ANNOUNCEMENTS

LEUKEMIA ABSTRACTS
New Grant Continues Availability on Request

The Dr. Scholl Foundation has awarded a grant to The John Crerar Library to provide partial support for the publication and distribution of Leukemia Abstracts, a monthly abstract service covering the world literature on experimental and clinical aspects of leukemia and its treatment. Now in its 31st year of publication, Leukemia Abstracts has been sponsored over the past years by the Lenore Schwartz Leukemia Research Foundation, no longer in existence.

It is the objective of Leukemia Abstracts to provide prompt and wide dissemination of clinical and experimental information on leukemia, for the enhancement of therapy and the prevention of duplication in research efforts. Individuals and organizations engaged in treatment of or research on leukemia may request to be added to the mailing list. A cost-sharing contribution of $20.00 or more is requested from each recipient to help ensure continued publication of the abstracts. Contributions and requests for additional information or sample issues may be directed to Research Information Service, The John Crerar Library, 35 West 33rd St., Chicago, IL 60616.

HAEMONETICS RESEARCH INSTITUTE
TENTH ANNUAL INTERNATIONAL ADVANCE APHERESIS SEMINAR

May 16–17, 1983

SCIENTIFIC DIRECTOR

American Red Cross Blood Services, Tidewater Region, is establishing a research program in conjunction with Eastern Virginia Medical School in July 1983. Specific area of ongoing research includes studies on red cell, platelet and granulocytes, biochemistry, preservation, and immunology. Seeking scientific director to supervise the research division, develop and execute research in blood-related areas. Position will carry faculty appointment and teaching responsibilities. Applicants must have an M.D. or Ph.D. or masters degree or F.I.M.L.S. or equivalent; 5 years full-time experience in research, and a record of publications/research in blood-related topics. Résumé with salary history should be sent to: American Red Cross, Tidewater Region, Personnel Department, P. O. Box 1836, Norfolk, VA, 23501. Affirmative Action Employer.
18TH ANNUAL CONFERENCE ON PRACTICAL, CLINICAL AND LABORATORY ASPECTS OF BLOOD COAGULATION
September 21–23, 1983

2ND ANNUAL ANTIBODY TECHNIQUES WORKSHOP
September 23–25, 1983

Location: Michigan State University, Kellogg Center
Sponsor: Michigan State University, College of Human Medicine
Contact: Joan Martin Allam, (517) 353-7822

8TH ANNUAL SYMPOSIUM ON BLOOD TRANSFUSION,
PRELIMINARY PROGRAM
THE RED CROSS BLOOD BANK GRONINGEN-DRENTHE, GRONINGEN,
THE NETHERLANDS
October 20–21, 1983

Transplantation and Blood Transfusion
Chairman: G. Opelz, Heidelberg

Session I
Principles in Transplantation Practice
a. Organization of a transplant team (C. H. Gips, Groningen)
b. Fundamentals of grafting and rejection (W. L. Ford, Manchester)
c. Basics of matching and compatibility testing (G. F. J. Hendriks, Leiden)
d. Cryopreservation of platelets and granulocytes (A. B. Glassman, Charleston, SC)

Session II
Supportive Hemotherapy
a. Immune modulation (G. G. Persijn, Leiden)
b. The role of lymphocytes in graft-vs.-host disease and its prevention (D. W. van Bekkum, Rijswijk)
c. Infection prevention by selective gut decontamination (H. G. de Vries, Hopsers)
d. The use of a specific immunoglobulin in the prevention of CMV infection (W. Ho, UCLA)
e. Role of interferon in viral infection prevention (Th. C. Merrigan, Stanford, CA)
f. Sense and nonsense of platelet and granulocyte support (J. Hester, Houston, TX)
g. The use of monoclonal T-cell antibodies in the prevention of GvH (G. Opelz, Heidelberg)

Session III
Organ Preservation
a. Donor selection in solid organ transplantation (R. Ploeg, Leiden)
b. Bone marrow volunteer donor organization (D. C. O. James, London)
c. Developments in kidney preservation (G. Kootstra, Maastricht)
d. Developments and limitations in liver preservation (B. Johnson, Cambridge)
e. Preservation of stem cells (J. Goldman, London)
f. Possibilities for purification of bone marrow grafts from leukemic cells (B. Löwenberg, Rotterdam)

Session IV
Specific Organ Transplantation
a. The kidney (P. J. Morris, Oxford)
b. The liver (R. A. F. Krom, Groningen)
c. Allogeneic bone marrow (W. Ho, UCLA)
d. Autologous bone marrow (G. Philips, St. Louis, MN)
e. The heart (N. Shunway, Stanford, CA)

For information and registration, contact Symposium Secretariat, Red Cross Blood Bank, Groningen-Drenthe, Oostersingel 59, 9713 EZ Groningen, The Netherlands, telephone 050-137777.
1984 CONFERENCES IN TUCSON

4th Conference on Human Tumor Cloning
January 8–10

A combination of invited and competitively selected papers, demonstrations and posters will be presented.
Co-Chairmen: Dr. Sydney E. Salmon and Dr. Jeffrey M. Trent
Deadline for submission of abstracts: October 1, 1983

4th International Conference on the Adjuvant Therapy of Cancer
March 21–24

Co-Chairmen: Dr. Stephen E. Jones and Dr. Sydney E. Salmon
Deadline for submission of abstracts: November 1, 1983

For abstract forms or further information on either conference, contact Mary Humphrey, Conference Coordinator, University of Arizona Cancer Center, Tucson, AZ 85724. Telephone: (602) 626-6044.

