CONTENTS

Review: Light Chains of Immunoglobulins: Structural-Genetic Correlates ........................................... Alan Solomon 603

PMN Heterogeneity: Long-Term Stability of Fluorescent Membrane Potential Responses to the Chemoattractant
N-Formyl-Methionyl-Leucyl-Phenylalanine in Healthy Adults and Correlation With Respiratory Burst
Activity .................................................................................................................................................. Mark P. Fletcher and Bruce E. Seligmann 611

Cell-Mediated Suppression of Megakaryocytepoiesis in Acquired Amegakaryocytic Thrombocytopenic Purpura
Alan M. Gewirtz, Michelle Keefer Sacchetti, Rebecca Bien, and William E. Barry 619

Quantitative Analysis of Platelet Surface HLA by W6/32 Anti-HLA Monoclonal Antibody ................. K.J. Kao,
Daniel J. Cook, and Juan C. Scornik 627

Inducible Production of Human Macrophage Growth Factor, CSF-1 ........................................ P. Ralph, M.K. Warren, M.T. Lee,

Selenium-Dependent Glutathione Peroxidase Protein and Activity: Immunological Investigations on Cellular and
Plasma Enzymes ........................................................................................................................................ Kazuhiko Takahashi and Harvey J. Cohen 640

Italian Type of Deletional Hereditary Persistence of Fetal Hemoglobin ......................... G. Saglio, C. Camaschella, A. Serra,
T. Bertero, G. Rege Cambrin, A. Guerrasio, U. Mazza, P. Izzo, F. Terragni, B. Giglioni, P. Comi,
and S. Ottolenghi 646

Chromosome 3q21 Abnormalities Associated With Hyperactive Thrombopoiesis in Acute Blastic Transformation of
Chronic Myeloid Leukemia ................................................................................................................. R. Bernstein, A. Bagg, M. Pinto, D. Lewis, and B. Mendelow 652

Acute Undifferentiated Leukemia: Implications for Cellular Origin and Clonality Suggested by Analysis of Surface
Markers and Immunoglobulin Gene Rearrangement .................................................. Anand Raghavachar, Claus R. Bartram,
Arnold Ganser, Gerhard Heil, Enno Kleihauer, and Bernhard Kubanek 658

Lymphoepithelioid Lymphoma (Lennert's Lymphoma) Is a Monoclonal Proliferation of Helper/Inducer T Cells
A.C. Feller, G.H. Griesser, T.W. Mak, and K. Lennert 663

von Willebrand's Disease Characterized by Increased Ristocetin Sensitivity and the Presence of All von Willebrand
Factor Multimers in Plasma .................. Lars Holmberg, Erik Berntorp, Mikael Donné, and Inga Marie Nilsson 668

Effect of Danazol on Clotting Factor Levels, Bleeding Incidence, Factor Infusion Requirements, and Immune
Parameters in Hemophilia .................. Parvin Saidi, Beatriz Z. Lega, Hugh C. Kim, and Karel Raska, Jr 673

Structural and Functional Differences Between Decay-Accelerating Factor and Red Cell Acetylcholinesterase
Jeremy Sugarman, Dana V. Devine, and Wendell F. Rosse 680

Activation of Human Factor VII in the Initiation of Tissue Factor–Dependent Coagulation ..... L. Vijaya Mohan Rao,
Samuel I. Rapaport, and S. Paul Bajaj 685

Deficiency of Platelet Membrane Glycoprotein Ia Associated With a Decreased Platelet Adhesion to
Subendothelium: A Defect in Platelet Spreading .................................................. H. Karel Nieuwenhuis, Kjell S. Sakariassen,
Wim P.M. Houdijk, Patricia F.E.M. Nievelstein, and Jan J. Sixma 692

Immunohistochemical Localization of Membrane and α-Granule Proteins in Plastic-Embedded Mouse Bone Marrow
Megakaryocytes and Murine Megakaryocyte Colonies .................................................. Paula E. Stenberg, Jay H. Beckstead,
Rodger P. McEver, and Jack Levin 696

(Continued on following page)
A Lower Molecular Weight γ-Chain Variant in a Congenital Abnormal Fibrinogen (Kyoto) Nobuhiko Yoshida, Minoru Okuma, Masaaki Moroi, and Michio Matsuda

Granulocyte-Macrophage Colony-Stimulating Factor Enhances Phagocytosis of Bacteria by Human Neutrophils Jacob Fleischmann, David W. Golde, Richard H. Weisbart, and Judith C. Gasson

Biological and Immunological Characterization of ATG and ALG Eric L. Raefsky, Pedro Gascon, Alois Gratwohl, Bruno Speck, and Neal S. Young

Glycoprotein V Is Not the Thrombin Activation Receptor on Human Blood Platelets Denise Bienz, Wolfgang Schmippering, and Kenneth J. Clemetson

Identification of Platelet Glycoprotein IIb/IIIa as the Major Binding Site forReleased Platelet-von Willebrand Factor Robert I. Parker and Harvey R. Gralnick

On the Identity of Vitronectin and S-Protein: Immunological Crossreactivity and Functional Studies Bianca R. Tomasini and Deane F. Mosher

Characterization of a Platelet Membrane Protein of Low Molecular Weight Associated WithPlatelet Activation Following Binding by Monoclonal Antibody AG-1 Jonathan L. Miller, John M. Kupinski, and Kent O. Hustad

Expression of Antigens of the Platelet Glycoprotein IIb/IIIa Complex on Human Hematopoietic Stem Cells John K. Fraser, Michael F. Leahy, and Michael V. Berridge

CONCISE REPORTS

Absence of Tubular Structures and Immunolabeling for von Willebrand Factor in the Platelet α-Granules From Porcine von Willebrand Disease Elisabeth M. Cramer, Jacques P. Caen, Ludovic Drouet, and Janine Breton-Gorius

Autocrine Growth of Interleukin 2–Producing Leukemic Cells in a Patient With Adult T Cell Leukemia Naomichi Arima, Yasuhisa Daitoku, Satoru Ohgaki, Junko Fukumori, Hiromitsu Tanaka, Yusei Yamamoto, Kouji Fujimoto, and Kaoru Onose

Antithrombotic Effect of a Monoclonal Antibody to the Platelet Glycoprotein IIb/IIIa Receptor in an Experimental Animal Model Barry S. Coller, John D. Folts, Lesley E. Scudder, and Steven R. Smith

Stimulation of Proliferation of Human Myeloid Leukemia Cells in Culture: Applications for Cytogenetic Analysis Joseph Michaels, Israela Lerner, Elizeer A. Rachmilewitz, and Eitan Fibach

Effective January 1, 1986, all manuscripts submitted to BLOOD and subsequently accepted for publication will be assessed a $30.00 charge per published page. This charge is necessary to offset the increasing costs of publication.

All manuscripts submitted for consideration for publication in BLOOD should be sent to: John W. Adamson, MD, Editor, BLOOD, University District Building—Room 410, 1107 NE 45th St, Seattle, WA 98105. Telephone: (206) 545-8080. Please note change of room number.

Please note that a processing fee of $50.00 must accompany each manuscript submitted for publication in BLOOD.

The American Society of Hematology certifies that the continuing medical education offering provided by BLOOD, The Journal of The American Society of Hematology, meets the criteria for up to 22 hours of credit in Category 5(a) for the Physician's Recognition Award of the American Medical Association.
