ANNOUNCEMENTS

6TH INTERNATIONAL SYMPOSIUM ON PREVENTION AND DETECTION OF CANCER

Vienna, Austria
November 26–29, 1984

Sponsored by the International Society for Preventive Oncology, World Health Organization, Austrian Cancer Society—Austrian Cancer League, and Association of Clinical Scientists—USA.

The program includes overview lectures, panels, poster sessions, scientific exhibits, and special workshops designed for critical appraisal of current data. Discussions are to concentrate on actions to be taken, and on the implementation of existing knowledge for effective cancer control by primary and secondary prevention. Reports are to present progress in multifactorial etiology of oncogenesis, molecular biology, identification of high risk groups, tumor susceptibility, and clinical and laboratory manifestations of cancer, including tumor markers. Participants include the clinician, epidemiologist, pathologist, experimental oncologist, immunologist, socioeconomist, educator, and members of the health care team.

Abstracts of presentations are invited by June 15, 1984. Abstracts and program appear in Cancer Detection & Prevention 1984:7(6). Award(s) for outstanding investigation(s) presented by ISPO. The symposium is accredited for 32 CME credit hours. Contact: the International Society for Preventive Oncology, 207 East 85th St., Suite 303, New York, NY 10028, USA. Telephone: (212) 534-4991; toll-free in USA, 1 (800) 527-0297; outside Europe, (USA-214)392-3663; in Europe, (AUSTRIA 43-222)52-0544.

16TH INTERNATIONAL COURSE ON TRANSPLANTATION AND CLINICAL IMMUNOLOGY

Euromotel N 7, Domaine des Pins
Charbonnières les Bains
Lyon, France
May 28–30, 1984

TRANSPLANTATION FROM A LIVING DONOR

Themes

Medical, Immunologic and Psychologic Selection of the Living Donor
Surgery and Complications in the Living Donor (Kidney and Pancreas Transplantation)
Long-Term Sequellae in the Donor
Juridic and Ethical Aspects
Specific and Nonspecific Blood Transfusions in the Recipient
Immunosuppressive Treatment in the Recipient
Medical and Surgical Follow-Up
Arguments in Favor of or Against the Choice of a Living Donor for a High Risk Recipient
Related or Unrelated Living Donors in Bone Marrow Transplantation
Comparison of Results in Recipients of a Transplant From a Twin, a Living Donor or a Cadaver Donor
Rejection Crises after a Kidney Transplant From an HLA-Identical Related Donor

Participants are invited to present posters on Transplantation.
Those wishing to attend this course should write to Dr. R. Triau, Fondation Marcel Mérieux, 17 rue Bourgelat, 69002 Lyon, France.
The Organizing Committee.
CLINICAL HEMATOLOGY AND ONCOLOGY: 1985

Sheraton Harbor Island East Hotel
San Diego, CA
February 18–20, 1985

Sponsored By
Scripps Clinic and Research Foundation
La Jolla, CA

Program Chairman: Ernest Beutler, M.D.—Scripps Clinic and Research Foundation

Faculty
Ernest Beutler, M.D.
Dennis A. Carson, M.D.
Martin J. Cline, M.D.
Lawrence H. Einhorn, M.D.
Mark R. Green, M.D.
Ruth Grobstein, M.D.
Laurence A. Harker, M.D.
Alexandra Levine, M.D.
Robert McMillan, M.D.
Samuel Rapaport, M.D.
John E. Ultmann, M.D.
Shobhana Vora, M.D.
Theodore S. Zimmerman, M.D.

Topics Include
Diagnosis and Treatment of Thromboembolic Disease
Acute Nonlymphocytic Leukemia
Myeloproliferative Disorders
Adjuvant Chemotherapy for Breast Cancer
Monoclonal Antibody Therapy

Registration Fees: $290.00 for the entire course, $110.00 per day, and $90.00 for Residents/Fellows (entire course). "Lunch with the Professor," scheduled each day, is included in the registration fee.

