ANNOUNCEMENTS

AMERICAN SOCIETY OF HEMATOLOGY
TWENTY-NINTH ANNUAL MEETING
December 5-8, 1987
Sheraton Washington/Omni Shoreham Hotels
Washington, DC

The Twenty-Ninth Annual Meeting of the American Society of Hematology will be held at the Sheraton Washington and Omni Shoreham Hotels, Washington, DC, December 5-8, 1987. Programs by the Education Committee and the Scientific Subcommittees will be held on Saturday, December 5, and Sunday, December 6. The Presidential Symposium will be Tuesday morning, December 8. Four mini-plenary sessions will be held on Tuesday afternoon. Selected papers submitted to the meeting will be presented either in oral or poster sessions on Sunday, December 6; Monday, December 7; and Tuesday, December 8.

The abstract deadline for contributed papers is September 1, 1987. Abstract forms may be obtained from SLACK, Inc (address below). Subsequent issues of BLOOD will contain details of the Educational and Subcommittee Programs and the Presidential Symposium, in addition to information about registration for the meeting. Preregistration material will be sent early this fall to members. If you do not receive your meeting information by October 6, 1987, please contact the Registration Supervisor at SLACK, Inc, 6900 Grove Rd, Thorofare, NJ 08086-9447; (609) 848-1000. Nonmembers wishing to receive preregistration information and forms should also contact SLACK, Inc.

AMERICAN SOCIETY OF HEMATOLOGY
29TH ANNUAL MEETING
December 5-8, 1987

ADVANCE REGISTRATION

NAME ____________________________ STREET ____________________________

CITY ____________________________ STATE _______________ ZIP ___________

NAME OF SPOUSE (if attending meeting) ____________________________

American Society of Hematology Members, $30.00 (A) ______ Honorary or Emeritus Members, no fee (B) ______ Council on Thrombosis Members, $30.00 (C) ______ Nonmembers, $35.00 (D) ______ *Nonmembers in Training, $10.00 (E) ______ Medical Technologists, $40.00 (F) ______ Spouse, $10.00 (G) ______

Registration includes one copy of the abstract booklet (supplement to Blood) and one copy of the Education Program. Additional copies desired _____ (indicate number desired). Supplement to Blood $20.00 _____ Education Program $6.00 _____

TOTAL ENCLOSED $__________
(Payable in US funds only)

Mail this form and check to: ASH Business Office, Registration Supervisor, SLACK, Inc, Box 510, Thorofare, NJ 08086-0510. Advance registration deadline is November 2, 1987. All registrants who fail to register by November 2, 1987, will be charged an additional fee of $10.00 upon registration at the Annual Meeting. (Checks payable to the American Society of Hematology must accompany registration.) Request for refunds must be submitted in writing by December 8, 1987.

*CERTIFICATION FOR NONMEMBERS IN TRAINING

I, ____________________________ (name of training director) certify that Dr. ____________________________ (nonmember in training) is a resident/trainee at ____________________________ (name of institution) ____________________________ (signature of director)

Upon receipt of this Advance Registration, housing forms and additional meeting and social information will be mailed to you.
WILMOT CANCER RESEARCH FELLOWSHIPS

The University of Rochester School of Medicine offers research training to physicians who have completed at least 1 year of residency or research experience. Fellowships will begin July 1, 1988. Opportunities exist in any discipline relevant to the cause, diagnosis, treatment, or prevention of cancer, including endocrinology, experimental therapeutics, genetics, hematology, immunology, microbiology, molecular and cellular biology, pathology, and radiation oncology.

Beginning stipends range from $32,000 to $34,000, based on postgraduate experience. There is an annual allowance of $5,000 for related research costs. Support is provided for up to 3 years.

For further information, contact: Wilmot Cancer Research Fellowship Program, Medical Center Box 601, University of Rochester School of Medicine & Dentistry, 601 Elmwood Ave, Rochester, NY 14642.

