner, and Antony W. Burgess 376

Effect of the Multimeric Structure of the Factor VIII/von Willebrand Factor Protein on Binding to Platelets......................... Harvey R. Gralnick, Sybil B. Williams, and Donald K. Morisato 387

CONCISE REPORTS

Sickled Erythrocytes Accelerate Clotting In Vitro: An Effect of Abnormal Membrane Asymmetry
Danny Chiu, Bertram Lubin, Ben Roelofsen, and L. L. M. van Deenen 398

Identification of T Lymphocytes in Human Mixed Hemopoietic Colonies
H. A. Messner, C. A. Izaguirre, and N. Jamal 402

Heterogeneity of B-Cell Leukemias Demonstrated by the Monoclonal Antibody FMC7
D. Catovsky, M. Cherchi, D. Brooks, J. Bradley, and H. Zola 406

The American Society of Hematology certifies that the continuing medical education offering provided by BLOOD, The Journal of the American Society of Hematology, meets the criteria for up to 22 hours of credit in Category 5(a) for the Physician’s Recognition Award of the American Medical Association.

Please note that a processing fee of $50.00 must accompany each manuscript submitted for consideration for publication in BLOOD.

All manuscripts submitted for consideration for publication in BLOOD should be sent to: Paul A. Marks, M.D., Editor, BLOOD, Memorial Sloan-Kettering Cancer Center, 1275 York Avenue, New York, N.Y. 10021

### Factor Deficient Human Plasma

- **Substrate Quality**
- **Stable**
- **Fresh Frozen**
- **Mono-Specific**

**Coagulation Deficiency**

- All shipments are packed with dry ice in styrofoam boxes. (Handling Charge for orders under $200.00).
- Shipments within the United States are delivered within 24 hours.
- Plasma can be aliquoted to smaller amounts (1, 2, 3, 4 ml) at an additional charge of $.50 per vial.
- Special discount prices upon request for standing orders or large volumes.

**Also available** — • FACTORS I, II, V, VII, IX, X, XIII • FACTORS VIII or IX with inhibitor

**Normal Reference Human Plasma**
