19TH ANNUAL CONFERENCE ON PRACTICAL, CLINICAL, AND LABORATORY ASPECTS OF BLOOD COAGULATION
Sept 19–21, 1984

3RD ANNUAL ANTIBODY, SPECIAL COAGULATION, AND PLATELET TECHNIQUES WORKSHOP
Sept 17–18, 1984

Location: Michigan State University, Kellogg Center
Sponsor: Michigan State University, College of Human Medicine
Contact: Joan Martin Allam (517) 353-7822
The National Institutes of Health invites nominations and applications for the position of Director, National Institute of Arthritis, Diabetes, and Digestive and Kidney Diseases (NIADDK). This Institute conducts, fosters, and supports research and research training on the prevention, management, and cure of arthritis and related bone and skin diseases; diabetes and related endocrine and metabolic diseases; kidney, urologic and blood diseases, and digestive diseases. Programs encompass clinical, intramural laboratory research, and extramural grants and contracts activities in the above areas.

This is a Civil Service position in the Senior Executive Service (SES) with an authorized salary range from $58,938 to $66,000 per annum. Candidates must be eligible for Physicians Comparability Allowance up to $10,000 per year. Alternatively, candidates may be eligible for appointment in the Commissioned Corps of the U.S. Public Health Service.

The mandatory professional qualifications are: (1) meet the minimum educational requirements for Medical Officer C5-602, or Health Scientist C5-601 (or equivalent combination of experience and training); and (2) have research experience and knowledge of research programs in one or more areas related to arthritis, diabetes, digestive and kidney diseases and other metabolic disorders. In addition, candidates must meet the following managerial/executive qualifications by demonstrating competence to assume leadership responsibilities in: (1) assuring that key national and agency goals are considered in making program decisions; (2) establishing effective external communications by being a representative spokesperson for the organization, and maintaining working relationships with outside key individuals and groups; (3) developing policy and establishing long-term and short-term goals and priorities; (4) obtaining and allocating the fiscal and material resources necessary to support program implementation; (5) assuring that people are appropriately employed, and dealt with in a fair and equitable manner, and (6) assuring that programs are being executed and adjusted as necessary, and that the appropriate results are being achieved.

Candidates who meet the mandatory requirements will be further evaluated by the Search Committee on the following factors: communications and interpersonal skills; training and education; honors and awards; scientific reputation/peer recognition; and the degree to which they exceed the minimally qualified level of the managerial/executive qualifications. Information on any of the above requirements may be obtained by calling Mrs. Helen Stafford at (301) 496-4197.

Applications (Personal Qualifications Statement, SF-171) are to be sent to: Mrs. Helen C. Stafford, Executive Secretary, Search Committee for Director, NIADDK, National Institutes of Health Building 1, Room 13, Bethesda, Maryland 20892. A current curriculum vitae and bibliography must accompany all applications. Applications of women and/or minority group members are especially solicited.

Application forms are subject to the provisions of the Privacy Act and become the property of DHHS. All qualified candidates will receive consideration without regard to race, religion, color, sex, age, national origin, lawful political affiliation, marital status, union membership, or any non-disqualifying physical or mental handicap.

---

**BLOOD BANK DIRECTOR TRAINING PROGRAM**

Mayo Clinic and Mayo Graduate School of Medicine offers an ACGME approved education program which is in its 14th year.

It is expected that persons completing the program will work as full-time directors of major hospital blood bank transfusion services or regional blood centers. Opportunity for extensive experience in an active, clinically oriented blood bank and its transfusion service which is part of a large, integrated medical and surgical practice annually using 80,000 units of blood and blood components.

Blood Bank activities encompass the full range of blood center activities which include Donor Recruitment and Blood Donation, Crossmatching, Red Cell Reference Serology, Component, Apheresis, Hepatitis, and Histocompatibility laboratories. The Blood Bank is involved in the support of bone marrow and renal transplantation programs as well as the operation of Clinical Consultation, Autotransfusion and Nurse Transfusion Services for patients at Mayo Clinic affiliated hospitals (2,000 beds).

Trainees will be involved in teaching activities and will also gain experience in investigative, medical and administrative aspects of blood banking. The year is acceptable towards meeting eligibility requirements for the subspecialty examination in Blood Banking of the American Board of Pathology.

Physicians who are U.S. citizens or hold permanent visas and who have had at least one year of training in pathology, medicine, surgery, anesthesiology or pediatrics will be considered for the program beginning July, 1985.

Inquiries should be directed to:

**H. F. Taswell, M.D.**  
Director, Blood Bank and Transfusion Service  
Mayo Clinic  
Rochester, Minnesota 55905

and must be received by September 10, 1984.

*Mayo is an equal opportunity affirmative action institution.*
The Blood Center of Southeastern Wisconsin offers a training program for physicians interested in a career in blood banking. Board Certified or eligible needed at the VA Medical Center, Wilmington, DE, a major affiliate of Thomas Jefferson Medical School, Philadelphia.

