CONTENTS

Review: Murine Megakaryocytopoiesis In Vitro: An Analysis of Culture Systems Used for the Study of Megakaryocyte Colony-Forming Cells and of the Characteristics of Megakaryocyte Colonies
Jack Levin 617

Brief Review: Status of Laboratory Testing in the Diagnosis of Megaloblastic Anemia
John Lindenbaum 624

Selective Expression of the Common Acute Lymphoblastic Leukemia (gp100) Antigen on Immature Lymphoid Cells and Their Malignant Counterparts..............M. F. Greaves, G. Hariri, R. A. Newman, D. R. Sutherland, M. A. Ritter, and J. Ritz 628

T-Cell Surface Antigens in a Patient With Blast Crisis of Chronic Myeloid Leukemia
James D. Griffin, Ramana Tantravahi, George P. Canellos, Jeffrey S. Wisch, Ellis L. Reinherz, Geoffrey Sherwood, Richard P. Beveridge, John F. Daley, Heather Lane, and Stuart F. Schlossman 640

Monoclonal Antiglycophorin as a Probe for Erythroleukemias..............M. F. Greaves, C. Sieff, and P. A. W. Edwards 645

The Binding of Bovine Factor XII to Kaolin.........................Edward P. Kirby and Patrick J. McDevitt 652

Selective Toxicity of Deoxyguanosine and Arabinosyl Guanine for T-Leukemic Cells..............Amos Cohen, Jacob W. W. Lee, and Erwin W. Gelfand 660

Cholesterol and Mevalonic Acid Are Independent Requirements for the In Vitro Proliferation of Human Bone Marrow Granulocyte Progenitor Cells: Studies Using ML-236B..............Philip C. Hoffman, Carol M. Richman, Richard A. Larson, and Stanley Yachnin 667

The Triton X-100-Insoluble Residue (“Cytoskeleton”) of Aggregated Platelets Contains Increased Lipid Phosphorus as Well as 125I-Labeled Glycoproteins ..............Marjorie B. Zucker and Nicholas C. Masiello 676

Comparative Evaluation of Fifteen Anti-Sickling Agents .........................Henry Chang, Sandra M. Ewert, Robert M. Bookchin, and Ronald L. Nagel 693

Circulating Lymphocyte Populations in Hodgkin’s Disease After Mantle and Paraaoartic Irradiation
Marshall R. Posner, Ellis Reinherz, Heather Lane, Peter Mauch, Samuel Hellman, and Stuart F. Schlossman 705

The Use and Safety of Ibuprofen in the Hemophiliac..................Martin J. Inwood, Barbara Killackey, and Shirley J. Startup 709

(Continued on following page)
CONTENTS

Procoagulant Activity of Lymphocyte-Macrophage Populations in Rabbits: Selective Increases in
Marrow, Blood, and Spleen Cells During Shwartzman Reactions ....................... Henry Rothberger,
Francis B. Dove, Tung-Kuang Lee, Maria P. McGee, and Bruce Kardon 712

Granulocytes and Cultured Human Fibroblasts Express Common Acute Lymphoblastic
Leukemia-Associated Antigens ...................... Marcus P. Braun, Paul J. Martin, Jeffrey A. Ledbetter,
and John A. Hansen 718

Serum Monoclonal Immunoglobulin Bands in Undifferentiated Lymphomas of Burkitt and Non-Burkitt
Types .................................. Ian Magraith, David Benjamin, and Nick Papadopoulos 726

Murine Eosinophils Labeled With Indium-111 Oxine: Localization to Delayed Hypersensitivity
Reactions Against a Schistosomal Antigen and to Lymphokine In Vivo............... Thomas H. Rand,
Jeffrey A. Clanton, Val Runge, Denis English, and Daniel G. Colley 732

The Role of Polyamine Biosynthesis in Hematopoietic Precursor Cell Proliferation in Mice
E. Niskanen, A. Kallio, P. P. McCann, and D. G. Baker 740

Spontaneous Hematologic Recovery From Bone Marrow Aplasia After Accidental Tenfold Overdosage
With Radiophosphorus ............... J. Gmür, B. Bischof, S. Coninx, U. Bucher, G. Poretti, K. Henrichs,
A. Kaul, H. D. Roedler, K. Büttner, and P. G. Frick 746

