## RAPID COMMUNICATIONS

- **Pulmonary Fat Embolism: A Distinct Cause of Severe Acute Chest Syndrome in Sickle Cell Anemia**
  - E. Vichinsky, R. Williams, M. Das, A.N. Earles, N. Lewis, A. Adler, and J. McQuitty
  - Page 3107

- **Direct Interaction of Proteoglycan Macrophage Colony-Stimulating Factor and Basic Fibroblast Growth Factor**
  - Page 3113

- **Blood Coagulation Factor Va Abnormality Associated With Resistance to Activated Protein C in Venous Thrombophilia**
  - X. Sun, B. Evatt, and J.H. Griffin
  - Page 3120

- **Characterization of Genomic PIG-A Gene: A Gene for Glycosylphosphatidylinositol-Anchor Biosynthesis and Paroxysmal Nocturnal Hemoglobinuria**
  - Page 3126

---

## CLINICAL INTERVENTION AND THERAPEUTIC TRIALS

- **Amifostine (WR-2721) Shortens the Engraftment Period of 4-Hydroperoxycyclophosphamide-Purged Bone Marrow in Breast Cancer Patients Receiving High-Dose Chemotherapy With Autologous Bone Marrow Support**
  - Page 3132

---

## HEMATOPOIESIS

- **Transforming Growth Factor-β Regulates c-kit Message Stability and Cell-Surface Protein Expression in Hematopoietic Progenitors**
  - C.M. Dabois, F.W. Ruscetti, J. Stankova, and J.R. Keller
  - Page 3138

- **Splenic Primitive Hematopoietic Stem Cell (PHSC) Activity Is Enhanced by Steel Factor Because of PHSC Proliferation**
  - D.E. Harrison, K.M. Zsebo, and C.M. Astle
  - Page 3146

- **Bifunctional Effects of Tumor Necrosis Factor α (TNFα) on the Growth of Mature and Primitive Human Hematopoietic Progenitor Cells: Involvement of p55 and p75 TNF Receptors**
  - Page 3152

- **Molecular Cloning of a Novel Receptor Tyrosine Kinase Gene, STK, Derived From Enriched Hematopoietic Stem Cells**
  - Page 3160

- **Expression of CD33, CD38, and HLA-DR on CD34⁺ Human Fetal Liver Progenitors With a High Proliferative Potential**
  - M.O. Muench, J. Cupp, J. Polakoff, and M.G. Roncarolo
  - Page 3170

- **Number and Location of AUUUA Motifs: Role in Regulating Transiently Expressed RNAs**
  - M. Akashi, G. Shaw, M. Hachiya, E. Elstner, C. Suzuki, and P. Koeffler
  - Page 3182

- **Molecular Cloning of Two Isoforms of the Murine Homolog of the Myeloid CD33 Antigen**
  - E.Z. Tchilian, P.C.L. Beverley, B.D. Young, and S.M. Watt
  - Page 3188

- **Isolation and Characterization of the Human Interleukin-9 Receptor Gene**
  - M.-s. Chang, G. Engel, C. Benedict, R. Basu, and J. McNinch
  - Page 3199

(Continued on following page)
HEMOSTASIS AND THROMBOSIS

Perturbations in the Fibrinolytic Pathway Abolish Cyst Formation But Not Capillary-Like Organization of Cultured Murine Endothelial Cells .......................... N. Dubois-Stringfellow, A. Jonczyk, and V.L. Bautch 3206

Immunoglobulin G From Patients With Heparin-Induced Thrombocytopenia Binds To a Complex of Heparin and Platelet Factor 4 .................. J.G. Kelton, J.W. Smith, T.E. Warkentin, C.P.M. Hayward, G.A. Denomme, and P. Horsewood 3232

IMMUNOBIOLOGY

Enhanced Production of Nitric Oxide by Bone Marrow Cells and Increased Sensitivity to Macrophage Colony-Stimulating Factor (CSF) and Granulocyte-Macrophage CSF After Benzene Treatment of Mice C.J. Punjabi, J.D. Laskin, S.-m. Hwang, L. MacEachern, and D.L. Laskin 3255