ONCOLOGY PRACTICE 1988: A PERSPECTIVE

January 31-February 6, 1988

Snowmass, Colorado

For further information, contact: Stephen E. Jones, MD, Charles A. Sammons Cancer Center, Room 4800, Baylor University Medical Center, 3500 Gaston Ave, Dallas, TX 75246. Phone: (214) 820-2021.

APLASTIC ANEMIA FOUNDATION OF AMERICA (AAFA) RESEARCH FELLOWSHIP AWARD

The AAFA has established a Research Fellowship Award in order to encourage young researchers and to recognize their contributions to research related to aplastic anemia. In January 1988, an award of $25,000 will be made for a research fellowship to begin July 1988. The deadline for completion of the application package is November 15, 1987.

For information concerning eligibility criteria and application forms, write: Research Fellowship Award, AAFA, PO Box 22689, Baltimore, MD 21203.

LASERS IN MEDICINE: Expanding Clinical Applications

October 10, 1987

Alta Bates Hospital Auditorium
Berkeley, CA

This conference is approved for 7.5 hours Category I credit by the CMA; fees are $65.00 for physicians and $30.00 for nurses and residents. The conference will run from 8:00 AM to 4:00 PM.

For more information, contact: Mary Grim, Medical Education Coordinator, (415) 540-1420.
Quantitative Fluorescein Microbead Standards Kit

Practical applications of flow cytometry demand stable and reproducible results. Now, with our Quantitative Fluorescein Microbead Standards Kits, fluorescence and size determinations of cells can be compared between laboratories and over time. By using our quantitative kits, you can conveniently determine the fluorescence intensity of fluorescein-labeled cells. Accurate values, independent of instrument, can be achieved, because the excitation and emission spectra of our calibrated fluorescein microbeads match those of the fluorescein-labeled cell samples.

For further information contact:
Flow Cytometry Standards Corporation
PO Box 12621
Research Triangle Park, NC 27709
Phone: (919) 967-9345 (In NC)
1-800-227-8143

FLOW CYTOMETRY STANDARDS CORPORATION™

Only our Quantitative Fluorescein Microbeads have so many unique features and applications:
- calibrate your instrument for size to quantitate cell surface area, diameter, cross-sectional area and volume
- calibrate your instrument for fluorescence to quantitate the number of equivalent soluble fluorescein molecules per cell
- determine instrument stability to reliably and reproducibly measure cell samples over time
- determine instrument noise level to know just how sensitive your instrument is
- choose the calibration range by selecting either the low level (6,000-50,000 equiv. sol. fl. mol/microbead) or high level (60,000-2,000,000 equiv. sol. fl. mol/microbead) quantitative kit.

ALSO AVAILABLE:
Fluorescent Microbead Alignment Standards whose fluorescent properties match those of stained cells. Our microbeads carry the same dyes used in your research: FITC, PE, APC, Texas Red, Hoechst, Propidium Iodide, Acridine Orange and more!

HEMATOLOGY PRODUCTS AVAILABLE:

- Pooled Normal Plasma
- Assayed Normal Plasma
- Platelet Free Plasma
- Aged Serum
- Adsorbed Plasma
- Coumadinized Plasma

- Plasmas are fresh frozen, citrated plasmas drawn from carefully screened HUMAN donors with congenital coagulation factor deficiencies.
- Shipments are packed in dry ice and usually delivered within 24 hours.
- Special arrangements are made to ship plasma in required volumes in vials (0.5 to 5.0 ml), in bags or on standing orders.

Through the combination of proprietary genetic engineering techniques and patented large-scale perfusion bioreactor technology, Invitron scientists have developed a revolutionary process for manufacturing recombinant human tissue plasminogen activator (tPA). The tPA manufactured by this new process is characterized by very high purity, excellent in vitro enzymatic activity and most importantly, very high lot-to-lot consistency. INVITRON RESEARCH PRODUCTS now offers recombinant human tPA for in vitro and laboratory animal research use only.

