CONTENTS

Immunologic Injury to Vascular Endothelial Cells: Effects on Release of Prostacyclin
Jonathan C. Goldsmith and John J. McCormick 984

Human Platelet Fibrinogen Gamma Chain Structure ............................. M. W. Mosesson, G. A. Homandberg, and D. L. Amrani 990

Factor VIII-von Willebrand Factor Requires Calcium for Facilitation of Platelet Adherence
Kjell S. Sakariassen, Mieke Ottenhof-Rovers, and Jan J. Sixma 996

Fibrin Formation, Fibrinopeptide A Release, and Platelet Thrombus Dimensions on Subendothelium
Exposed to Flowing Native Blood: Greater in Factor XII and XI Than in Factor VIII and IX
Deficiency ............................. Harvey J. Weiss, Vincent T. Turitto, William J. Vicic, and Hans R. Baumgartner 1004

Proliferation and Differentiation of Human Myeloid Leukemic Cells in Immunodeficient Mice: Electron
Microscopy and Cytochemistry .................................. Emilio A. Machado, David A. Gerard, Carmen B. Lozzio,
Bismarck B. Lozzio, James R. Mitchell, and David W. Golde 1015

Heavy Chain Immunoglobulin Gene Rearrangement in Acute Nonlymphocytic Leukemia
Ugo Rovigatti, Joseph Mirro, Geoffrey Kitchingman, Gary Dahl, Judith Ochs, Sharon Murphy,
and Sanford Stass 1023

Cytogenetic Studies on Patients With Chronic T Cell Leukemia/Lymphoma
Y. Ueshima, J. D. Rowley, D. Variakojis, J. Winter, and L. Gordon 1028

A Randomized Comparison of Postremission Therapy in Acute Myelogenous Leukemia: A Southeastern
Cancer Study Group Trial .................................................. William R. Vogler, Elliott F. Winton, David S. Gordon,
Marilyn R. Raney, Bette Go, and Leo Meyer 1039

Red Cell Membrane and Cation Deficiency in Rh Null Syndrome... Samir K. Ballas, Margaret R. Clark,
Narla Mohandas, H. F. Colfer, M. S. Caswell, M. O. Bergren, H. A. Perkins, and S. B. Shohe 1046

A Role of Sulfhydryl Groups in Granulocyte Aggregation............ Eric H. Kraut and Arthur L. Sagone, Jr. 1056

Increases in Circulating Megakaryocyte Growth-Promoting Activity in the Plasma of Rats Following
Whole Body Irradiation ........................................... Masayoshi Miura, Carl W. Jackson, and Shirley A. Lyles 1060

Phenotypically and Functionally Distinct Subpopulations of Human Lymphocytes With T Cell Markers
Also Exhibit Different Cytochemical Patterns of Staining for Lysosomal Enzymes
Alan Landay, Loran T. Clement, and Carlo E. Grossi 1067

Prognostic Relevance of Cellular Morphology in Multiple Myeloma .............. Elke Fritz, Heinz Ludwig,
and Michael Kundi 1072

Cyt fluorometric Detection of B Cell Clonal Excess: A New Approach to the Diagnosis of B Cell
Lymphoma .............................................................. David S. Weinberg, Geraldine S. Pinkus, and Kenneth A. Ault 1080

Speciation in the Baboon and its Relation to γ-Chain Heterogeneity and to the Response to Induction of
HbF by 5-Azacytidine.............................................. Joseph DeSimone, W. A. Schroeder, Joan B. Shelton,
J. Roger Shelton, Zenaida Espineuva, Van Huynh, Lemuel Hall, and David Zwiers 1088

(Continued on following page)
Glutathione-Dependent Protection Against Oxidative Damage of the Human Red Cell Membrane

S. Fujii, G. L. Dale, and E. Beutler

An Effective Therapy for Both Undifferentiated (Including Burkitt's) Lymphomas and Lymphoblastic Lymphomas in Children and Young Adults

Lethal Graft-Versus-Host Disease: Modification With Allogeneic Cultured Donor Cells

Peter Mauch, Jeffrey M. Lipton, Brian Hamilton, Jane Obbagy, Michelle Kudisch, David Nathan, and Samuel Hellman

In Vitro Cytodestruction of Human Leukemic Cells Using Murine Monoclonal Antibodies and Human Complement

Daniel E. Stepan, Richard M. Bartholomew, and Tucker W. LeBien

Polymorphic and Monomorphic HLA-DR Determinants on Human Hematopoietic Progenitor Cells

J. H. Frederik Falkenburg, Jan Jansen, Nelleke van der Vaart-Duinkerken, Willemien F. J. Veenhof, Jacoba Blotkamp, Henriette M. Goselink, Jannie Parlevliet, and Jon J. van Rood

A Morphologic and Immunologic Study of the Large Granular Lymphocyte in Neutropenia With T Lymphocytosis

The Production of Granulocyte-Monocyte Colony-Stimulating Activity by Isolated Human T Lymphocyte Subpopulations

