BLOOD
The Journal of
The American Society of Hematology

VOL 65, NO 5
MAY 1985

CONTENTS

Review: Chronic Myelogenous Leukemia: Recent Advances ....................... R.E. Champlin and D.W. Golde 1039
Characterization of the Processed Form of a Ubiquitous Protein Displaying a Variable Membrane Organization in Erythroid Cells .................................................. Robert W. Allen and Beverly A. Hoover 1048
Drug-Induced Endocytosis of Neonatal Erythrocytes ....................... Lisa M. Matovek, Irene G. Junga, and Stanley L. Schrier 1056
Elimination of Clonogenic Burkitt's Lymphoma Cells From Human Bone Marrow Using 4-Hydroperoxycyclophosphamide in Combination With Monoclonal Antibodies and Complement P. De Fabritiis, M. Bregni, J. Lipton, J. Greenberger, L. Nadler, L. Rothstein, M. Korbling, J. Ritz, and R.C. Bast, Jr 1064
Prognostic Importance of Blast Cell DNA Content in Childhood Acute Lymphoblastic Leukemia A. Thomas Look, Paula K. Roberson, Dorothy L. Williams, Gaston Rivera, W. Paul Bowman, Ching-Hon Pui, Judith Ochs, Minnie Abromowitch, David Kalwinsky, Gary V. Dahl, Stephen George, and Sharon B. Murphy 1079
Clinical Pharmacology of Low-Dose Cytosine Arabinoside ... D. Spriggs, J. Griffin, J. Wisch, and D. Kufe 1087
Heterogeneity of Non-Hodgkin's Lymphoma Probed by Nucleic Acid Cytometry John Srigley, Bart Barlogie, James J. Butler, Barbara Osborne, Mark Blick, Dennis Johnston, Hagop Kantarjian, James Reuben, John Batsakis, and Emil J Freireich 1090
Epstein-Barr Virus-Associated Hemophagocytic Syndrome: Virological and Immunopathological Studies ..................... John L. Sullivan, Bruce A. Woda, Henry G. Herrod, Gerald Koh, Fred P. Rivara, and Carel Mulder 1097
Monoclonal Antibodies to Human Platelet Glycoprotein IIb/IIIa That Initiate Distinct Platelet Responses Lisa K. Jennings, David R. Phillips, and William S. Walker 1112
Cell-Bound Autologous Immunoglobulin in Erythrocyte Subpopulations From Patients With Sickle Cell Disease ......................................................... Gloria A. Green, Morris M. Rehn, and Vijay K. Kalra 1127
Quantitative Assays for Detection of Residual T Cells of T-Depleted Human Marrow Paul J. Martin and John A. Hansen 1134
Prostaglandin Endoperoxide Analogues Stimulate Phospholipase C and Protein Phosphorylation During Platelet Shape Change .................................. Wolfgang Siess, Barbara Boehlig, Peter C. Weber, and Eduardo G. Lapetina 1141

(Continued on following page)
Preclinical Studies on the Use of Selective Antibody-Ricin Conjugates in Autologous Bone Marrow Transplantation .................. John E. Leonard, Raymond Taetle, Dong To, and Kasper Rhyner 1149

Studies on the Structure of Bovine Factor V by Scanning Transmission Electron Microscopy  
Michael W. Mosesson, Michael E. Nesheim, James DiOrto, James F. Hainfeld, Joseph S. Wall, and Kenneth G. Mann 1158

Identification of Lectin-like Substances Recognizing Galactosyl Residues of Glycoconjugates on the Plasma Membrane of Marrow Sinus Endothelium .................. Mikio Kataoka and Mehdi Tavassoli 1163

Donor Cell Leukemia Developing Six Years After Marrow Grafting for Acute Leukemia  
Robert P. Witherspoon, William Schubach, Paul Neiman, Paul Martin, and E. Donnall Thomas 1172

The M, 95,000 Gelatin-Binding Protein in Differentiated Human Macrophages and Granulocytes  
Tapio Vartio, Klaus Hedman, Sten-Erik Jansson, and Tapani Hovi 1175

