REVIEW ARTICLE

Review: Biology and Clinical Significance of Cytogenetic Abnormalities in Childhood Acute Lymphoblastic Leukemia ........................................................................................................... C.-H. Pui, W.M. Crist, and A.T. Look 1449

CLINICAL INTERVENTION AND THERAPEUTIC TRIALS

HEMATOPOIESIS

In Vivo Stimulation of Megakaryocytopoiesis by Recombinant Murine Granulocyte-Macrophage Colony-Stimulating Factor ................................................................. A.M. Vannucchi, A. Grossi, D. Rafanelli, and P.R. Ferrini 1473
Coordinate Secretion of Interleukin-1β and Granulocyte-Macrophage Colony-Stimulating Factor by the Blast Cells of Acute Myeloblastic Leukemia: Role of Interleukin-1 as an Endogenous Inducer J.C. Rodriguez-Cimadevilla, V. Beauchemin, L. Villeneuve, F. Letendre, A. Shaw, and T. Hoang 1481
Induction of Monocyte Proliferation and HIV Expression by IL-3 Does Not Interfere With Anti-Viral Activity of Zidovudine ......................... H. Schuitemaker, N.A. Kootstra, M.H.J. van Oers, R. van Lambalgen, M. Tersmette, and F. Miedema 1490
Effects of Recombinant Human Interleukin-3 on Human Hematopoietic Progenitor and Precursor Cells In Vivo O.G. Ottmann, A. Ganser, G. Seipelt, M. Eder, G. Schulz, and D. Hoelzer 1494

HEMOSTASIS AND THROMBOSIS

Thrombin Induces a Rapid Redistribution of Glycoprotein Ib-IX Complexes Within the Membrane Systems of Activated Human Platelets ......................... P. Hourdillé, E. Heilmann, R. Combrìé, J. Winckler, K.J. Clemetson, and A.T. Nurden 1503
The Pharmacokinetics of Plasminogen Activator Inhibitor-1 in the Rabbit ............... E.J. Mayer, T. Fujita, S.J. Gardell, R.J. Shebuski, and C.F. Reilly 1514
Expression in a Cell-Free System of Normal Forms and Variant Forms of Human Antithrombin III. Ability to Bind Heparin and React With α-Thrombin ..................... R.C. Austin, R.A. Rachubinski, F. Fernandez-Rachubinski, and M.A. Blajchman 1521
Dependence of Plasmin-Mediated Degradation of Platelet Adhesive Receptors on Temperature and Ca2+ K.J. Winters, P.R. Eisenberg, A.S. Jaffe, and S.A. Santoro 1546

(Continued on following page)
CONTENTS

Monoclonal Antibodies Bound to Subunits of the Integrin GPIIb-IIIa Are Internalized and Interfere With Filopodia Formation and Platelet Aggregation......................W.M. Isenberg, D.F. Bainton, and P.J. Newman 1564
Assembly and GPIIIa Content of Cytoskeletal Core in Platelets Agglutinated With Bovine von Willebrand Factor E.G. Puszkin, E.A. Mauss, and M.B. Zucker 1572

IMMUNOBIOLOGY

Effect of Recombinant Human Granulocyte-Macrophage Colony-Stimulating Factor Administration on the Lymphocyte Subsets of Patients With Refractory Aplastic Anemia...M. Faisal, W. Cumberland, R. Champlin, and J.L. Fahey 1580
Calcium Ionophore but Not Phorbol Ester Promotes Eicosanoids Release by Proliferating Interleukin-3–Dependent Bone Marrow Cells ............................................................Y. Shibata, P.G. McCaffrey, H. Sato, and Y. Oghiso 1586
Characterization of Recombinant Factor VIII and a Recombinant Factor VIII Deletion Mutant Using a Rabbit Immunogenicity Model System .......................P.C. Esmon, H.S. Kuo, and M.A. Fournel 1593
Differential Response of Malignant Human B-Cells to Anti-IgM Immunoglobulin (Anti-μ) and B-Cell Growth Factor: Unique Direct Cytotoxicity of Anti-μ on Prolymphocytic Leukemia Cells......C.S.P. Chan, F. Soehnlen, and G.P. Schechter 1601

NEOPLASIA

Receptors for Tumor Necrosis Factor on Neoplastic B Cells From Chronic Lymphocytic Leukemia Are Expressed In Vitro but Not In Vivo...............W. Digel, W. Schöniger, M. Stefanić, H. Janssen, C. Buck, M. Schmid, A. Raghavachar, and F. Porzsolt 1607

PHAGOCYTES

Recombinant C5a Stimulates Transcription Rather Than Translation of Interleukin-1 (IL-1) and Tumor Necrosis Factor: Translational Signal Provided by Lipopolysaccharide or IL-1 Itself...............R. Schindler, J.A. Gelfand, and C.A. Dinarello 1631

TRANSPLANTATION

B-Cell Differentiation Following Autologous, Conventional, or T-Cell Depleted Bone Marrow Transplantation: A Recapitulation of Normal B-Cell Ontogeny ............T.N. Small, C.A. Keever, S. Weiner-Fedus, G. Heller, R.J. O'Reilly, and N. Flomenberg 1647

TRANSFUSION MEDICINE

SPECIAL ARTICLE

Visiting Scientist Program of the American Heart Association Council on Thrombosis and the Burroughs Wellcome Corporation.................................................................K.G. Mann 1662

(Continued on following page)

CORRESPONDENCE

Serum β2 Microglobulin in Solitary Plasmacytomata .............................................................. 1663
Alternative bcr/abl Transcripts in Chronic Myeloid Leukemia ....................................................... 1663
More on the Origin of the Reed-Sternberg Cell ........................................................................... 1665
Contamination of Thrombospondin With Vitronectin ................................................................. 1666

SPECIAL DEPARTMENTS
Announcements ................................................................................................................................. 1669
Information for Contributors ........................................................................................................ xix

All manuscripts submitted to BLOOD and subsequently accepted for publication will be assessed a $50.00 charge per published page. This charge is necessary to offset the increasing costs of publication.

All manuscripts submitted for consideration for publication in BLOOD should be sent to: Arthur W. Nienhuis, M.D., Editor, BLOOD, The Journal of the American Society of Hematology, 9650 Rockville Pike, Bethesda, MD 20814. For other information, call (301) 571-1895.

The American Society of Hematology certifies that the continuing medical education offering provided by BLOOD, The Journal of The American Society of Hematology, meets the criteria for up to 22 hours of credit in Category 5(a) for the Physician’s Recognition Award of the American Medical Association.

The Editors of the journal Blood wish to thank Amgen for its educational grant, which provided support for additional editorial pages in this issue.

Cover photo shows the distribution of GP Ib-IX complexes on human platelets as seen by immunogold staining and scanning electron microscopy. Binding of murine monoclonal antibody to GP Ib was located by goat anti-mouse IgG coupled to 15 nm gold particles and silver enhancement. Courtesy of Hourdillé et al, "Thrombin Induces a Rapid Redistribution of Glycoprotein Ib-IX Complexes Within the Membrane Systems of Activated Human Platelets," p 1503.
