CONTENTS

The Management of Stage I-II Hodgkin's Disease With Irradiation Alone or Combined Modality Therapy: The Stanford Experience
Richard T. Hoppe, C. Norman Coleman, Richard S. Cox, Saul A. Rosenberg, and Henry S. Kaplan 455

Phosphorylation of Platelet Actin-Binding Protein During Platelet Activation
Roger C. Carroll and Jonathan M. Gerrard 466

Identification of Primary Lysosomes in Human Megakaryocytes and Platelets
Mary E. Bentfeld-Barker and Dorothy F. Bainton 472

Interaction Between Vaccinia Virus and Human Blood Platelets
Tova Bik, Israel Sarov, and Avinoam Livne 482

Absence of Treatment-Induced Second Neoplasms After ABVD in Hodgkin's Disease
P. Valagussa, A. Santoro, F. Fossati Bellani, F. Franchi, A. Banfi, and G. Bonadonna 488

Considerations in the Use of B6 Vitamers in Hematologic Disorders: I. Red Cell Transport and Metabolism of Pyridoxal............................................................Lawrence R. Solomon 495

Platelet Protein Organization: Analysis by Treatment With Membrane-Permeable Cross-Linking Reagents ............................................................Gregg E. Davies and Jiri Palek 502

Lymph Node T Cells in Hodgkin's Disease: Analysis of Suspensions With Monoclonal Antibody and Rosetting Techniques ............................................................ Alan C. Aisenberg and Barbara M. Wilkes 522

Flow Cytometric Analysis of DNA Content of Bone Marrow Cells in Patients With Plasma Cell Myeloma: Clinical Implications...................Paul A. Bunn, Jr., Steven Krasnow, Robert W. Makuch, Mark L. Schlam, and Geraldine P. Schechter 528

Decreased Actin Content of Lymphocytes From Patients With Chronic Lymphocytic Leukemia
Richard Stark, Leonard F. Liebes, Denise Nevrla, Maryrose Conklyn, and Robert Silber 536

Characterization of the Defect of the Factor VIII/von Willebrand Factor Protein in von Willebrand's Disease........................................Harvey R. Gralnick, Mary C. Cregger, and Sybil B. Williams 542

Non-T, Non-B Lymphomas Are Rare in Childhood and Associated With Cutaneous Tumor
Alain Bernard, Sharon B. Murphy, Susan Melvin, W. Paul Bowman, Jacques Cailland, Jean Lemerle, and Laurence Boumsell 549

Leukemic-Like Membrane Properties Acquired by B Lymphocytes When Depleted of 185,000-Dalton Macromolecular Insoluble Cold Globulin
Mary A. Simmonds, Gloria Sobczak, and Stephen P. Hauptman 555

(Continued on following page)
Stored Human Platelets Retain Full Aggregation Potential in Response to Pairs of Aggregating Agents
Giovanni DiMinno, Melvin J. Silver, and Scott Murphy 563

Immature Megakaryocytes in the Mouse: Physical Characteristics, Cell Cycle Status, and In Vitro Responsiveness to Thrombopoietic Stimulatory Factor
Michael W. Long, Neil Williams, and Shirley Ebbe 569

Differential Role of Fractionated Heparin in Antithrombin-III Proteolysis .......................... Ewa Marciniak 576

Effect of Platelet-Activating Factor (PAF) on Human Platelets
Carolyn McI. Chesney, D. David Pifer, L. W. Byers, and E. Eric Muirhead 582

Dexamethasone Synergistically Induces Chemotactic Peptide Receptor Expression in HL-60 Cells
Keith M. Skubitz, Yong-su Zhen, and J. Thomas August 586

Monoclonal Antibodies to Porcine Factor VIII Coagulant and Their Use in the Isolation of Active Coagulant Protein .......................................................... D. N. Fass, G. J. Knutson, and J. A. Katzmann 594