**Product Availability:**
- available in 2-chain form in the following vialable amounts as a liquid or active, carrier protein-free lyophilized product:
  - 50 µg  1 mg  10 mg  50 mg
- customized buffering and aliquotting available for orders ranging in size from one gram to one kilogram
- larger quantities (multi Kg) and one-chain form available upon request

**Product Specifications:**
- purity > 95%
- activity approx. 500,000 IU/mg
- endotoxin < 0.5 EU/mg

![Representative of 2-Chain tPA](image)

- Reduced 10% SDS-PAGE
- Gel Filtration Profile

Caution: For research use only in laboratory animals or in vitro testing. Not for diagnostic or human use. Not available for sale in the U.K. or Japan

The Olympus ProGroup® System efficiently automates and simplifies ABO/Rh testing without compromising the reliability you've always demanded from your work. With ProGroup®, you can count on fast, accurate results whether you perform 25,000 tests/year or as few as 10,000. The ProGroup’s® advanced software, components, and user-friendly, multi-tasking computer provide automated:

- Sample and reagent handling, transfers and dispensing
- Bar-code scanning for positive sample and microplate identification
- Liquid level sensing for accurate sample pick-ups
- Microplate stacking and unloading for complete “walk away” operation
- Disposable sample tip ejection to prevent cross contamination
- Multiple-channel pipetting for simultaneous, accurate reagent dispensing
- Pre-set plate shaking for consistent reactions
- Fast, accurate plate readings
- Precision analysis with blood typing results you know you can rely on.

And the Olympus ProGroup® System is designed to be flexible. Multiple liquid handlers may be used. Also, the ProGroup® Liquid Handler can be a stand-alone unit for both ABO/Rh and EIA liquid handling purposes. An EIA washer and an integral programmable controller make it perfect for a wide variety of liquid handling functions.

The Olympus ProGroup®: ABO/Rh testing made easier . . . first test, every test.

"THE BEST DIFFERENTIAL AVAILABLE" JUST BECAME BETTER!

Now... **more proof** than ever. Using the new, complete histogram differential with interpretive report, COULTER® hematology systems now report even **more information**. All significant blood abnormalities are detected, and less than 1% false negatives reported. Coulter technology minimizes manual differentials and delivers the lowest cost-per-reportable-result. **More than ever**... Coulter delivers information, not merely numbers!

WE’LL PROVE IT.

Blenoxane* Combinations
(sterile bleomycin sulfate)
Proven Effective in
Non-Hodgkin's Lymphoma

The newer Blenoxane containing combinations resulted in high complete response rates and extended disease-free survival!?!?

Abdominal/Pelvic CT
February 25
Massive retroperitoneal, retrocrural, para-aortic, and probable right iliac adenopathy.

Abdominal/Pelvic CT
August 4
No evidence of abnormal abdominal or pelvic adenopathy after Blenoxane combination chemotherapy.

CHOP-Bleo

BACOP

COP-BLAM
**Blenoxane** ...Integral Component of Chemotherapy Regimens in Non-Hodgkin’s Lymphoma

Since Blenoxane is virtually non-myelosuppressive, continuing therapy with certain Blenoxane containing chemotherapy regimens (e.g. BACOP) can prevent tumor regrowth between cycles of other chemotherapy regimens while allowing for bone marrow recovery.*2-3-4,6

Blenoxane can produce, with cumulative doses, a syndrome of pulmonary fibrosis. It is usually dose-related, being seen infrequently in patients whose total dose of Blenoxane is less than 400 units.

**Efficacy...Yesterday, Today, Tomorrow**

**M-BACOD**

**m-BACOD**

**MACOP-B**

See prescribing information on following page.
FACULTY POSITION:
Opportunity for board eligible hematologist for full-time academic position at the Instructor or Assistant Professor level (depending upon qualifications) in hematology division with primary responsibility in clinical research, clinical care, and teaching. Send letter of interest and resume to Barry S. Coller, M.D., Division of Hematology, HSC T-15, Rm. 040, SUNY Stony Brook, Stony Brook, NY 11794. SUNY Stony Brook is an affirmative action/equal opportunity educator and employer. AK#122-C.

