CONTENTS

Review: The Structural and Functional Properties of Thrombospondin ........................................... Jack Lawler 1197

The Dpg Gene: An Intracorporcular Modifier of Red Cell Metabolism ........ Nancy A. Noble and Gerald Rothstein 1210

Pro-Urokinase: A Study of Its Stability in Plasma and of a Mechanism for Its Selective Fibrinolytic Effect Ralph Pannell and Victor Gurewich 1215

Characterization of Murine Peritoneal Macrophage Receptors for Fibrinogen) Degradation Products Shrin Rajagopalan and Salvatore V. Pizzo 1224

The Proportion of Mitoses in Different Cell Lineages Changes During Short-term Culture of Normal Human Bone Marrow ...... Mauri Keinänen, Sakari Kuuttila, Clara D. Bloomfield, Erkki Eلونen, and Albert de la Chapelle 1240

A Chromosomal Breakage Syndrome With Profound Immunodeficiency Mary Ellen Conley, Nancy B. Spinner, Beverly S. Emanuel, Peter C. Nowell, and Warren W. Nichols 1251

Human Macrophage Maturation and Heterogeneity: Analysis With a Newly Generated Set of Monoclonal Antibodies to Differentiation Antigens Reinhard Andreesen, Klaus J. Bross, Jürgen Osterholz, and Frank Emmrich 1257

Inhibition of Neutrophil Cytolysin Production by Target Cells Franco Dallegr, Franco Patrone, Alberto Ballestrero, Guido Frumento, and Carlo Sacchetti 1265

A Combination of a T Cell–Derived Lymphokine Differentiation-Inducing Activity and a Physiologic Concentration of Retinoic Acid Induces HL-60 to Differentiate to Cells With Functional Chemotactic Peptide Receptors Masue Imaizumi and Theodore R. Breitman 1273

Proteolytic Cleavage of Human von Willebrand Factor Induced by Enzyme(s) Released From Polymorphonuclear Cells ................. E. Anne Thompson and Margaret A. Howard 1281

Separation of Human Megakaryocytes by State of Differentiation on Continuous Gradients of Percoll: Size and Ploidy Analysis of Cells Identified by Monoclonal Antibody to Glycoprotein IIb/IIa Toshiyuki Ishibashi, Zaverio M. Ruggeri, Laurence A. Harker, and Samuel A. Burstein 1286

A Soluble Adenosine Triphosphate–Dependent Proteolytic System in Human Peripheral Red Blood Cells R.F. Rieder, A. Ibrahim, and J.D. Etlinger 1293

High-Dose Melphalan With Autologous Bone Marrow Transplantation for Multiple Myeloma Bart Barlogie, Roy Hall, Axel Zander, Karel Dicke, and Raymond Alexanian 1298

Depletion of Donor Lymphocytes by Counterflow Centrifugation Successfully Prevents Acute Graft-Versus-Host Disease in Matched Allogeneic Marrow Transplantation T. de Witte, J. Hoogenhout, B. de Pauw, R. Holdrinet, J. Janssen, J. Wessels, W. van Daal, T. Hustinx, and C. Haanen 1302

Quantitation and Properties of the Active and Latent Plasminogen Activator Inhibitors in Cultures of Human Endothelial Cells ................................................................. Eugene G. Levin 1309

(Continued on following page)
Differentiation of Cellular Processes Involved in the Induction and Maintenance of Stimulated Neutrophil Adherence ................................................................. Denis English and Theodore G. Gabig 1314

Disappearance of Cytogenetic Abnormalities and Clinical Remission During Therapy With 13-Cis-Retinoic Acid in a Patient With Myelodysplastic Syndrome: Inhibition of Growth of the Patient’s Malignant Monocytoid Clone Janet Abramh, Emmanuel C. Besa, Martin Hzyinski, Janet Finan, and Peter Nowell 1323

Trisomy 4 Identifies a Subset of Acute Nonlymphocytic Leukemias Cristina Meucci, Angeline Van Orshoven, Guido Tricot, Jean-Louis Michaux, André Delannoy, and Herman Van Den Bergh 1328