DAVID A. KARNOFSKY FELLOWSHIP IN CANCER RESEARCH

St. Jude Children’s Research Hospital annually offers a fellowship in memory of Dr. David A. Karnofsky, former Chief of the Medical Oncology Service, Memorial Hospital, and Head of the Division of Chemotherapy Research, Sloan-Kettering Institute. Dr. Karnofsky was a member of the St. Jude Scientific Advisory Board and established worldwide recognition of the importance of chemotherapy in the treatment of cancer.

This fellowship is available to a physician or basic scientist who desires specialized training beyond the postdoctoral level in one of the many areas of cancer research at this institution.

The award is based on academic achievement and recommendations. Annual stipend commensurate with experience.

Deadline for 1984 applications is August 1, 1983. Decision will be made November 1, 1983. Beginning date is July 1, 1984. For further information contact Director, St. Jude Children’s Research Hospital, P.O. Box 318, Memphis, TN 38101.
15th INTERNATIONAL COURSE ON TRANSPLANTATION AND CLINICAL IMMUNOLOGY
Lyon (Domaine des Pins, Charbonnières les Bains)
May 30–June 1, 1983
Theme: Immunosuppression in Transplantation

All aspects of immunosuppression in transplantation will be treated in communications, round-tables, and workshops:
- Azathioprine, steroids, antilymphocyte globulins, thoracic duct drainage
- Cyclosporin A, anti-T lymphocyte monoclonal antibodies, total lymphoid irradiation
- Multicenter trials of new immunosuppressants
- New therapeutic protocols in transplant centers
- Monitoring of the treatment; complications
- Modifications in case of diabetes, bone diseases, second transplants, living donors, children, or according to immune status of recipient

With the participation of E. Dupont, P. Michielsen (Belgium), G. Opelz (Deutschland), P. Hayry (Finland), H. Betuel, J. Brochier, M. Broyer, S. Charhon, J-M. Dubernard, A. Gelet, N. Gribelin, H. Pellet, J-P. Revillard, J-L. Touraine, J. Traeger (France), B. Bradley, P-J. Morris, J-R. Salaman (Great Britain), F. Giacchino, G. Segoloni (Italy), J-J. van Rood (Netherlands), C. Franksson (Sweden), T. Beveridge (Switzerland), N. Ascher, G. Goldstein (USA).

Participants are invited to present posters on immunosuppression in transplantation or on histocompatibility and role of transfusions.

Practical demonstrations will be organized after the course, on June 2, 1983: fine cytology of the urine and following needle aspiration in renal transplant patients (technics, results, diagnostic significance).

Those wishing to attend this course and/or laboratory practical works should write to Dr. R. Triau, Fondation Marcel Mérieux, 17 rue Bourgelat, 69002 Lyon, France.

THIRD ANNUAL LEUKEMIA-LYMPHOMA-MYELOMA CONFERENCE
Sponsored by the American Cancer Society, Florida Division, and the University of South Florida College of Medicine
June 3–4, 1983
Longboat Key, Florida

This year, the Conference topics will include diagnosis and management of childhood and adult leukemias, characterization of lymphocyte populations, and acquired immunodeficiency syndrome (AIDS). The topics will be presented by 12 invited speakers. Informal case presentations are also planned. For further information, please write or call Dr. Henry A. Azar, Laboratory Service (113), James A. Haley Veterans Hospital, 13000 North 30th Street, Tampa, Florida 33612. Telephone: (813) 972–2000, extension 500 or 504.

TUTORIAL ON NEOPLASTIC HEMATOPODIATHOLOGY
A Tutorial on Neoplastic Hematopathology will be held at the Huntington Sheraton Hotel in Pasadena, CA from October 31–November 4, 1983. The Tutorial will be under the direction of Henry Rappaport, M.D.

The registration fee (not including meals or housing) is $800.00. Further information may be obtained by writing Mr. Claude M. Weil, Tutorial Coordinator, c/o International House, University of Chicago, 1414 E. 59th Street, Chicago, IL 60637. Telephone: (312) 753-2277.
SEVENTH ANNUAL CANCER SYMPOSIUM

Sponsored by
Scripps Memorial Hospital Cancer Center
La Jolla, California

October 31–November 2, 1983

Sheraton Harbor Island Hotel
San Diego, California

Guest Speakers
Robert M. Barone, M.D.
Herbert J. Buchsbaum, M.D.
Denis P. Burkitt, M.D.
George P. Canellos, M.D.
John A. Dixon, M.D.
Lawrence H. Einhorn, M.D.
Mark R. Green, M.D.
Leonard L. Gunderson, M.D., M.S.
Richard T. Hoppe, M.D.

