FRONTIERS IN ONCOLOGY: FOR ONCOLOGISTS AND PRIMARY CARE PHYSICIANS

April 20, 1985
Alta Bates Hospital
Berkeley, Calif

This course will discuss the impact and relevance for clinicians of cancer research in monoclonal antibodies, oncogenes, carcinogens & anticancerogens, biologic modifiers, radiolabeled antibodies, and genetic engineering. The conference is approved for six Category I credits by the CMA and six prescribed hours by the AAFP. The fee is $75.

For information, contact the Alta Bates Medical Education Department. Telephone: (415) 540-1420.

COOLEY’S ANEMIA FOUNDATION, INC
RESEARCH FELLOWSHIPS

The Cooley’s Anemia Foundation, Inc, invites applications for fellowships in the field of Cooley’s anemia with stipends of up to $15,000. The deadline for receipt of applications is May 1, 1985. Awards will be made by June 15, 1985, and funding will begin July 1, 1985, for one year with the possibility of renewal for a second year.

For application forms and further information, write: Mr Michael Difilippo, Executive Director, Cooley’s Anemia Foundation, Inc, 105 E 22nd St, Suite 911, New York, NY 10010. Telephone: (212) 598-0911.

APPROACHES TO THE THERAPY OF SICKLE CELL ANEMIA

Oct 26–28, 1985
Guadalupe

This two-day conference will address pathophysioligic approaches to development of more effective therapy. Invited speakers, poster presentations, and discussion periods are planned, to continue a dialogue between American and European investigators. Abstracts are due June 1, 1985. Partial travel support may be available on an individual basis. The meeting will be conducted in English. For further information, write to Samuel Charache, MD, The Johns Hopkins Hospital, Baltimore, MD 21205, or to Yves Beuzard, MD, INSERM-U.91, CHU Henri Mondor, 94010 Creteil, France.

R.W. RUNDLES INTERNATIONAL SYMPOSIUM ON HAIRY CELL LEUKEMIA AND CHRONIC LYMPHOCYTIC LEUKEMIA

April 9–10, 1985
Searle Center
Duke University Medical Center
Durham, NC

The Symposium’s international faculty will present a comprehensive overview of the most recent advances in basic research and clinical application for both diseases. Fourteen CME credit hours in Category I are offered. For information and brochure, contact Andrew T. Huang, MD, Box 3942 D.U.M.C., Durham, NC 27710. Telephone: (919) 684-3127.
AMERICAN RED CROSS XVII ANNUAL SCIENTIFIC SYMPOSIUM
TRANSFUSION MEDICINE:
RECENT TECHNOLOGICAL ADVANCES

May 8–10, 1985
Washington, DC

The Symposium will be held at the Hyatt Regency Crystal City at Washington National Airport, Arlington, Va. Invited speakers will address advances in red cell substitutes, blood cell cultures, in vitro cell manipulation, monoclonal antibodies manufacture and applications, recombinant DNA technologies, and blood processing techniques.

Pre-registration is required.

For information, contact: XVII Annual Scientific Symposium Coordinator, American Red Cross National Headquarters, 18th and D Streets NW, Washington, DC 20006. Telephone: (202) 639–3637.

VIRAL HEPATITIS
AND LIVER DISEASE

Edited by
Girish N. Vyas, Ph.D.,
Jules L. Dienstag, M.D.,
and Jay H. Hoofnagle, M.D.

This valuable new volume provides an up-to-date assessment of the current information on viral hepatitis and liver disease.
Based on the edited proceedings of the 1984 International symposium on viral hepatitis, this volume disseminates the newest information to all participants and a global audience of practicing physicians and scientists.
The text provides broad coverage of the field and specifically focuses on the application of recombinant DNA technology to produce new vaccines against hepatitis B virus infections. The book discusses the use of vaccine in the prevention of chronic hepatitis following perinatal exposure to hepatitis B virus. It also highlights the fact that the use of hepatitis B vaccine produced by recombinant yeast holds the promise of an innovative vaccine that has proved safe and effective in early clinical trials in man.
This book also includes the cloning of Hepatitis A virus and the Delta agent, raising their potential application in the laboratory diagnosis and the development of new vaccines.
Comprehensive in scope, this volume is required reading for all professionals in the field.

1984, 784 pp., $69.50
Coagulation Factor Deficient Human Plasma

- Substrate Quality
- Stable
- Fresh Frozen
- Mono-Specific

COAGULATION DEFICIENCIES AVAILABLE:

Factor I (A fibrinogenemia)  
Factor II  
Factor V  
Factor VII  
Factor VIII  
Factor VIII Inhibitor

Factor IX  
Factor X  
Factor XI  
Factor XII  
Factor XIII

HEMATOLOGY PRODUCTS AVAILABLE:

Pooled Normal Plasma  
Assayed Normal Plasma  
Platelet Free Plasma

Aged Serum  
Adsorbed Plasma  
Coumadinized Plasma

- Plasmas are fresh frozen, citrated plasmas drawn from carefully screened HUMAN donors with congenital coagulation factor deficiencies.
- Shipments are packed in dry ice and usually delivered within 24 hours.
- Special arrangements are made to ship plasma in required volumes in vials (0.5 to 5.0 ml), in bags or on standing orders.