The Contribution of Blast Cell Properties to Outcome Variation in Acute Myeloblastic Leukemia (AML)
Ernest A. McCulloch, John E. Curtis, Hans A. Messner, John E. Senn, and Terry P. Germanson 601

The Phenotype of the Neoplastic Cells of Hairy Cell Leukemia Studied With Monoclonal Antibodies
Jan Jansen, Tucker W. LeBien, and John H. Kersey 609

Porcine Factor VIII: C Prepared by Affinity Interaction With von Willebrand Factor and Heterologous Antibodies: Sodium Dodecyl Sulfate Polyacrylamide Gel Analysis
Gaylord J. Knutson and David N. Fass 615

Sex-Related Differences in Platelet Function: The Effect of Aspirin
John G. Kelton, Cedric J. Carter, Aurelio Santos, and Jack Hirsh 625

Sideroblastic Anemia With Markedly Increased Free Erythrocyte Protoporphyrin Without Dermal Photosensitivity ............................................. Inge Romslo, Atle Brun, Sverre Sandberg, Sylvia S. Bottomley, Gunnar Høvding, and Ingebrigt Talstad 628

The Effect of Folate Analогues and Vitamin B₁₂ on Provision of Thymine Nucleotides for DNA Synthesis in Megaloblastic Anemia
M. R. Taheri, R. G. Wickremasinghe, B. F. A. Jackson, and A. V. Hoffbrand 634

Karyotypically Distinct Subpopulations in Acute Leukemia With Specific Growth Requirements
B. Löwenberg, A. Hagemeijer, and K. Swart 641

Erythropoiesis in ha/ha and sph/sph Mice, Mutants Which Produce Spectrin-Deficient Erythrocytes
Daniel Brookoff, Lillian Maggio-Price, Seldon Bernstein, and Leon Weiss 646

Acute Leukemia in Idiopathic Sideroblastic Anemia: Response to Combination Chemotherapy
Khader K. Hussein, Ziad Salemi, Sylvia S. Bottomley, and Robert B. Livingston 652

Distribution of Plasma Fibronectin (Cold-Insoluble Globulin) and Components of the Factor VIII Complex After Heparin-Induced Precipitation of Plasma
David L. Amrani, Michael W. Mosesson, and Leon W. Hoyer 657

A Monoclonal Antibody That Detects Expression of Transferrin Receptor in Human Erythroid Precursor Cells .................................................. Deborah Lebman, Massimo Trucco, Lisabianca Bottero, Beverly Lange, Silvana Pessano, and Giovanni Rovera 671

The American Society of Hematology certifies that the continuing medical education offering provided by BLOOD, The Journal of the American Society of Hematology, meets the criteria for up to 22 hours of credit in Category 5(a) for the Physician’s Recognition Award of the American Medical Association.

The Editors of BLOOD will assume that the authors of research papers published in BLOOD are prepared to distribute to bona fide academic investigators exclusively for their own research any clone of cells or DNA used in the experiments reported.

All manuscripts submitted for consideration for publication in BLOOD should be sent to: Paul A. Marks, M.D., Editor, BLOOD, Memorial Sloan-Kettering Cancer Center, 1275 York Avenue, New York, N.Y. 10021

Factor Deficient Human Plasma

- Substrate Quality
- Fresh Frozen
- Stable
- Mono-Specific

(Partial) Price List (F.O.B. Overland Park, Kansas)

- All shipments are packed with dry ice in styrofoam boxes. (Handling Charge for orders under $200.00).
- Shipment within the United States are delivered within 24 hours.
- Plasma can be aliquoted to smaller amounts (1, 2, 3, 4 ml) at an additional charge of $5.00 per vial.
- Special discount prices upon request for standing orders or large volumes.

Also available — FACTORS I, II, V, VII, IX, X, XIII FACTORS VIII or IX with inhibitor

Fletcher Trait Von Willebrand Passavoy Trait Fitzgerald Trait