Immunohematology Fellowships
The American Red Cross Blood Services offers accredited postdoctoral fellowship training in immunohematology and transfusion medicine for qualified candidates in several of its regions, including:

ATLANTA REGION
ATLANTA, GEORGIA

CONNECTICUT REGION
FARMINGTON, CONNECTICUT

LOS ANGELES-ORANGE COUNTIES REGION
LOS ANGELES, CALIFORNIA

NORTHWEST OHIO REGION
TOLEDO, OHIO

PENN-JERSEY REGION
PHILADELPHIA, PENNSYLVANIA

SOUTHEASTERN MICHIGAN REGION
DETROIT, MICHIGAN

SOUTH FLORIDA REGION
MIAMI, FLORIDA

ST. PAUL REGION
ST. PAUL, MINNESOTA

These programs offer didactic training, practical experience and clinical responsibilities in blood centers and affiliated medical centers. For further information, contact:

James P. AuBuchon, MD
Medical Officer
American Red Cross
Medical Operations
1730 E Street NW
Washington, DC 20006
BOARD REVIEW COURSE IN MEDICAL ONCOLOGY

The George Washington University Medical Center
Washington, DC

October 14-18, 1987

The Division of Hematology and Oncology of the George Washington University Medical Center is pleased to announce this course to be held at the Omni Shoreham Hotel, October 14-18, 1987, in downtown Washington, DC.

Designed to meet the needs of physicians planning to take the medical oncology boards, this course will be a valuable update on the recent advances in oncology. It will satisfy the requirements for up to 37 hours of category I AMA credit. The course director is Philip Cohen, M.D.

For further information and registration, contact: Greg P. Thomas, Office of Continuing Medical Education, 2300 K Street, N.W., Washington, DC 20037; (202) 994-4285.

POSTDOCTORAL FELLOWS IN TRANSFUSION MEDICINE

The Blood Center of Southeastern Wisconsin offers a training program for physicians interested in a career in blood transfusion medicine. Trainees receive instruction in immunohematology, immunogenetics, transplantation, immunology, and hemostasis. Clinical rotations on a hematology/oncology and coagulation services can be arranged. The trainees participate in teaching activities and gain experience in the administrative aspects of blood banking. Opportunities for basic and applied research in transfusion therapy, platelet immunology and physiology and hemostasis are available. Board certification or eligibility in hematology/oncology or clinical pathology is required. Positions are available starting July 1, 1988. Send CV to Jay Menitove, M.D., Medical Director, The Blood Center of Southeastern Wisconsin, Inc., 1701 West Wisconsin Avenue, Milwaukee, WI 53233.

HEMATOLOGIST—COAGULATIONIST

The Division of Hematology-Oncology at the University of Utah is seeking a coagulationist with strong laboratory research interests for a full time faculty appointment at the rank of Assistant or Associate Professor. A very competitive salary and benefits package will be adjusted according to previous experience. Please send curriculum vitae and the names of three references to: James P. Kushner, M.D., Chief, Division of Hematology-Oncology, University of Utah Medical Center, Salt Lake City, Utah 84132.

Application deadline is September 30, 1987. Applications submitted after deadline date may be considered if no suitable candidates have applied by the deadline.

*The University of Utah is an Equal Opportunity-Affirmative Action employer.*
The Leader in Human Recombinant Hematopoietic Growth Factors Now Offers:

GM-CSF

There's room in every laboratory for FACScan.
FACScan takes a minimum of bench space, yet it delivers the performance of larger, more expensive instruments.
Like larger flow cytometers, FACScan uses an argon-ion laser for 5-parameter analysis.
Unlike larger instruments, FACScan plugs right in. You don't need an external compressed air or water supply.
FACScan is also easy to use. You can readily perform a variety of clinical research applications, including lymphocyte phenotyping, immune monitoring, DNA analysis, reticulocyte counting, and platelet studies.

Set up and operation are automated with CONSORT™ 30 applications software. And you can even automate sample introduction with the FACS™ AutoMATE™.
Of course, FACScan is supported by Becton Dickinson's complete line of Leu monoclonal reagents, training and applications specialists, and expert field service.
FACScan. The flow cytometer that fits in every lab.
Contact your Becton Dickinson Immunocytochemistry Systems Representative for complete information. Or call the toll-free number below.