Biological Characterization of a Granulomonopoietic Enhancing Activity Derived From Cultured Human Lipid-Containing Macrophages .................. Sheng-yuan Wang, Hugo Castro-Malaspina, Li Lu, and Malcolm A.S. Moore 1181

Bone Marrow Transplantation for Acute Nonlymphocytic Leukemia in First Remission: Analysis of Prognostic Factors ............ Bruce Bostrom, Richard D. Brunning, Philip McGlave, Norma Ramsay, Mark Nesbit, Jr, William G. Woods, David Hurd, William Krivit, Tae Kim, Anne Goldman, and John Kersey 1191

In Vivo Studies of the Role of Factor VII in Hemostasis .................. Alan R. Giles, Shawn Tinlin, Lorraine Brosseau, and Hugh Hoogendoorn 1197

A New Abnormal Variant of Spectrin in Black Patients With Hereditary Elliptocytosis  
Marie-Christine Lecomte, Didier Dhermy, Constance Solis, Anna Ester, Claude Féo, Huguette Gautero, Odile Bournier, and Pierre Boivin 1208

The Anticoagulant Mechanism of Action of Heparin in Contact-Activated Plasma: Inhibition of Factor X Activation ................................................................. Tessie B. McNeely and Michael J. Griffith 1226

Effects of Fresh-Frozen Plasma and Its Cryosupernatant Fraction on von Willebrand Factor Multimeric Forms in Chronic Relapsing Thrombotic Thrombocytopenic Purpura  
Joel L. Moake, John J. Byrnes, Joseph H. Troll, Christine K. Rudy, Suchen L. Hong, Mark J. Weinstein, and Noreen M. Colannino 1232

Structurally Diverse Molecular Deletions in the β-Globin Gene Cluster Exhibit an Identical Phenotype on Interaction With the β-Gene .................. Nicholas P. Anagnostou, Thalia Papayannopoulou, George Stamatoyannopoulos, and Arthur W. Nienhuis 1245

Human Platelets Exert Cytotoxic Effects on Tumor Cells .................. Gretchen M. Ibele, Neil E. Kay, Gerhard J. Johnson, and Harry S. Jacob 1252

(Continued on following page)
CONTENTS

(Contents continued)

Quantitation of Protein 3 Content of Circulating Erythrocytes at the Single-Cell Level
Lisa K. Jennings, L. Keith Brown, and Michael E. Dockter 1256

Production and Characterization of a Murine Monoclonal Antibody Against a Heavy Chain of Hageman Factor (Factor XII)... Hidehiko Saito, Toshiki Ishihara, Hisamitsu Suzuki, and Takeshi Watanabe 1263

Arachidonic Acid Incorporation by Cytoplasmic Lipid Bodies of Human Eosinophils
Peter F. Weller and Ann M. Dvorak 1269

Morphological and Ultrastructural Study of Megakaryocytopenesis in Liquid Cultures of Hamster Spleen
Chandra Choudhury, Irena Katsnelson, and Eugene Arnold 1282

Immunoelectron Microscopical Demonstration of Lysosomes in Human Blood Platelets and Megakaryocytes Using Anti-Cathepsin D............................. Jan J. Sixma, Agnes van den Berg, Andrej Hasilik, Kurt von Figura, and Hans J. Geuze 1287

SPECIAL DEPARTMENTS

Correspondence.................................................................................................................. 1292

Errata .................................................................................................................................. 1295

Announcements...................................................................................................................... 1297

Information for Contributors............................................................................................. xvii, xviii

Advertisers’ Index .................................................................................................................. xxxiii

All manuscripts submitted for consideration for publication in BLOOD should be sent to: John W. Adamson, MD, Editor, BLOOD, University District Building—Room 320, 1107 NE 45th St, Seattle, WA 98105.

Please note that a processing fee of $50.00 must accompany each manuscript submitted for publication in BLOOD.

The American Society of Hematology certifies that the continuing medical education offering provided by BLOOD, The Journal of The American Society of Hematology, meets the criteria for up to 22 hours of credit in Category 5(a) for the Physician’s Recognition Award of the American Medical Association.