Isolation of Erythropoietin-Sensitive Cells From Friend Virus-Infected Marrow Cultures: Characteristics
of the Erythropoietin Response ..................... Maurice Bondurant, Mark Koury, Sanford B. Krantz,
Teresa Blevins, and Dexter T. Duncan 751

A Monoclonal Antibody Cross-Reactive With Human Platelets, Megakaryocytes, and Common Acute
Lymphocytic Leukemia Cells ............................... Chun-Tsan Deng, Paul I. Terasaki, Yuichi Iwaki,
Florence M. Hofman, Philip Koever, Leslie Cahan, Nadim El Awar, and Ronald Billing 759

Hertwig's Anemia: Characterization of the Stem Cell Defect .............. Jane E. Barker and Seldon E. Bernstein 765

No Stimulative Effect of Adipocytes on Hematopoiesis in Long-Term Human Bone Marrow Cultures
Ivo Touw and Bob Löwenberg 770

Basophil/Mast Cell Precursors in Human Peripheral Blood ......................... J. A. Denburg, M. Richardson,
S. Telizyn, and J. Bienenstock 775

Production and Regulation of Interleukin-2 in Human Lymphoblastic Leukemias Studied With T-Cell
Monoclonal Antibodies ............................... Salvatore Venuta, Roland Mertelsmann, Karl Welte,
Stuart P. Feldman, Chang Yi Wang, and Malcolm A. S. Moore 781

Lysis of Leukemia and Lymphoma Cells by Autologous and Allogeneic Interferon-Activated Blood
Mononuclear Cells .................. Kazuo Oshimi, Yoko Oshimi, Toshiko Motoji, Shigeyasu Kobayashi,
and Hideaki Mizoguchi 790

Relationship Among Plasma Iron, Plasma Iron Turnover, and Reticuloendothelial Iron Release
Tatsumi Uchida, Tsuyoshi Akitsuki, Hideo Kimura, Tetsugoro Tanaka, Shin Matsuda,
and Shigeo Kariyone 799

CONCISE REPORTS

Reorientation of Membrane Polypeptides During Erythrocyte Maturation ............... Robert W. Allen
and Beverly A. Hoover 803

Thrombin Proteolysis of Purified Factor VIII Procoagulant Protein: Correlation of Activation With
Generation of a Specific Polypeptide .................................. Carol A. Fulcher, James R. Roberts,
and Theodore S. Zimmerman 807

Kinetics of Circulating B Lymphocytes in Human Myeloma ...................... Mario Boccadoro, Paolo Gavarotti,
Giorgio Fossati, Massimo Massaia, Alessandro Pileri, and Brian G. M. Durie 812

Sodium Azide Enhancement of Interleukin-2 Production ........... Stuart P. Feldman, Roland Mertelsmann,
Salvatore Venuta, Michael Andreeff, Karl Welte, and Malcolm A. S. Moore 815

All manuscripts submitted for consideration for publication in BLOOD should be sent to: John W. Adamson, M.D., Editor, BLOOD, University District Building—Room 320, 1107 N.E. 45th Street, Seattle, WA 98105.

The American Society of Hematology certifies that the continuing medical education offering provided by BLOOD, The Journal of the American Society of Hematology, meets the criteria for up to 22 hours of credit in Category 5(a) for the Physician’s Recognition Award of the American Medical Association.

Please note that a processing fee of $50.00 must accompany each manuscript submitted for publication in BLOOD.

- All shipments are packed with dry ice in styrofoam boxes. (Handling Charge for orders under $250.00).
- Shipments within the United States are delivered within 24 hours.
- Plasma can be aliquoted in any amount up to 5 ml at an additional charge of $.50 per vial.
- Special discount prices upon request for standing orders or large volumes.

*Also available* — • FACTORS I, II, V, VII, IX, X, XIII • FACTORS VIII or IX with inhibitor
• Prekallikrein Deficient • Von Willebrand • Passovoy Trait • Kininogen Deficient

*Normal Reference Human Plasma*
