The University of Texas MD Anderson Cancer Center, Department of Lymphoma/Myeloma, is recruiting an Open Rank, Term Tenure Track or Term Tenure faculty member with an active interest in clinical research particularly related to Lymphoma. Physicians with clinical expertise in Lymphoma/Myeloma and strong clinical and/or translational research interests in Lymphoma are encouraged to apply. Faculty rank and tenure status will be contingent upon experience. The successful candidate will have the opportunity to participate in ongoing clinical and translational research with world-class physician scientists within The University of Texas MD Anderson Cancer Center. The program is composed of dynamic, interdisciplinary, leading clinicians and researchers dedicated to improving prevention, detection, diagnosis, and treatment of Lymphoma. Candidates with an interest in both lymphoma and plasma cell dyscrasias are encouraged to apply. Based in part on their level of experience, the selected candidate would have the opportunity to assist with mentoring junior faculty, fellows, and other trainees, assume administrative duties, and contribute to the overall mission of the Department and the greater Institution.

The successful candidate will also have a background that demonstrates his/her ability to work synergistically with both laboratory-based and clinical faculty. Applicants should possess excellent writing and communication skills as evidenced by peer-reviewed publications, presentation skills for professional meetings, and the demonstrated ability to obtain extramural funding for clinical or translational research. MD Anderson Cancer Center offers many opportunities in a growing and vibrant research, clinical, and training environment.

The salary range is competitive and is based on the applicant’s qualifications. Please send a letter of intent, curriculum vitae, three to five reference letters, and a brief summary of previous clinical endeavors, research accomplishments and future clinical and research aims to:

Attention: Kim Corbett  
MBA Department Administrator  
Email: kacorbett@mdanderson.org

MD Anderson Cancer Center is an equal opportunity employer and does not discriminate on the basis of race, color, religion, age, national origin, sex, sexual orientation, gender identity/expression, disability, veteran status, genetic information, or any other basis protected by federal, state, or local laws, unless such distinction is required by law. All positions at The University of Texas MD Anderson Cancer Center are security sensitive and subject to examination of criminal history record information. Smoke-free and drug-free environment.
Memorial Sloan Kettering Cancer Center (MSK) is currently seeking a service chief of international stature to lead the Stem Cell Transplantation and Cellular Therapies service in the Department of Pediatrics. The ideal candidate must have a vision that builds upon a long tradition of innovation and excellence to further improve outcomes for children undergoing these therapeutic approaches. Successful applicants will have a demonstrated record of clinical excellence and expertise in translational and clinical research. The Chief will also work closely with members of other departments, services and centers to foster a culture of outstanding patient-centered care.

Candidates must have a strong record of achievement as a physician and/or clinician-investigator in the field of Pediatric Hematology-Oncology and must possess an MD, board certification in Pediatric Hematology-Oncology, and eligibility for medical licensure in New York State. Applicants should be experienced in investigator-initiated clinical trials, in mentoring junior faculty, and have a demonstrated record of academic accomplishment, including relevant, peer-reviewed publications, external funding and/or strong potential to establish an independent line of research. The candidate must have internationally recognized expertise in stem cell transplantation and/or cell-based therapies (CTL, CART). The successful candidate should have a vision about how to leverage areas of existing strength at MSK (genomics, cellular therapies, immuno-oncology, developmental therapeutics) and new recruitments that will empower innovations for patients requiring treatment with transplantation or cellular therapies. The Chief will work closely with the Chair as part of the departmental leadership team.

This full-time position provides a unique opportunity for a blend of leadership, patient care, teaching/fellowship training, research, and program development. This search is open to potential faculty at all senior levels of career experience. Appointments will be made at an academic level commensurate with the appointee's experience. A parallel appointment as Associate Professor or Professor of Pediatrics at the Weill Cornell Medical College will be available. All qualified individuals are encouraged to apply. For further information, or to apply, please send a letter of interest and CV.

Please forward letter of interest and curriculum vitae to:

Andrew L. Kung, MD, PhD
Chairman, Department of Pediatrics
c/o Christina Rinaldi

Memorial Sloan Kettering Cancer Center is an equal opportunity employer with a strong commitment to enhancing the diversity of its faculty and staff.

Department of Pediatrics
Division of Stem Cell Transplantation and Regenerative Medicine

The Division of Stem Cell Transplantation and Regenerative Medicine is seeking an outstanding faculty candidate in the Clinician Educator Line (CE), who has considerable expertise in the Pediatric Hematopoietic Stem Cell Transplantation. The Pediatric Hematopoietic Stem Cell Transplantation Program at Stanford is rapidly growing with considerable support from Stanford Children’s Hospital (previously known as Lucile Packard Children’s Hospital). The physician will be expected to provide excellent clinical care for the patients of the Hematopoietic Stem Cell Transplantation Program, engage in clinical research, and participate in multi-institutional clinical trials. Existing clinical trials include studies on hematopoietic stem cell transplantation for leukemia, hemoglobinopathies, disorders of immune regulation/function, and metabolic diseases. The Division is actively investigating cellular and gene therapies in new investigational clinical trials utilizing products produced by the newly opened 25,000 sq. ft. GMP Laboratory. The position will also include teaching residents, fellows, and hospitalists in the program. He or she will interact with other programs at Stanford including, but not limited to, the Adult Bone Marrow Transplant Program, Cancer Center, and Stanford Stem Cell Institute and Stanford Immunology Institute.

The major criterion for appointment, reappointment, and promotion is excellence in the overall performance of clinical care and teaching appropriate to the programmatic needs that the individual fulfills. If the candidate has active scholarly activity or fulfills an administrative role, these factors may also be taken into consideration when evaluating excellence.

The successful candidate will be appointed as a Clinical Assistant Professor or Clinical Associate Professor in the Department of Pediatrics at Stanford University Medical School. Rank and salary will be commensurate with qualifications and experience.

Applications are being accepted now and the review process will begin immediately. Interested candidates should send a copy of a cover letter and curriculum vitae to:

Dr. Rajni Agarwal-Hashmi via email at: rajnia@stanford.edu

Rajni Agarwal-Hashmi, MD Associate Professor of Pediatrics
Section Chief, Pediatric Stem Cell Transplantation and Regenerative Medicine

Maria Grazia Roncarolo, MD George D. Smith Professor
Division Chief, Pediatric Stem Cell Transplantation and Regenerative Medicine Co-Director, Institute for Stem Cell Biology and Regenerative Medicine
Co-Director, Bass Center for Childhood Cancer and Blood Diseases Department of Pediatrics
Stanford University