Active Medical Residency and student teaching option.

A complete and up-to-date histological account of...

The Blood Cells and Hematopoietic Tissues
SECON TD EDITION. Leon Weiss, Grace Lansing Lambert Professor of Cell Biology
Department of Animal Biology, University of Pennsylvania

Hematologists, as well as other clinicians and life scientists whose work touches upon the disciplines of hematology, will find in this manageable book an authoritative, highly detailed histological account of the blood cells and their major sites of production. Structural, functional, embryological, developmental, comparative, and pathological perspectives are all given. The clear, well-planned chapters also incorporate, where appropriate, discussion about non-major hematopoietic tissues.

Complemented by more than 200 illustrations and high- and low-powered photomicrographs, the exhaustive coverage employs the most advanced cell- and tissue-study and evaluation techniques including: bright-field, transmission, and scanning electron microscopy; living cell preparations; fixation; embedding and sectioning; mounting and staining; freeze-fracture-etch; and isolation. Extensive bibliographic and reference listings are found throughout.

The author, Leon Weiss, is also the editor of Histology: Cell and Tissue Biology. Fifth Edition, from which this volume has been drawn. The Blood Cells and Hematopoietic Tissues, Second Edition, is ideal for all who require a comprehensive update or reliable reference on the histological aspects of the blood and hematopoiesis.

POSTDOCTORAL FELLOWS IN BLOOD BANKING SCIENCES

The Blood Center of Southeastern Wisconsin offers a training program for physicians interested in a career in blood transfusion medicine. Trainees receive instruction in immunohematology, immunogenetics, transplantation immunology, and hemostasis. Clinical rotations on a hematology/oncology service can be arranged. The trainees participate in teaching activities and administrative aspects of blood banking. Opportunities for basic and applied research in transfusion therapy, platelet immunology and physiology and hemostasis are available. Board certification or eligibility in hematology/oncology or clinical pathology is required. Positions are available starting July 1, 1985. Send CV to Jay E. Menitove, M.D., Medical Director, The Blood Center of Southeastern Wisconsin, Inc., 1701 West Wisconsin Avenue, Milwaukee, Wisconsin 53233.

ADDITIONAL ONCOLOGIST-HEMATOLOGIST

Board Certified or eligible needed at the VA Medical Center, Wilmington, DE, a major affiliate of Thomas Jefferson Medical School, Philadelphia.

- Active Medical Residency and student teaching program.
- Good salary and excellent benefits.
- Faculty appointment according to qualifications.
- Equal opportunity employer.
- License in any state sufficient.
- English language proficiency required.

Mammography can detect breast cancers even smaller than the hand can feel.

Low-dose breast x-ray, mammography, is giving hope that the leading cause of cancer deaths in women will be greatly diminished.

We urge women without symptoms of breast cancer, ages 35 to 39, to have one mammogram for the record, women 40 to 49 to have a mammogram every 1 to 2 years, and women 50 and over, one a year. Breast self-examination is also an important health habit and should be practiced monthly. Ask your local Cancer Society for free leaflets on both subjects.

The American Cancer Society wants you to know.

Chromogenic substrates open new pathways in coagulation testing

The Diacrom kits use second generation chromogenic substrates for improved standardization and precision, ease of automation, and a simplified procedure.

- Readily automatable
- Improved standardization and reproducibility of results
- Accurate and specific
- Only a small amount of test sample needed
- Kits divisible for economy and extended shelf-life
- Lipid-free control plasmas available
- From the makers of ThromboWellcotest®, the leading method for detection of FDP

Please send me more information on DIACROM

Introducing
The General Diagnostics
Hemostasis Systems Group...

A Totally Integrated Line of
Hemostasis Products and Services:
Including instruments, reagents
and controls plus much more.

At General Diagnostics, we realize that your challenge,
now and in the years to come, is to provide increased
services more efficiently and cost-effectively...without
compromising quality. Our job is to help you meet this
challenge. The Hemostasis Systems Group was created
to meet your special needs by providing:

A highly specialized sales organization
—exclusively dedicated and trained to focus on serving
your specific hemostasis needs.

Expanded education and technical service programs
—to support your hemostasis laboratory with continuing
educational programs. In addition, phone consultations are
available to optimize your use of our quality products.

Significant new hemostasis products
—that are both technologically advanced and cost-effective.

An expanded instrument service organization
—to increase your productivity by reducing instrument
downtime.

Wider distribution capabilities
—to ensure availability and reduce your inventory costs by
delivering supplies quickly.

Convenient ordering procedures
—General Diagnostics products can be ordered as they
always have...through your sales representative or
distribution center.

The Hemostasis Systems Group...
Focused On Your Specialized Needs.

Artists interpretation of fibrin clot.