For additional information, contact Dianne Tisue, Department of Academic Affairs, Box 400S, Scripps Clinic and Research Foundation, 10666 North Torrey Pines Road, La Jolla, CA 92037. Telephone: (619) 457-8556.
PLATELET RADIOLABELING STUDY GROUP

A meeting of an Ad Hoc Study Group to develop a standard protocol for radiolabeling stored platelet concentrates with Chromium 51 and Indium 111 will be held May 8, 1984 at the American Red Cross Blood Services, Washington Region, Washington, DC, from 8:00 a.m.–5:00 p.m. The meeting is open to the public. Interested parties must register; there is no fee.

Contact Edward L. Snyder, M.D., Blood Bank, Yale-New Haven Hospital, 20 York Street, New Haven, CT 06504. Telephone: (203) 785-2442.

FOURTH ANNUAL LEUKEMIA-LYMPHOMA-MYELOMA CONFERENCE

Longboat Key, FL
June 1–2, 1984

The aim of this conference, organized by the American Cancer Society, Florida Division, is to provide physicians interested in hemopoietic neoplasms with the opportunity of acquiring new information in this area, and of interacting with faculty members from the three Florida medical schools, as well as guest speakers from other medical centers. This year’s conference will focus on multiple myeloma and other monoclonal gammopathies, hybridomas and biomedical applications of monoclonal antibodies. Category I credit is offered. For further information, contact Henry A. Azar, M.D., Laboratory Service (113), J. A. Haley Veterans Hospital, Tampa, FL 33612. Telephone: (813) 972-2000, extension 504.

FIRST LSA NATIONAL SYMPOSIUM

MGM Grand Hotel
Reno, NV
March 14–16, 1985

Sponsored by the Leukemia Society of America

Inaugural Conference to be Offered Annually
Forum for the Multi Disciplines Related to Leukemia
An Informal Link Between Basic Scientist and Clinician
Bridging the Gap From Bench Work to Practice at the Bedside

For additional details contact the LSA Medical Conference, c/o Bostrom Management Corporation, 435 N. Michigan Avenue, Chicago, IL 60611.

WORLD HEMOPHILIA AIDS CENTER

The World Hemophilia AIDS Center (WHAC), an international clearinghouse of information about AIDS and hemophilia, has been established at the Orthopaedic Hospital, Los Angeles, CA. WHAC, established under the auspices of the World Federation of Hemophilia and Orthopaedic Hospital, will serve as an international case surveillance center for AIDS or suspected AIDS cases in hemophilia patients. The Center also will distribute information about AIDS to concerned individuals and to organizations.

For further information, please contact Shelby L. Dietrich, M.D., World Hemophilia AIDS Center, Orthopaedic Hospital, 2400 South Flower, Los Angeles, CA 90007.
TUTORIAL ON NEOPLASTIC HEMATOPATHOLOGY

A tutorial on neoplastic hematopathology will be held at the Huntington Sheraton Hotel in Pasadena, CA on September 17–21, 1984. The Tutorial will be under the direction of Henry Rappaport, M.D.

The registration fee (not including meals or housing) is $800.00.

Further information may be obtained by writing Mr. Claude M. Weil, Tutorial Coordinator, c/o International House, University of Chicago, 1414 E. 59th Street, Chicago, IL 60637. Telephone: (312) 753-2277.

13TH ANNUAL MEETING OF THE INTERNATIONAL SOCIETY FOR EXPERIMENTAL HEMATOLOGY

The 13th Annual Meeting of the International Society for Experimental Hematology will be held at the Atlanta Downtown Marriott Hotel in Atlanta, GA on August 12–16, 1984.

Further information may be obtained by contacting W. Ralph Vogler, M.D., Meeting Chairman, Emory University, Woodruff Building, Room 718, Atlanta, GA 30322. Telephone: (404) 329-5830.

TRANSPLANTATION PROCEEDINGS
An Official Publication of the Transplantation Society
The Japan Society for Transplantation
Read this like your life depends on it.

Breast cancer found early and treated promptly has an excellent chance for cure. About a week after your period practice this self-examination.

1. In bath or shower.
   Fingers flat, move opposite hand gently over each breast. Check for lumps, hard knots, thickening.

2. In front of a mirror.

3. Lying down.
   Pillow under right shoulder, right hand behind head. Left hand fingers flat, press gently in small circular motions starting at 12 o’clock. Make about three circles moving closer to and including nipple. Repeat on left.