INDEX TO ADVERTISERS
MARCH 1985
FELLOWSHIPS in Blood Banking

Applications are being accepted for training beginning July 1, 1985 in the joint program of the New Jersey Medical School and University Hospital of the University of Medicine and Dentistry of New Jersey (Eric J. Wake, M.D., Director of Blood Bank and Residency Training Program), and the North Jersey Blood Center (Harry L. Taylor, M.D., Medical Director). Trainee will receive instruction and have opportunities for basic and applied research in immunohematology, immunogenetics, transplantation, immunology, hemostasis, transfusion therapy, pheresis procedures, automation, and computers in immunohematology. The trainees will participate in teaching activities and administrative aspects of blood banking, ward rounds and administrative meetings. Must be eligible/certified in clinical pathology, or other primary specialty board and eligible or licensed to practice medicine in New Jersey. Send resume to: Stanley J. Robboy, M.D., Department of Pathology, UMDNJ-New Jersey Medical School, 100 Bergen Street, Newark, NJ 07103-2484 (for information call Dr. Eric Wake, 201-456-6654 or 6312).

An Equal Opportunity/Affirmative Action Employer m/f/h/r.

University of Medicine and Dentistry of New Jersey

Pediatric Hematologist/Oncologist

to be Director of established Section, West Virginia University Medical Center. Must be sub-board certified/eligible with prior academic experience. WVU is an affirmative action/equal opportunity employer. Send CV to Priscilla A. Gilman, M.D. or William Neal, M.D., Department of Pediatrics, West Virginia University Medical School, Morgantown, WV 26506.
Excellence in Clinical Oncology...  

JOURNAL OF CLINICAL ONCOLOGY

The Official Journal of the American Society of Clinical Oncology

JOSEPH R. BERTINO, M.D., Editor-in-Chief

Associate Editors: Daniel Bergsagel, M.D., George P. Canellos, M.D., Samuel Hellman, M.D., John C. Marsh, M.D., and Saul A. Rosenberg M.D.

The Journal of Clinical Oncology stands for excellence in clinical oncology and has as its highest priority the communication of original articles that relate to the clinical disciplines of oncology and to those related laboratory studies oriented to clinical cancer objectives. In order to serve all needs of the readership, review articles are included on a regular basis. The papers included in the journal must be deemed to be of significant originality, scientific importance, and utility as judged by a peer review process in order to be published. All practicing oncologists will find the Journal of Clinical Oncology to be an excellent source of important, up-to-date information.

CONTENTS OF VOLUME 3, NO. 4 (APRIL 1985) INCLUDE:

Volume 3, 1985, published monthly/ISSN: 0732-183X
Annual subscription rates, U.S.A. and Canada: $110.00 individuals/
$145.00 institutions and libraries
Outside U.S.A. and Canada: $130.00 individuals/$165.00 institutions and libraries
Privileged rate available for fellows, residents, nurses and medical students.
Write to publisher on hospital letterhead stationary for details.

ASCO MEMBERS RECEIVE A SUBSCRIPTION FREE AS PART OF THEIR MEMBERSHIP.

Journal subscriptions are for the calendar year and are payable in advance.
Price includes postage, handling, and air freight where applicable. Prices are in U.S. dollars and are subject to change without notice.

Individuals may request information regarding personal subscription rates. Please direct all orders and inquiries to the Journal Subscription Fulfillment Department.

Sigma Diagnostics® introduces the FUTURE ...

MONOCLONAL ANTIBODIES

This new group of monoclonal antibodies are the first of a growing line of products designed to identify hematopoietic differentiation antigens. These highly purified markers are carefully examined for specificity using established neoplastic tissue culture lines, such as Molt-4, HSB-2, HL60, U937, 5B, and Daudi. Cryogenically preserved cells from a healthy donor panel are routinely used for quality control purposes.

The monoclonal antibody preparations are provided in extremely high titers. These are produced invariant from lot-to-lot. Therefore, costly, time-consuming plateau titering is avoided.

Sigma Diagnostics – the future...
It's what makes us different and better.

In the U.S.A. call 1-800-325-3010 for orders and 1-800-325-8070 for customer service. Outside the U.S.A. call 314-771-5750 collect for orders and 314-771-5765 collect for service.
New Platelet Antibody Assay Broadens the Picture

New Platelet Antibody Assay, a standardized ELISA test system, brings your lab unprecedented simplicity and reliability...at substantial savings in cost and labor.

It broadens the picture by joining the most comprehensive line of complementary coagulation products — from Thromboquik™ and Fibriquik® to Factor Deficient Plasmas and von Willebrand Factor Assay. Get the whole picture...from General Diagnostics.