Stephen B. Howell, M.D.
Stephen E. Jones, M.D.
Albert A. Moss, M.D.
Saul A. Rosenberg, M.D.
Ivor Royston, M.D.
Philip S. Schein, M.D.
Murray N. Silverstein, M.D., Ph.D.
Peter H. Wiernik, M.D.
Norman Wolmark, M.D.

Lowell S. Young, M.D.

Topics
Emerging Concepts in Oncology
Breast Cancer
Hematological Malignancies

Gastrointestinal Cancer
Gynecological Cancer
Cancer Update

For information and registration, write to Nomi Feldman, Conference Coordinator, 3770 Tansy, San Diego, CA 92121.

Registration Fee: $300.

Accreditation: 22 hours Category 1 CME Credit.
J. L. (DOOLEY) LEVY FELLOWSHIP IN CANCER MEDICINE

St. Jude Children’s Research Hospital has established an annual fellowship in memory of Mr. J. L. (Dooley) Levy, founder and president of the Youngtown Children’s Stores in Memphis, Tennessee. Mr. Levy is most remembered for his love and devotion to his family, his many friends, and all of the children who frequented his stores.

The fellowship is available to a physician who desires clinical and laboratory training in one of the many areas of cancer medicine (oncology) represented at this center.

The award is based on scientific or clinical achievement and recommendations, and the promise of a productive career in cancer research. Annual stipend commensurate with experience.

Deadline for 1984 applications is August 1, 1983. Decision will be made November 1, 1983. Beginning date is July 1, 1984. For further information contact Director, St. Jude Children’s Research Hospital, P.O. Box 318, Memphis, TN 38101.

LEON JOURNEY FELLOWSHIP IN BIOMEDICAL RESEARCH

St. Jude Children’s Research Hospital offers an annual fellowship in memory of Dr. Leon Journey, whose scientific diligence, coupled with a quick, dry wit, endeared him to his associates. Dr. Journey served St. Jude Hospital as a cell biologist for ten years, using electron microscopy and cell culture to answer questions in hematology, cellular pharmacology, and basic cell biology.

This fellowship is available to a young physician or basic scientist who desires specialized training in one of the many areas of biomedical research available at this institution.

The award is based on scientific achievement and recommendations. Annual stipend commensurate with experience.

Deadline for 1984 applications is August 1, 1983. Decision will be made November 1, 1983. Beginning date is July 1, 1984. For further information contact Director, St. Jude Children’s Research Hospital, P.O. Box 318, Memphis, TN 38101.

3142 J Street
Sacramento, California 95816

MEDICAL STAFF FELLOWSHIPS IN HEMATOLOGY

Fellowship available beginning July 1, 1983 or 1984 for two years in clinical and laboratory research involving immunohematology, platelet physiology and biochemistry, and blood coagulation. Candidates should have one or more years of residency in medicine. Medical Staff Fellows receive an initial salary of $30,000, with increments of $2,000 per year up to a maximum salary of $34,000. Moving and travel expenses are paid and health care is free.

Contact: Dr. N. Raphael Shulman, Clinical Hematology Branch, NIADDK, National Institutes of Health, Public Health Service, Building 10, ACRF, Room 8C101, Bethesda, MD 20205 (301) 496-4787.

Terumo quality, point

Do you think one blood bag is pretty much like the next? Or that it is possible for one brand to be noticeably better than the others?

It’s not only possible. It’s Terumo. A complete line of blood bags with a difference.

It starts with a commitment to quality. And continues until you’re completely satisfied.

Example: Our new collection bag with CPDA-1 solution features our ultra thinwall needle, famous for comfort, consistent sharpness and smooth penetration—time after time.

That’s just one common denominator in our family of collection bags and plasmapheresis systems. Other features include: The unique TERUFLEX® Cliktip for fast, easy opening of the pathway between bags. Tamperproof, single pull-tab outlet covers to assure sterility and simplify opening. The inline needle for quick, easy sampling of donor blood. All Terumo blood bags are made from specially formulated materials to provide maximum compatibility with blood. And they’re designed to be durable in use.

There are many blood bags to choose from. However, none of our competitors have so many points in their favor. For transfer bags, plasmapheresis systems and collection bags with CPD or CPDA-1 solution, the choice is Terumo.
INTRODUCING
A new dimension in coagulation testing

Operating twice as fast as other comparable instruments. Performs 48 PTs in 9 minutes or less, 320 determinations in 1 hour or less. Runs PTs and APTTs simultaneously.

Pre-programmed parameters including fibrinogens with the option to modify.

PAUSE function accommodates STATs without loss of samples in process.

Permits user-control of virtually all parameters — even pump volumes; choice of 3, 4 or 5 minute activation times for APTTs.

Records all test parameters and prints out as many copies as necessary until start of next run.

Deprimal pump system minimizes waste of reagents.

COAG-A-MATE® X-2
Doubles throughput on all routine tests without wasting reagents or disposables

GENERAL DIAGNOSTICS
Division of Warner-Lambert Company. Morris Plains, New Jersey 07960