INTERFERONS
UCLA Symposium on Molecular and Cellular Biology, Volume XXV, 1982
Edited by THOMAS C. MERIGAN and ROBERT M. FRIEDMAN
This volume contains the proceedings of a major international conference on the Chemistry and Biology of Interferons: Relationships to Therapeutics, held in March 1982. The topics discussed include 1) the recombinant DNA production of interferon, 2) the biology of interferons, 3) factors relevant to the clinical application of interferons, and 4) clinical studies of interferon. This volume also includes papers from the forty-four speakers at the nine plenary sessions and abstracts from the workshop participants.
1982, 481 pp., $42.00 ISBN: 0-12-491220-6

CHEMICAL INDUCTION OF CANCER
STRUCTURAL BASES AND BIOLOGICAL MECHANISMS
JOSEPH C. ARCOS, YIN-TAK WOO, and MARY F. ARGUS;
with the collaboration of DAVID Y. LAI
Volume 3A/ALIPHATIC CARCINOGENS
Focusing on the relationship between chemical structure and carcinogenicity, this volume presents extensive discussions of the metabolic aspects and mechanisms of carcinogenic action; physico-chemical properties; mutagenicity and teratogenicity; modification of carcinogenicity by endogenous or exogenous factors; environmental formation and occurrence; and potential human exposure.
Volume 3A: 1982, 752 pp., $78.00 ISBN: 0-12-059303-3

THE CELL NUCLEUS
Volume X: rDNA, Part A
Volume XI: rDNA, Part B
Volume XII: rDNA, Part C
Edited by HARRIS BUSCH and LAWRENCE ROTHBLUM
Since the publication of “The Nucleolus” in 1970, tremendous advances have been made on the description, sequences, and analysis of controls of the gene coding for ribosomal RNA and ribosomal proteins. These three volumes review this remarkable progress as of 1982 and point to the areas for future research.
Volume X first discusses the ribosomal RNA genes of Escherichia coli, algae, fungi, Dictyostelium and Physarum, and other protozoans. The expert contributors also deal with special features of the rRNA product of Tetrahymena and review the rDNA of higher organisms, including sea urchins, insects, and humans. Later chapters present recent developments in structural analysis of 18 S rRNA and rDNA, the evolutionary patterns of 28 S rDNA, and the mitochondrial rDNA. Volume XI and XII cover the 5 S DNA, nuclear, and other rDNA-containing chromatin as visualized by light and electron microscopy, and the organization of rDNA in chromatin. These volumes also present the important subjects of transcription and transcriptional control of the rDNA genes, the amplification of rDNA, and the controls of ribosomal genes.
Volume X: 1982, 448 pp., $65.00 ISBN: 0-12-147610-3
Volume XI: 1982, 328 pp., $45.00 ISBN: 0-12-147611-1
Volume XII: 1982, 280 pp., $42.00 ISBN: 0-12-147612-x

TERATOCARCINOMA AND EMBRYONIC CELL INTERACTIONS
Edited by TAKASHI MURAMATSU, GABRIEL GACHELIN, A. A. MOSCONA, and YOJI IKAWA
This monograph consists largely of papers presented at the First Hiei International Symposium on Teratocarcinoma and the Cell Surface held in Kyoto, Japan in October 1980. Editorial notes covering other aspects of the application of the teratocarcinoma cell system have been included, so that the volume can serve as a summary of current knowledge from both the biological and molecular viewpoints.
1982, 344 pp., illus., $41.00 ISBN: 0-12-511180-0

TUMOR CELL HETEROGENEITY
ORIGINS AND IMPLICATIONS
Edited by ALBERT H. OWENS, JR., DONALD S. COFFEY, and STEPHEN B. BAYLIN
A Volume in the BRISTOL-MYERS CANCER SYMPOSIA Series
Based on the proceedings of the Fourth Annual Bristol-Myers Symposium on Cancer Research, held at the Johns Hopkins Oncology Center in December 1981, this volume presents the latest research on the genetic and epigenetic mechanisms involved in tumor cell heterogeneity. It emphasizes the implications of these mechanisms for the pathogenesis of neoplastic disorders and their practical clinical management. The contributions by leading authorities from different sectors of the cancer research community provide essential reading for those seeking a complete understanding of neoplasia.
1982, 520 pp., $49.50 ISBN: 0-12-531520-1

