CONTENTS

Tobacco, Cocoa, Coffee, and Ragweed: Cross-Reacting Allergens That Activate Factor-XII-Dependent Pathways ................................................................. Carl G. Becker, Nancy Van Hamont, and Mary Wagner 861

Hemophilic Dog Model for Evaluating Therapeutic Effectiveness of Plasma Protein Fractions Henry S. Kingdon and Thomas M. Hassell 868

Variant von Willebrand’s Disease and Pregnancy Wahid Hanna, David McCarroll, Ted McDonald, Pennell Painter, Jan Tuller, James Chen, and Robert Lange 873

The Effects of Dietary ω3 Fatty Acids on Platelet Composition and Function in Man: A Prospective, Controlled Study ....................... Scott H. Goodnight, Jr., William S. Harris, and William E. Connor 880

Heterogeneity in Human Prothrombin: Analysis of Cause S. Paul Bajaj, Samuel I. Rapaport, Christina Prodonos, and William A. Russell 886

Failure of Desmopressin to Lower Serum Sodium or Prevent Crisis in Patients With Sickle Cell Anemia Samuel Charache and W. Gordon Walker 892

Purine Nucleoside Phosphorylase (PNP) and Adenosine Deaminase (ADA) Activities Examined Cytochemically in Unfixed Lymphocytes of Patients With Lymphoproliferative Disorders Keizo Maeda, Kazuhiko Ito, and Nobuo Yamaguchi 897

Immunologic Abnormalities in Myelofibrosis With Activation of the Complement System Bruce R. Gordon, Morton Coleman, Parirokhe Kohen, and Noorbibi K. Day 904

Existence of a Pool of T-Lymphocyte Colony-Forming Cells (T-CFC) in Human Bone Marrow and Their Place in the Differentiation of the T-Lymphocyte Lineage Frederic Triebel, William A. Robinson, Anthony R. Hayward, and Pierre Goube de Laforest 911

Evidence That Essential Thrombocythemia is a Clonal Disorder With Origin in a Multipotent Stem Cell Philip J. Fialkow, Guy B. Faguet, Robert J. Jacobson, Kalpana Vaidya, and Scott Murphy 916

Nodular Mixed Lymphoma: Results of a Randomized Trial Failing to Confirm Prolonged Disease-Free Survival With COPP Chemotherapy John H. Glick, Janet M. Barnes, Ediz Z. Ezdinli, Costan W. Berard, Erica L. Orlow, and John M. Bennett 920

Prognostic Relevance of Thymidine Kinase Isozymes in Adult Non-Hodgkin’s Lymphoma Peter H. Ellims, T. Eng Gan, Gabriele Medley, and Martin B. Van Der Weyden 926

Long-Term Suspension Cultures of Human Cord Blood Myeloid Cells S. Zaki Salahuddin, Philip D. Markham, Francis W. Ruscetti, and Robert C. Gallo 931

Nonspecific Esterases of the Formed Elements: Zymograms Produced by pH 9.5 Polyacrylamide Gel Electrophoresis ......................................................... Joseph Yourno and Walter Mastropaolo 939

Modulation of Erythrocyte-Endothelial Interactions and the Vasocclusive Severity of Sickling Disorders Robert P. Hebbel, Charles F. Moldow, and Martin H. Steinberg 947

(Continued on following page)
Actin-Activated ATPase in Human Red Cell Membranes

Stanley L. Schrier, Britta Hardy, Irene Junga, and Lisa Ma

953

The Diagnosis of Iron Deficiency Anemia in Sickle Cell Disease

Elliott Vichinsky, Klara Kleman, Steven Embury, and Bertram Lubin

963

Globin Synthesis in Erythroid Bursts That Mature Sequentially in Culture. I. Studies in Cultures of Adult Peripheral Blood BFU-Es

Thalia Papayannopoulou, Betty Nakamoto, Sumiko Kurachi, and George Stamatoyannopoulos

969

Opsonized Zymosan-Stimulated Granulocytes—Activation and Activity of the Superoxide-Generating System and Membrane Potential Changes

Harvey J. Cohen, Peter E. Newburger, Margaret E. Chovaniec, John C. Whitin, and Elizabeth R. Simons

975

Combined Factor V-VIII Deficiency: A Case Report With Studies of Factor V and VIII Activation by Thrombin