NEOPLASIA

Heteroduplex Analysis of T-Cell Receptor γ Gene Rearrangements for Diagnosis and Monitoring of Cutaneous T-Cell Lymphomas .................. M. Bottaro, E. Berti, A. Biondi, N. Migone, and L. Crosti 3271

Novel Retinoic Acid, 9-Cis Retinoic Acid, in Combination With All-Trans Retinoic Acid Is an Effective Inducer of Differentiation of Retinoic Acid-Resistant HL-60 Cells ....... M. Kizaki, H. Nakajima, S. Mori, T. Koike, M. Morikawa, M. Ohta, H.P. Koefler, and Y. Ikeda 3289

Retinoic Acid-Resistant HL-60 Cells Exclusively Contain Mutant Retinoic Acid Receptor-α ....... Y.-P. Li, F. Said, and R.E. Gallagher 3298

PHAGOCYTES

Macrophage Colony-Stimulating Factor–Induced Bone Marrow Macrophages Do Not Synthesize or Release Prostaglandin E2 .......................... Y. Shibata, D.R. Bjorkman, M. Schmidt, Y. Oghiso, and A. Volkman 3316

(Continued on following page)
CONTENTS

(Contents continued)

C3a Activates the Respiratory Burst in Human Polymorphonuclear Neutrophilic Leukocytes Via Pertussis Toxin-Sensitive G-Proteins .......................................................... J. Elsner, M. Oppermann, W. Czech, and A. Kapp 3324

RED CELLS

Mild Elliptocytosis Associated with the α34 Arg → Trp Mutation in Spectrin Genova (α074) .......... S. Perrotta, E.M. del Giudice, N. Alloisio, G. Sciarratta, L. Pinto, J. Delaunay, S. Cuttillo, and A. Iolascon 3346

The −158 (C → T) Promoter Mutation Is Responsible for the Increased Transcription of the 3’ γ Gene in the Atlanta Type of Hereditary Persistence of Fetal Hemoglobin ...................... D.G. Efremov, A.J. Dimovski, and T.H.J. Huisman 3350

Interaction of a Rare Illegitimate Recombination Event and a Poly A Addition Site Mutation Resulting in a Severe Form of α Thalassemia .. P. Fortina, T. Parrella, M. Sartore, E. Gottardi, V. Gabutti, K. Delgrosso, E. Mansfeld, E. Rappaport, E. Schwartz, C. Camaschella, and S. Surrey 3356

Glycophorin He(St³) of the Human Red Blood Cell Membrane Is Encoded by a Complex Hybrid Gene Resulting From Two Recombinational Events ................. C.H. Huang, C. Lomas, G. Daniels, and O.O. Blumenfeld 3369

TRANSPLANATION

CORRESPONDENCE
Cyclophosphamide Plus ATG Conditioning Is Insufficient for Sustained Hematopoietic Reconstitution in Patients With Severe Aplastic Anemia Transplanted With Marrow From HLA-A, B, DRB Matched Unrelated Donors ................................................................. 3417

Identification of a Novel Termination Codon Mutation (TAA → TAT, Term → Tyr) in the α2 Globin Gene of a Laotian Girl With Hemoglobin H Disease .......................... 3418

(Continued on following page)
Peripheral Blood Hematopoietic Progenitor Cells of Cytokine-Stimulated Healthy Donors as an Alternative for Allogeneic Transplantation .......................................................... 3420

SPECIAL DEPARTMENTS
Announcements .................................................................................................................. 3422
Erratum ............................................................................................................................ 3424
Information for Contributors .......................................................................................... xxv

All manuscripts submitted to BLOOD and subsequently accepted for publication will be assessed a $50.00 charge per published page. This charge is necessary to offset the increasing costs of publication.

All manuscripts submitted for consideration for publication in BLOOD should be sent to: James D. Griffin, MD, Editor-in-Chief, BLOOD, The Journal of the American Society of Hematology, 1018 Beacon Street, Brookline, MA 02146. For other information, call (617) 738-9808.

The American Society of Hematology certifies that the continuing medical education offering provided by BLOOD, The Journal of The American Society of Hematology, meets the criteria for up to 22 hours of credit in Category 5(a) for the Physician’s Recognition Award of the American Medical Association.