CELL SEPARATION
METHODS AND SELECTED APPLICATIONS
VOLUME 1
Edited by THOMAS C. PRETLOW II and THERESA P. PRETLOW
This authoritative treatise presents current methods for obtaining highly purified, viable cells. Several techniques for separating a broad range of cells are covered, including cells from cancers, the gastrointestinal tract, lymphoid tissues, marrow, and the pituitary. Emphasizing the practical aspects of cell separation, this volume is directed toward a heterogeneous audience: experimental oncologists, hematologists, cell biologists, endocrinologists, and others who want to increase their understanding of the use of methods for cell separation.
1982, 352 pp., $35.00 ISBN: 0-12-564501-5

B AND T CELL TUMORS:
BIOLOGICAL AND CLINICAL ASPECTS
UCLA Symposium on Molecular and Cellular Biology, Volume XXIV, 1982
Edited by ELLEN S. VITTETA
This international conference, brought together 400 researchers studying tumor biology and clinical oncology as applied to lymphoid cells. This volume documents the proceedings in which scientists and clinicians discussed questions related to the origin and classification of tumors, normal clones of B and T cell tumors, differentiation of T and B cell tumors, regulation of tumor growth, and tumor therapy. The articles demonstrate the enormous advances that have been made in applying the new technologies of monoclonal antibodies, cell cloning/long-term culture, and genetic analysis of lymphoid tumors.
1982, 583 pp., $52.00 ISBN: 0-12-722380-0

Essential reading for the hematologist...

PROGRESS IN HEMATOLOGY

VOLUME XIII

Edited by ELMER B. BROWN, M.D.

For more than 25 years, Progress in Hematology has provided hematologists with comprehensive reviews of important clinical and research topics in the field. Volume XIII continues that tradition of excellence, examining recent developments in such areas as sickle cell anemia, the measurement of platelet-bound immunoglobulins, platelet-derived growth factor, and inherited platelet disorders.

1983, 368 pp., $42.00

Introducing something extra from Cutter Biological: the Nutricel™ Additive Blood Bag System. The new blood collection and storage system that gives you extra red cell viability... extra plasma... and extra flexibility in blood management. Now you can pack red cells to an 85-90% hematocrit — for 15-20% extra plasma — without sacrificing viability. Start with extra nutrients, like dextrose (a double dose) in the collection bag. After processing, add the Nutricel Additive Solution: glucose, adenine and saline. The nutrients improve viability for the 35 days storage; saline reduces red cell viscosity to a transfusion-ready product. Finally, the Nutricel procedure can be tailored to match your specific blood management practices. Ask your Cutter Representative about the Nutricel Additive Blood Bag System and how it adds up to better blood products and extra plasma for you.
Meet a new level of sophistication for hematology analysis. It's the Sysmex CC-800 with PDA-410 and the IBM PC. The beauty of the CC-800 System can be summed up in two simple statements.

**Smart.**

Intelligence is the core of the CC-800 System.

From one sample you get incredibly comprehensive analysis, including WBC, RBC, and Pt histograms, along with 23 parameter output. Every sample can be monitored through any of three quality control programs, including Bull's Moving Average, Hoffman's Average of Normals, and Delta Check. Control blood is monitored via a Control Data Program with 6 tri-level files. All Q.C. programs include CRT display and print out of Levey Jennings Charts.

The CC-800 System even includes the ability to enter patient demographics, run summary reports, and use a maintenance file.

**Never mind.**

The CC-800 System works hard to eliminate the common problems that reduce productivity. An autosampler turntable mixes, aspirates, dilutes, and analyzes 100 samples in one easy operation. Simply load, "start," and walk away. Sample results are automatically stored in memory for future reference.

If the analyzer detects an abnormality, a recount is initiated automatically. Or, an audible alarm will sound for tech assistance. And, most other routine problems are eliminated thanks to low maintenance requirements, quick start-up/shutdown, and automatic calibration.

The CC-800 System from Sysmex is supported by American Scientific Products' extensive nationwide service network and includes reagents and controls.

For more information on the CC-800 System, contact your local American S/P representative, or write: American Scientific Products, 1430 Waukegan Road, McGaw Park, IL 60085. Telephone 312/689-8410.