Mae B. Hultin and M. Elaine Eyster

978

On the 5q– Deletion: Clinical and Cytogenetic Observations in Ten Patients and Review of the Literature

Birgitta Swolin, Aleksander Weinfeld, Börje Ridell, Johan Waldenström, and Jan Westin

986

Lysozyme Enhances Monocyte-Mediated Tumoricidal Activity: A Potential Amplifying Mechanism of Tumor Killing

Paul LeMarbre, John J. Rinehart, Neil E. Kay, Robert Vesella, and Harry S. Jacob

994

A Monoclonal Antibody to VIII:C Produced by a Mouse Hybridoma

H. P. Muller, N. H. van Tilburg, J. Derks, E. Klein-Breteler, and R. M. Bertina

1000

Long-Term Follow-up of Patients With Leukemia Receiving Platelet Transfusions: Identification of a Large Group of Patients Who do not Become Alloimmunized

Janice P. Dutcher, Charles A. Schiffer, Joseph Aisner, and Peter H. Wiernik

1007

A Clinicopathologic Correlation of the Idiopathic Hypereosinophilic Syndrome. I. Hematologic Manifestations

Morris A. Flaum, Robert T. Schooley, Anthony S. Fauci, and Harvey R. Gralnick

1012

A Clinicopathologic Correlation of the Idiopathic Hypereosinophilic Syndrome. II. Clinical Manifestations

Robert T. Schooley, Morris A. Flaum, Harvey R. Gralnick, and Anthony S. Fauci

1021

Effects of Acetyl Glyceryl Ether Phosphorylcholine on Human Platelet Function in Vitro

Aaron J. Marcus, Lenore B. Safier, Harris L. Ullman, Kenneth T. H. Wong, M. Johan Broekman, Babette B. Weksler, and Karen L. Kaplan

1027

Immature Megakaryocytes in the Mouse: Morphology and Quantitation by Acetyicholinesterase Staining

Michael W. Long and Neil Williams

1032

CONCISE REPORTS

Human Alveolar Macrophages Express Ia-Like Antigens

William Hocking, Ron Billing, Ken Foon, and David Golde

1040

Effect of 2’-Deoxycoformycin on Erythroid, Granulocytic, and T-Lymphocyte Colony Growth

M. T. Aye and J. V. Dunne

1043

Phenotypic Characterization of Human Bone Marrow Granulocyte-Macrophage Forming Progenitor Cells

Mark N. Levine, Joseph W. Fay, Nancy H. Jones, Richard S. Metzgar, and Barton F. Haynes

1047

Cytogenetic Conversion Following Allogeneic Bone Marrow Transplantation for Advanced Chronic Myelogenous Leukemia

1050

Characterization of the Phytohemagglutinin-Induced Proliferating Lymphocyte Subpopulations in Chronic Lymphocytic Leukemia Patients Using a Clonogenic Agar Technique and Monoclonal Antibodies

Stephen Davis

1053

The American Society of Hematology certifies that the continuing medical education offering provided by BLOOD, The Journal of the American Society of Hematology, meets the criteria for up to 22 hours of credit in Category 5(a) for the Physician’s Recognition Award of the American Medical Association.

Please note that a processing fee of $50.00 must accompany each manuscript submitted for consideration for publication in BLOOD.

All manuscripts submitted for consideration for publication in BLOOD should be sent to: Paul A. Marks, M.D., Editor, BLOOD, Memorial Sloan-Kettering Cancer Center, 1275 York Avenue, New York, N.Y. 10021

Factor Deficient Human Plasma

- Substrate Quality
- Fresh Frozen
- Stable
- Mono-Specific

(Partial) Price List (F.O.B. Overland Park, Kansas)

- All shipments are packed with dry ice in styrofoam boxes. (Handling Charge for orders under $200.00).
- Shipments within the United States are delivered within 24 hours.
- Plasma can be aliquoted to smaller amounts (1, 2, 3, 4 ml) at an additional charge of $.50 per vial.
- Special discount prices upon request for standing orders or large volumes.

Also available — • FACTORS I, II, V, VII, IX, X, XIII • FACTORS VIII or IX with inhibitor

Fletcher Trait • Von Willebrand • Passavoy Trait • Fitzgerald Trait
Normal Reference Human Plasma
