BLOOD
The Journal of
The American Society of Hematology

VOL. 63, NO. 1 JANUARY 1984

CONTENTS

Fibrinogenolytic Afibrinogenemia After Envenomation by Western Diamondback Rattlesnake (Crotalus atrox) Andrei Z. Budzynski, Bharat V. Pandya, Ronald N. Rubin, Barbara S. Brizuela, Tomasz Soszka, and Gwendolyn J. Stewart 1

Determination of Functional Levels of Protein C, an Antithrombotic Protein, Using Thrombin–Thrombomodulin Complex Philip C. Comp, Randal R. Nixon, and Charles T. Esmon 15

Time Course of Reversibility of Accelerated Fibrinogen Disappearance in Diabetes Mellitus: Association With Intravascular Volume Shifts Robert L. Jones, Lois Jovanovic, Steven Forman, and Charles M. Peterson 22

Amidolytic Assay of Human Factor XI in Plasma: Comparison With a Coagulant Assay and a New Rapid Radioimmunoassay Cheryl F. Scott, Dipali Sinha, Frances S. Seaman, Peter N. Walsh, and Robert W. Colman 42

Therapy of Essential Thrombocythemia With Thiotepa and Chlorambucil Delvyn C. Case, Jr. 51

Potential Role of Platelets in the Pathogenesis of Tumor Metastasis Paulette Mehta 55

Increased HbF in Sickle Cell Anemia Is Determined by a Factor Linked to the S Gene From One Parent Paul F. Milner, Johanna Döbler Leibfarth, Janet Ford, Betty P. Barton, Hernan E. Grenett, and Fred A. Garver 64

Leukocyte Migration Inhibition of Buffy Coats From Patients With Autoimmune Thrombocytopenic Purpura When Exposed to Normal Platelets: Modulation by Transfer Factor W. Borkowsky and S. Karpatkin 83

Phagolysosomal pH of Human Neutrophils Petr Cech and Robert I. Lehrer 88

Mechanisms for the Oxidation of Reduced Gluthathione by Stimulated Granulocytes Arthur L. Sagone, Jr., Rose Marie Husney, M. Sue O’Dorisio, and Earl N. Metz 96

Effect of Cell Cycle Position on Dexamethasone Binding by Mouse and Human Lymphoid Cell Lines: Correlation Between an Increase in Dexamethasone Binding During S Phase and Dexamethasone Sensitivity Clark W. Distelhorst, Barbara M. Benotto, and Robert A. Bergamini 105

Lithium Stimulation of Murine Hematopoiesis in Liquid Culture: An Effect Mediated by Marrow Stromal Cells Peter J. Quesenberry, Michael A. Coppola, Richard J. Gualtieri, Philip M. Wade, Zengxuan Song, Michael A. Doukas, Charlotte E. Shideler, Donald G. Baker, and Elizabeth H. McGrath 121

(Continued on following page)
Adhesion of Platelets to Human Artery Subendothelium: Effect of Factor VIII–von Willebrand Factor of Various Multimeric Composition

Jan J. Sixma, Kjell S. Sakariassen, Nel H. Beeser-Visser, Mieke Ottenhof-Rovers, and Piet A. Bolhuis

Phenotypic Analysis of Established Diffuse Histiocytic Lymphoma Cell Lines Utilizing Monoclonal Antibodies and Cytochemical Techniques

Jane N. Winter, Daina Variakojis, and Alan L. Epstein

Platelet Functions and Energy Metabolism in a Patient With Hexokinase Deficiency

Jan-Willem N. Akkerman, Gert Rijksen, Gertie Gorter, and Gerard E. J. Staal

Quantification of Platelet-Bound IgG by 125I-Staphylococcal Protein A in Immune Thrombocytopenic Purpura and Other Thrombocytopenic Disorders

George M. Shaw, John Axelson, J. Gertrude Maglott, and Albert F. LoBuglio

Effect of Transfusion Therapy on Arteriographic Abnormalities and on Recurrence of Stroke in Sickle Cell Disease