Paul J. Hesketh, Richard Sullivan, C. Robert Valeri, and Laura A. McCarroll

Multiinstitution Study of Non-Hodgkin's Lymphomas Using Frozen Section Immunoperoxidase: The Southeastern Cancer Study Group Experience

Michael J. Borowitz, Stephanie Newby, Russell K. Brynes, John B. Cousar, Clarence C. Whitcomb, John D. Crissman, Gerald E. Byrne, Jr., and Robert D. Collins

Involvement of Spermidine in Proliferation and Differentiation of Human Promyelocytic Leukemia Cells

M. Sugiura, T. Shafman, T. Mitchell, J. Griffin, and D. Kufe

The Elevation of Blood Levels of Zinc Protoporphyrin in Mice Following Whole Body Irradiation

T. L. Walden, P. S. Draganac, and W. R. Farkas

Evidence for the Presence of CFU-E With Increased In Vitro Sensitivity to Erythropoietin in Sickle Cell Anemia

R. Pennathur-Das, E. Alpen, E. Vichinsky, J. Garcia, and B. Lubin

Cytogenetic Studies of Early Myeloid Progenitor Compartments in Ph1-Positive Chronic Myeloid Leukemia. II. Long-Term Culture Reveals the Persistence of Ph1-Negative Progenitors in Treated as Well as Newly Diagnosed Patients

Jan D. Dubé, Kagmar K. Kalousek, Laure Coulombel, Chander M. Gupta, Connie J. Eaves, and Allen C. Eaves

An Immunotoxin With Therapeutic Potential in T Cell Leukemia: WT1-Ricin A

Elevated Low Density Lipoprotein Receptor Activity in Leukemic Cells With Monocytic Differentiation

Sigurd Vitos, Gösta Gahrton, Åke Öst, and Curt Peterson

Aberrant Sialylation of Granulocyte Membranes in Chronic Myelogenous Leukemia

M. A. Baker, R. N. Taub, C. H. Whelton, and A. Hindenburg

Glucose-6-Phosphate-Dehydrogenase–Deficient Erythrocytes Have an Impaired Shape Recovery Mechanism

Eytan Alhanaty, Michael Snyder, and Michael P. Sheetz

Cell Membrane Shape Control—Effects of Chloromethyl Ketone Peptides

Eytan Alhanaty and Michael P. Sheetz

(Continued on following page)
CONTENTS

(CONTENTS continued)

Clinical Relevance of Immunologic Phenotype in Diffuse Large Cell Lymphoma
Sandra J. Horning, Reuben S. Doggett, Roger A. Warnke, Ronald F. Dorfman, Richard S. Cox, and Ronald Levy 1209

Demonstration of In Situ Fibrin Degradation in Pathologic Thrombi
Charles W. Francis, Raymond E. Markham, Jr., and Victor J. Marder 1216

Interdigitative Coupling of Presumptive Hematopoietic Stem Cells to Macrophages in Endocloned Marrow Colonies.................................Richard H. Lambertsen 1225

Hyperleukocytosis and Leukostasis: Common Features of Childhood Chronic Myelogenous Leukemia
Jacob M. Rowe and Marshall A. Lichtman 1230

The Detection of Human T Cell Leukemia Virus Proviral DNA and Its Application for Classification and Diagnosis of T Cell Malignancy...............................Kazunari Yamaguchi, Motoharu Seiki, Mitsuaki Yoshida, Hiromichi Nishimura, Fumio Kawano, and Kiyoshi Takatsuki 1235

CONCISE REPORTS

Prognostic Significance of Immunologic Phenotype in Hairy Cell Leukemia
Jan Jansen, Henrica R. E. Schuit, Jo Hermans, and Willy Hijmans 1241

The Use of Radiolabeled and Fluorescein-Labeled Antiglobulins in Assays to Predict Platelet Transfusion Outcome.................................Russell Ware, Emily G. Reisner, and Wendell F. Rosse 1245

Micropipette Aspiration of Human Blood Platelets: A Defect in Bernard-Soulier’s Syndrome
James G. White, Steven M. Burris, Duane Hasegawa, and Margaret Johnson 1249

The Rare α-Thalassemia-1 of Blacks is a α-Thalassemia-1 Associated With Deletion of All α- and ζ-Globin Genes .........................A. E. Felice, M. P. Cleek, K. McKie, V. McKie, and T. H. J. Huisman 1253

All manuscripts submitted for consideration for publication in BLOOD should be sent to: John W. Adamson, M.D., Editor, BLOOD, University District Building—Room 320, 1107 N.E. 45th Street, Seattle, WA 98105.

Please note that a processing fee of $50.00 must accompany each manuscript submitted for publication in BLOOD.

The American Society of Hematology certifies that the continuing medical education offering provided by BLOOD, The Journal of the American Society of Hematology, meets the criteria for up to 22 hours of credit in Category 5(a) for the Physician’s Recognition Award of the American Medical Association.