Proteoglycans in Human Long-Term Bone Marrow Cultures: Biochemical and Ultrastructural Analyses Thomas N. Wight, Michael G. Kinsella, Armand Keating, and Jack W. Singer 1333

Antigenic Determinant in Human Coagulation Factor IX: Immunological Screening and DNA Sequence Analysis of Recombinant Phage Map a Monoclonal Antibody to Residues 111 Through 132 of the Zymogen Royal McGraw, Dan Frazier, Mark de Serres, Howard Reisner, and Darrell Stafford 1344

Analysis of Natural Killer Cells in Patients With Aplastic Anemia ........................................ Pedro Gascón, Nicholas Zoumbos, and Neal Young 1349

Mapping of Distinct von Willebrand Factor Domains Interacting With Platelet GP1b and GP1 Ib/IIa and With Collagen Using Monoclonal Antibodies ......................................... Jean-Pierre Girma, Michel Kalafatis, Geneviève Pétu, Jean-Maurice Lavergne, Michael W. Chopek, Thomas S. Edgington, and Dominique Meyer 1356

Quinidine Purpura: Evidence That Glycoprotein V is a Target Platelet Antigen ........................ Raphael B. Stricker and Marc A. Shuman 1377

Juvenile Chronic Myelogenous Leukemia: Characterization of the Disease Using Cell Cultures .......... Zeev Estrov, Tom Grunberger, Helen S.L. Chan, and Melvin H. Friedman 1382

Activation of Human Neutrophils by Monoclonal Antibody PMN7C3: Cell Movement and Adhesion Can Be Triggered Independently From the Respiratory Burst ....... David A. Melnick, Tova Meshulam, Aurelio Manto, and Harry L. Malech 1388

Induction of Growth Alterations in Factor-Dependent Hematopoietic Progenitor Cell Lines by Cocultivation With Irradiated Bone Marrow Stromal Cell Lines ............................ Elizabeth Naparstek, Jacalyn Pierce, Donald Metcalf, Richard Shadduck, James Ihle, Aya Leder, Mary Ann Sakakeeny, Katherine Wagner, Joe Falco, T.J. FitzGerald, and Joel S. Greenberger 1395

High Fetal Hemoglobin Production in Sickle Cell Anemia in the Eastern Province of Saudi Arabia Is Genetically Determined ......................................................... Barbara A. Miller, Mohammed Salameh, Mohammed Ahmed, Jim Wainscott, Giovanna Antognetti, Stuart Orkin, David Weatherall, and David G. Nathan 1404

Human Parvovirus B19–Induced Epidemic Acute Red Cell Aplasia in Patients With Hereditary Hemolytic Anemia Ulla M. Saarinen, Terence L. Chorba, Peter Tattersall, Neal S. Young, Larry J. Anderson, Erskine Palmer, and Peter F. Coccia 1411

Stromal Cell–Associated Erythropoiesis ................................................................. Schickwann Tsai, Colin A. Steff, and David G. Nathan 1418

Spontaneous Regression of a Monoclonal Proliferation of Large Granular Lymphocytes Associated With Reversal of Anemia and Neutropenia .......................................................... Elliott F. Winton, Wing C. Chan, Irene Check, Kathryn W. Colenda, Kathleen F. Bongiovanni, and Thomas A. Waldmann 1427

Establishment of Eosinophilic Sublines From Human Promyelocytic Leukemia (HL-60) Cells: Demonstration of Multipotentiality and Single-Lineage Commitment of HL-60 Stem Cells Masao Tomonaga, Judith C. Gasson, Shirley G. Quan, and David W. Golde 1433

(Continued on following page)
CONTENTS

A Collaborative, Double-Blind Randomized Study of Cetiedil Citrate in Sickle Cell Crisis

Lennette J. Benjamin, Lee R. Berkowitz, Eugene Orringer, Vipul N. Mankad, Ananda S. Prasad,
Lawrence M. Lewkow, Ram K. Chillian, and Charles M. Peterson