Marie Olivieri Russell, Herbert I. Goldberg, Andrew Hodson, Haewon C. Kim, Joanne Halus, Martin Reivich, and Elias Schwartz

Transient Versus Permanent Expression of Cancer-Related Glycopeptides on Normal Versus Leukemic Myeloid Cells Coinciding With Marrow Egress

Wim van Beek, Abraham Tulp, Jan Bolscher, Geke Blanken, Klaas Roozendaal, and Mieke Egbers

Two Distinct Categories of Warm Autoantibody Reactivity With Age-Fractionated Red Cells

Donald R. Branch, Ira A. Shulman, Anita L. Sy Siok Hian, and Lawrence D. Petz

The Role of Sialic Acid in the Activation of Platelets by Wheat Germ Agglutinin

Pankaj Ganguly and Nancy G. Fossett

The Oligosaccharide of Human Thrombin: Investigations of Functional Significance

McDonald K. Horne III and Harvey R. Gralnick

Specific Globin mRNAs in Human Erythroleukemia (K562) Cells

Carl W. Miller, Katherine Young, Dominique Dumenil, Blanche P. Alter, J. Matthew Schofield, and Arthur Bank

Perturbations in the Erythroid Marrow Progenitor Cell Pools May Play a Role in the Augmentation of HbF by 5-Azacytidine

Ana T. Torrealba-de Ron, Thalia Papayannopoulou, Melissa S. Knapp, Marlene Feng-Ruen Fu, Glen Knitter, and George Stamatoyannopoulos

Primary Therapy of Acute Promyelocytic Leukemia: Results of Amsacrine- and Daunorubicin-Based Therapy

Zalmen Arlin, Sanford Kempin, Roland Mertelsmann, Timothy Gee, Claudia Higgins, Suresh Jhanwar, R. S. K. Chaganti, and Bayard Clarkson

Reduced Tocopherol Content of B Cells From Patients With Chronic Lymphocytic Leukemia

H. J. Kayden, L. Hatam, M. G. Traber, M. Conklyn, L. F. Liebes, and R. Silber

Left Shift in the Peripheral Blood Count at Diagnosis in Acute Lymphocytic Leukemia is Significantly Correlated With Duration of Complete Remission

B. J. Shen, H. Ekert, G. P. Tauro, and A. Balderas

Allogeneic Bone Marrow Transplantation as Treatment for Accelerating Chronic Myelogenous Leukemia

Philip B. McGlave, Diane C. Arthur, Daniel Weisdorf, Tae Kim, Anne Goldman, David D. Hurd, Norma K. C. Ramsay, and John H. Kersey

Localization of the Human c-sis Oncogene in Ph1-Positive and Ph1-Negative Chronic Myelocytic Leukemia by In Situ Hybridization

Claus R. Bartram, Annelies de Klein, Anne Hagemeijer, Gerard Grosveld, Nora Heisterkamp, and John Groffen
CONTENTS

(Contents continued)

In Vivo Interaction of von Willebrand Factor With Platelets Following Cryoprecipitate Transfusion in Platelet-Type von Willebrand's Disease ................. Jonathan L. Miller, Bruce D. Boselli, and John M. Kupinski 226

Cytosolic Free Calcium Changes Induced by Chemotactic Peptide in Neutrophils From Patients With Chronic Granulomatous Disease .................. P. Daniel Lew, Claes Wolheim, Reinhard A. Seger, and Tullio Pozzan 231

Cryopreservation of Enucleated Human Neutrophils (PMN Cytoplasts) .................. Alwin A. Voetman, Annet A. M. Bot, and Dirk Roos 234

Nonspecific Esterases of Leukemia Cell Lines: Evidence for Activation of Myeloid-Associated Zymogens in HL-60 by Phorbol Esters ......................... Joseph Yowno, Jane Walsh, Gerald Kornatowski, Donna O'Connor, and S. Anand Kumar 238