Effects of Recombinant Human GM-CSF on Proliferation of Clonogenic Cells in Acute Myeloblastic Leukemia

James D. Griffin, D. Young, F. Herrmann, D. Wiper, K. Wagner, and K.D. Sabbath

In Vitro Release of Physically Separable Factors From Monocytes That Exert Opposing Effects on Erythropoiesis

Laurie Feldman, Carl M. Cohen, and Nicholas Dainiak

Fibrinopeptide A and the Phosphate Content of Fibrinogen in Venous Thromboembolism and Disseminated Intravascular Coagulation

Analysis of Elevated Fibrinogen Product Levels in Patients With Liver Disease

Livingston VanDeWater, Justine M. Carr, Denise Aronson, and Jan McDonagh

Increased Red Blood Cell Deformability Due to Isoxsuprine Administration Decreases Platelet Adherence in a Perfusion Chamber: A Double-Blind Cross-Over Study in Patients With Intermittent Claudication

Piet A.M.M. Aarts, Jan Dirk Banga, Hans C. van Houwelingen, Robert M. Heethaar, and Jan J. Sixma

A Monoclonal Antibody Preventing Binding of Tissue-Type Plasminogen Activator to Fibrin: Useful to Monitor Fibrinogen Breakdown During t-PA Infusion

P. Holvoet, H.R. Lijnen, and D. Collen

Interaction of Factor XIa and Antithrombin in the Presence and Absence of Heparin

David L. Beeler, James A. Marcum, Sandra Schiffman, and Robert D. Rosenberg

Influence of Fibrin and Liver Blood Flow on the Turnover and the Systemic Fibrinogenolytic Effects of Recombinant Human Tissue-Type Plasminogen Activator in Rabbits

Henri Bounameaux, Jean-Marie Stassen, Conrad Seghers, and Desiré Collen

Identification of Functional Domains on von Willebrand Factor by Binding of Tryptic Fragments to Collagen and to Platelets in the Presence of Ristocetin

Wim P.M. Houdijk, Marion E. Schiphorst, and Jan J. Sixma

CONCISE REPORTS

Analysis of the Peptide Subunits of Human Neutrophil Myeloperoxidase

William M. Nauseef and Harry L. Malech

Use of a BamHI Polymorphism in the Factor IX Gene for the Determination of Hemophilia B Carrier Status

C.W. Hay, K.A. Robertson, S.-L. Yong, A.R. Thompson, G.H. Growe, and R.T.A. MacGillivray

Interleukin 3 Promotes the Differentiation of Isolated Single Megakaryocytes

Toshiyuki Ishibashi and Samuel A. Burstein

Mediation of Platelet Adhesion to Fibrillar Collagen in Flowing Blood by a Proteolytic Fragment of Human von Willebrand Factor

Kjell S. Sakariasson, Edith Fressinaud, Jean-Pierre Girma, Hans R. Baumgartner, and Dominique Meyer

Invasion of Erythrocytes by Plasmodium falciparum Malaria Parasites: Evidence for Receptor Heterogeneity and Two Receptors

Graham H. Mitchell, Terence J. Hadley, Mary H. McGinniss, Francis W. Klotz, and Louis H. Miller

(Continued on following page)
Effective January 1, 1986, all manuscripts submitted to BLOOD and subsequently accepted for publication will be assessed a $30.00 charge per published page. This charge is necessary to offset the increasing costs of publication.

All manuscripts submitted for consideration for publication in BLOOD should be sent to: John W. Adamson, MD, Editor, BLOOD, University District Building—Room 320, 1107 NE 45th St, Seattle, WA 98105.

Please note that a processing fee of $50.00 must accompany each manuscript submitted for publication in BLOOD.

The American Society of Hematology certifies that the continuing medical education offering provided by *BLOOD, The Journal of The American Society of Hematology*, meets the criteria for up to 22 hours of credit in Category 5(a) for the Physician’s Recognition Award of the American Medical Association.
